

## Global Metals &amp; Mining

## Takeaways: costs, supply constraints and resilient demand to support coal prices

Industry Overview

**Coal prices supported by cost and supply constraints**

We hosted a conference call with Wood Mackenzie's coal analysts today on the outlook for global met and thermal coal in 2024 and the next decade. Supply constraints, costs and energy crisis will continue to support met and thermal coal prices in the next few years. WoodMac forecasts 90<sup>th</sup> percentile met coal breakeven price at US\$179/t (real) which is different to BofA's estimated LT met coal price using incentive price of US\$200/t (real). WoodMac's LT thermal coal price of US\$102/t in a balanced market is largely in-line with BofA's LT thermal coal price forecast of US\$100/t (real).

**Met coal export from Australia is expected to recover**

Weak premium HCC supply from Australia and increasing steel demand from India are supporting Australia PLV prices above US\$300/t. BMA and Anglo America's met coal operations impacted by maintenance, higher strip ratios and tough mining conditions such as high gas levels. Australia met coal supply is expected to recover from 2024.

**Seaborne Met coal demand growth from India and SE Asia**

WoodMac forecasts EAF's share in global steel production to increase from 72% in 2022 to 62% in 2033. However steel production growth from emerging and cost sensitive regions such as India and SE Asia will grow by BF using met coal & iron ore. WoodMac forecasts 28 Mtpa of met coal demand growth in India to 2033 compared with 2022. Subsequently the seaborne met coal demand is expected to increase by 6.0% through 2033 despite Met coal demand to contract from the peak in 2023.

**Seaborne thermal coal demand to peak in 2025**

A reliable and cost-effective energy source is required for Europe, Japan and North America to replace thermal coal in order to achieve the emission target amid increasing power demand in the next decade. The speakers forecast permanent decline in thermal coal demand from 2025 for Europe, China and JKT, while increasing demand from India, SE Asia and RoW. The speakers believe low cost but intermittent renewables can't replace fossil fuel power alone in APAC despite increasing nuclear power consumption in Japan, China and South Korea.

**Thermal coal supply will decline with demand**

WoodMac forecasts declining supply from major thermal coal exporting countries driven by depleting reserves/finished coal mines and decreasing thermal coal demand from developed countries to achieve decarbonization goals. Despite the declining demand in North Asia such as JKT, lack of thermal coal projects from Australia are insufficient to support the Australian thermal coal exports. The speakers expect high CV thermal coal seaborne market remain tight due to limited high quality coal supply from Australia.

PLV: Premium Low Vol

HCC: Hard coking coal

LT: Long term

BMA: BHP Mitsubishi Alliance

EAF: Electric Arc Furnace

BF: Blast Furnace

BOF: Basic oxygen steelmaking

CV: Calorific Value

SE: Southeast

RoW: Rest of world

JKT: Japan, Korea and Taiwan

## Key takeaways

- WoodMac estimates 2023's key M&A met coal transactions have an averaged implied met coal price of US\$188/t.
- The speakers forecast 90<sup>th</sup> percentile breakeven price at US\$179/t (real) which is below BofA's LT met coal price of US\$200/t (real) setting from incentive price.
- WoodMac's quality adjusted thermal coal cost curve suggests a LT thermal coal price of US\$102/t in a balanced market which is largely in-line with BofA's LT thermal coal (real) price forecast of US\$100/t.
- High CV thermal coal seaborne market remain tight due to limited high quality supply from Australia while high CV importing countries such as JKT's demand remain stable in the short and medium term.
- China increased met coal imports from Russia and Mongolian at cheaper prices while Australia coal exports into China remain at low level due to less competitive prices vs. China domestic met coal.
- WoodMac forecasts EAF's share in global steel production to increase from 72% in 2022 to 62% in 2033. However steel production growth from emerging and cost sensitive countries will grow by BF-BOF.
- India's EAF share is expected to decrease from 54% to 38% and Southeast Asia to decrease from 47% to 41% as the new steel production growth will be coming from BF using met coal & iron ore. WoodMac forecasts 28 Mtpa of met coal demand growth in India in 2033 compared with 2022.
- Subsequently the seaborne met coal market will increase by 6.0% through 2033 despite WoodMac expects Met coal demand to contract from the peak in 2023.
- According to WoodMac, the speakers anticipate most countries 2030 CO<sub>2</sub> emission targets would be not achieved, except for China's peak CO<sub>2</sub> by 2030. A reliable and cost-effective energy source is required for Europe, Japan and North America to replace thermal coal amid increasing electricity/power demand in the next decade.
- WoodMac forecasts permanent decline in thermal coal demand from 2025 for Europe, China and JKT, while increasing demand from India, South East Asia and rest of the world. The speakers believe low cost but intermittent renewables can't replace fossil fuel power alone in APAC despite increasing nuclear power consumption in Japan, China and South Korea.
- WoodMac forecasts declining supply from major thermal coal exporting countries. Colombian and South Africa are expected to decline by 5.0% CAGR from 2023 to 2033 largely due to depleted reserves and lack of investment in thermal coal to develop replacement supply. 4.7% CAGR decline from Indonesia, 6.8% CAGR from Russia and 4.0% CAGR decline from Australia from 2023-2033 driven by decreasing demand.
- Despite the declining demand in North Asia such as JKT, lack of thermal coal projects from Australia to replace finished coal mines are insufficient to support the Australian thermal coal exports.

# Disclosures

## Important Disclosures

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

## Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

Refer to [BofA Global Research policies relating to conflicts of interest](#).

### General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives,

financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.
