

## Algonquin Power &amp; Utilities Corp

# Holding pattern on renewables sale. Watching pro-forma leverage

Maintain Rating: NEUTRAL | PO: 6.00 USD | Price: 6.11 USD

## 4Q23/FY23 adjusted EPS in-line as miss FY23 guidance

We maintain our Neutral rating on diversified utility and renewable company Algonquin Power & Utility (AQN) after its 4Q23 update. AQN reported \$0.16 4Q23 adjusted EPS which adjusted out -\$0.03 renewables asset impairments, -\$0.01 loss on bond redemption, and -\$0.01 renewables strategy review costs. \$0.53 FY23 adjusted EPS was in-line with BofA and a small beat vs \$0.51 Consensus. \$0.53 missed the low-end of \$0.55-\$0.61 original guidance range and on the 3Q23 management warned that it would be at or below the low-end of the range. We see shares as having a balanced risk/reward currently.

## No 2024 guidance despite renewables sale YE24

Management did not provide 2024 guidance, a cautious development after EPS declined -13% in 2023. We forecast EPS declining yet again in 2024 to \$0.51 but Consensus assumes an approximately flat outlook at \$0.54. The lack of guidance will likely be interpreted adversely relative to Consensus. The renewables asset sale close is unlikely to be a material driver of FY24 adjusted EPS due to the timing of close.

## Renewables asset sale the big focus

The renewables segment adjusted EBITDA declined -9% in FY23 to \$372Mn. Adjusting out \$109Mn Atlantica dividends & other income, \$28Mn renewable energy certificates, and \$71Mn HLBV tax attributes leaves \$164Mn core adjusted EBITDA. With -\$61Mn interest expense allocated, the core free cash flow profile is less robust. Management indicated that it expects an announcement in mid-2024 with a close around YE24. AQN recorded a \$23.5Mn renewables impairment on “development loans related to the simplification of the Company’s development strategy”.

## Leverage increased substantially in 2023

Long-term debt increased +13% (~\$1Bn) as of 12/31/23 with ~\$1.2Bn January 2024 issuances (~\$300Mn EDE securitization and \$850Mn utility HoldCo at 5.7%), primarily used to repay debt. Despite debt increasing, adjusted fund from operations declined -8% (-\$66Mn). Pro-forma FY23 funds from operations (FFO) / debt notably declined as a result to ~9.4% from 11.7% in 2022, one of the lowest in our coverage universe. Management is targeting mid-11% in 2024. See details in the full report.

## Accounting system a priority but the roll-out was rocky

Management discussed the new SAP system extensively on the earnings call as a roll-out for 2024 and a driver of improved returns. We view this as an area of uncertainty following the experience in New Hampshire where the company identified a \$573Mn intercompany overstatement that was “erroneously computed”. [See SAP details here](#). Management attributed this to initial growing pains and integrating historical financial information into the system to translate between FERC and GAAP. AQN disclosed that it spent ~\$500Mn on the system and we will watch for stakeholder comments on the recoverability in 2024+.

## FY23 rate base in-line with below average 5-6% growth

FY23 rate base increased +\$379Mn YoY, consistent with our expectations with the smaller capital program. AQN deployed +\$742Mn utility capex, incurred \$346Mn depreciation, and a \$64Mn securitization write-off. Management guided to similar utility capex YoY which was \$742Mn in 2023. Growth was concentrated in California which was +\$140Mn (+23%). There was \$320Mn for renewables in 2023 but management did not provide guidance for FY24+ with the review pending.

## Price objective basis & risk

### Algonquin Power & Utilities Corp (AQN / YAQN)

Our PO of \$6.00 (C\$8.00) is based on a SOTP valuation. We assign P/E multiples on 2025E (13.7x electric, 13.3x gas, 20.4x for water) EPS based on expected 2025 breakdown. We reflect a -3x discount to the peer multiples to reflect risk of capex reductions and lack of clarity on growth prospectively. We back out future tax

differential stemming out of tax rate normalization.

We value AQN's non-reg on EV/EBITDA basis. We assign a -2x discount to thermal, hydro, solar, and wind from the peer mult of 10x 2024E EBITDA to reflect the fact that as a likely seller AQN may see pressure on realized pricing.

We valued AQN's 44.2% stake in AY on mark to market basis and net out non-Utility debt.

Our assumed shares o/s numbers reflect our estimated equity issuance including converts in 2025.

Upside risks: 1) Higher USD/CAD F/X rate, 2) Constructive regulatory outcomes, 3) Lower interest rate, 4) Execution on the capital plan, 5) Dividend Growth from AY.

Downside risks: 1) Higher interest rates, 2) Lower USD/CAD F/X rate depending upon the exposure to the US, 3) Dilution risk associated with substantial equity issuance to finance capex, 4) Unfavorable regulatory actions, 5) Increase in Tax rate, 6) AY may not be able to sustain its current dividend levels, 7) Exposure in CA Renewables, 8) Balance Sheet quality, and 9) Natural disasters which could impact utility operating systems.

#### BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
