

## Capri Holdings Ltd

## Tough macro backdrop leads to 3Q sales miss, FCF intact

Reiterate Rating: NO RATING | PO: NA | Price: 47.54 USD

## Another sales miss as demand remains weak

Capri reported 3Q EPS of \$1.20, below our/VA consensus of \$1.73/\$1.81 on weaker sales, partly offset by better gross margin. Sales of \$1.43bn (-5.6%) missed VA consensus by 4%, driven by continued softness in North America and residual issues from the Kors ecommerce implementation error discussed last quarter. CPRI expects to generate strong FCF on an annual basis, in line with historical levels (approximately \$500mn); the company plans to reduce net debt significantly by the end of the FY. We model FCF of \$496mn, down only slightly from our prior forecasts as inventory management in the quarter (-14% y/y) offsets the operational miss.

## Cutting estimates to reflect miss and weaker backdrop

Wholesale sales declined low-teens due to weaker demand in Americas and EMEA. Gross margin of 65% declined 130bp on lower full price sell through, but was above our expectation. We are cutting our F24 EPS by 19% to \$3.73, reflecting sales -6% and over 600bp decline in operating margin.

## Sales down across the portfolio

Michael Kors revenue declined 6% reported (-6% ccy) due to softer consumer demand, primarily in the Americas (sales -7%), along with the ecommerce implementation issues. These issues are now largely resolved. Wholesale declined LDD while DTC declined MSD. Brand sales in EMEA/Asia were both down 2%. OM contracted 170bp y/y due to lower full price sell through and expense deleverage on lower sales. Versace revenue fell 9% reported (-11% ccy), also due to a softer demand backdrop in Americas (-14%) and EMEA (-13%), partly offset by growth in Asia (+10%). OM declined 1600bp to -6.2% due to unfavorable channel mix, higher store related costs, and expense deleverage. Jimmy Choo sales declined 1% reported (-3% ccy); Americas revenue fell 11%, EMEA flat, and Asia grew 9%. OM declined over 800bp due to lower full price sell throughs, unfavorable channel mix, and higher store related costs.

### Equity Investment Rating Distribution: Global Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships <sup>R1</sup>	Count	Percent
Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

<sup>R1</sup> Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

**FUNDAMENTAL EQUITY OPINION KEY:** Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster <sup>R2</sup>
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

<sup>R2</sup> Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

**INCOME RATINGS**, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

#### **BoFA ESGMeter Methodology:**

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BoFA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BoFA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
