

Axalta Coating Systems

Flattish end markets but productivity benefits underway; Reiterate Buy

Reiterate Rating: BUY | PO: 39.00 USD | Price: 31.25 USD

Cultural change apparent in 4Q results

Our constructive view on Axalta has been based primarily on the leadership change in the last year driving structural and cultural changes within the company after multiple years of lackluster results, including 6 profitless quarters in Mobility unlike competitor results. While the market seemed disappointed with AXTA's 4Q commentary, presumably related to the soft end market outlook, we saw signs of productivity that reinforced our view for more earnings growth. We had assumed all the coatings companies would equally benefit in raw material cost relief, but AXTA's 12% y/y drop in raws in 4Q was an outlier and reflects the procurement initiative last year. We believe the pricing initiatives have been driven from the top and have now fully offset the surge in raw material costs from 2021/22. Axalta's end markets are mixed, some gaining and some bottoming:

Refinish: This business remains the gem for AXTA, owing to pricing power with fragmented customers, and technology-driven share gains offsetting flattish collision repair demand. Axalta's mixing machines and wet-on-wet coatings provide labor relief for body shops. 2500 body shop wins in 2023 plus the acquired Swiss refinish distributor/ MSO partnerships could drive share gains.

Industrial: Volumes in AXTA's industrial coatings businesses of building materials, electronics, coil, and powder are still 20% below 2021 levels. Destocking is likely over, but end markets like US housing are still flattish. Mgmt is pruning lower margin customers and businesses.

Mobility: Axalta's EBITDA margins in 4Q were near 13% in the Mobility segment and back to 2019 levels (see Exh 2), and we expect further gains in 2024 from productivity and pricing. End market demand is flat with slightly higher auto builds vs lower commercial, reinforcing the need for productivity.

Valuation looks attractive

We raised our 2024 EBITDA estimate to \$1054m, up from \$1025m, near the top end of mgmt's guide, and representing 11% EBITDA growth. Our 2024E EPS rises to \$1.90 (\$1.80 prior), representing 21% growth, which is at the upper end within our specialty chemical coverage, but the stock's valuation multiple is lagging (see Exh 3). Our PO rises to \$39 (from \$38), based on the average of a DCF-derived present value and 18.0x P/E.

Company Sector

Chemicals-Major

Company Description

Axalta is a leading global producer of auto refinish, auto OEM and industrial coatings with \$5.2bn in sales in 2023. The company is the fourth largest coatings producer in the world behind PPG Industries, Akzo (Netherlands) and Sherwin-Williams. Axalta was formed when Carlyle purchased the business from DuPont in February 2013 for \$4.9bn, or 7.4x pro forma 2012 adjusted EBITDA. Carlyle no longer holds an ownership interest in AXTA.

Investment Rationale

We expect AXTA's end markets to post cyclical recovery in 2024, with the potential for a cultural change from new leadership to drive increased profitability, along with raw material costs that could deflate in 2024. The earnings outlook for Axalta's refinish and industrial businesses remain robust, but the challenge has been the auto OEM business, which has struggled with profitability since mid-2021. We expect new leadership to improve this outlook in 2024.

BofA GLOBAL RESEARCH

Price objective basis & risk

Axalta Coating Systems (AXTA)

Our PO of \$39 is based on the average of a 3 stage DCF analysis and a 18.0x P/E multiple as applied to a FY2024 EPS estimate. The 3-stage DCF is predicated on a 8.0% WACC and a 2.0% terminal growth rate.

Downside risks are slower global auto production, penetration of autonomous vehicles and collision avoidance technology, rising raw materials with inability to pass on price, and a strengthening US dollar.

Upside risks are strengthening auto production, delays in autonomous vehicle start-ups and collision avoidance technology, lower raw materials, and a strengthening US dollar.

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2023)

| Coverage Universe | Count | Percent | Inv. Banking Relationships ^{R1} | Count | Percent |
|-------------------|-------|---------|------------------------------------------|-------|---------|
| Buy | 1895 | 53.62% | Buy | 1083 | 57.15% |
| Hold | 832 | 23.54% | Hold | 454 | 54.57% |
| Sell | 807 | 22.84% | Sell | 383 | 47.46% |

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

| Investment rating | Total return expectation (within 12-month period of date of initial rating) | Ratings dispersion guidelines for coverage cluster ^{R2} |
|-------------------|-----------------------------------------------------------------------------|------------------------------------------------------------------|
| Buy | ≥ 10% | ≤ 70% |
| Neutral | ≥ 0% | ≤ 30% |
| Underperform | N/A | ≥ 20% |

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
