December Sports Betting/iGaming: Sports betting growth reaccelerates to end 2023

Industry Overview

Digital gross gaming revenue up +41% Y/Y

December digital gross gaming revenue (GGR) is tracking to \$1.87B, up +41% Y/Y, improving from +23% in November, and Q4 growth of +34% is ahead of +30% in Q3. Online Sports Betting (OSB) GGR grew +52% Y/Y in Dec. vs. +24% in Nov., and Q4's 43% growth is ahead of our Q4 estimate of +35%. iGaming GGR growth of +21% in Dec. was steady from +22% in Nov. and Q4 growth of 20% is ahead of our est. of +12%.

Back on track after unfavorable sports outcomes in Nov.

OSB handle (volume) grew +44% Y/Y, a modest deceleration from +53% in Nov. but Q4 handle growth of 46% is ahead of +44% in Q3. December OSB hold of 9.9% is up +230bps M/M and up +20bps Y/Y. As we highlighted in our [Q4 Gaming preview \(see report\)](#), we think the strong digital trends in December made up for the unfavorable sports outcomes in November. We think there is 11%/18% upside risk to our Q4 DraftKings net gaming revenue / EBITDA estimates. Based on weekly New York data, strong trends are continuing in Jan. with a month-to-date hold rate of 11.1% and GGR up +71% Y/Y. Maintain Buy on DraftKings.

Market share and promotional activity

In Q4, we estimate OSB share at 43% for FanDuel, 36% for DraftKings, 6% for BetMGM, and 5% for PENN. Since PENN's launch of ESPN Bet midway through the quarter, we think they reached ~10% share on a run-rate basis in November, and their share moderated to ~7% in December. In iGaming FanDuel's share is up +3pts Q/Q to 26%, and DraftKings share is up +1pp Q/Q to 27%. FanDuel and DraftKings are gaining iGaming share from BetMGM, whose share is down 3pps Q/Q to 21%. Overall, we think the OSB promotional environment is healthy and better than expected. Excluding ESPN Bet, promo as a % of handle is down 1pt Y/Y to 3.0% in MI.

FanDuel, DraftKings lead app downloads

January app downloads are showing continued strength for FanDuel and DraftKings, with 24%/20% share in OSB and 37%/31% share in iGaming. For the newer players, Hard Rock garnered 12% OSB download share, and ESPN Bet download share is 10% in January. For ESPN Bet, we think the next catalyst is further integrations with the ESPN media app including Bet Mode, which we expect to launch before the Super Bowl in February.

Price objective basis & risk**DraftKings, Inc. (DKNG, C-1-9, \$37.94)**

Our \$45 PO is based on approx. 25x 2025E Adj. EBITDA, a premium to other "proven" best of breed disruptors. We believe this premium multiple is justified given the early stage enthusiasm for the vertical and the scarcity value associated with DKNG, as well as its revenue trajectory and inflection to positive Adj. EBITDA

Upside risks to our PO are higher-than-expected growth, faster-than-anticipated state legalizations and quicker and higher profitability than we model.

Downside risks are lower enthusiasm for growth stocks, slower legalization of sports betting, increased competition, and a slower ramp to profitability.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.
