4Q strong beat driven by Outdoor & Fitness – conservative 2024 EPS outlook

Reiterate Rating: NEUTRAL | PO: 120.00 USD | Price: 122.75 USD

4Q2023 Adj EPS of \$1.72 beating BofA and consensus

Garmin (NYSE: GRMN) reported a very strong fourth quarter to end 2023 with Pro-forma EPS of \$1.72 vs. BofAe: \$1.48 and BBG: \$1.38. The beat was primarily driven by strong demand for wearables in Fitness & Outdoor. GRMN provided a conservative outlook for 2024. Management expects full year 2024 revenue of \$5,750mn vs. BofAe: \$5,642 vs. BBG: \$5,555mn and Pro-forma EPS: \$5.40 vs. BofAe: \$5.85 vs. BBG: \$5.58. We reiterate our Neutral rating, as we remain concerned the topline strong growth is at the expense of margins.

Topline growth in all segments except Aviation

Fitness: Revenue increased 22% Y/Y, with 1,062bps margin gains. Growth and margin expansion driven by strong demand for wearables, softer comps, and new product releases in the year (Venu3, Edge 540/840).

Outdoor: Revenue increased 8% Y/Y, with 397bps margin gains. Growth driven by product line expansions in the year: Next-gen Fenix-7 Pro, Epix Pro Series, Approach S70.

Marine: Revenue increased 14% Y/Y, while margins declined 480bps Y/Y. Growth attributed to contributions from JL Audio acquisition.

Auto: Revenue increased 54% Y/Y, with 735bps Y/Y margin improvement. Growth driven by the continued ramp in deliveries for BMW. Garmin announced the segment was awarded a contract with a premium automaker for domain controllers starting in 2027.

Aviation: Revenue declined 4% Y/Y, in addition to 179bps Y/Y margin contraction. Lower margins attributed to OEM sales growth while aftermarket sales declined.

Price objective basis & risk

Garmin (GRMN)

We derive our PO of \$120 using a 1.2x average relative PE multiple applied to 2024 as we think it fairly balances coming growth in OEM Auto & Aviation which could be offset by softer demand in consumer facing products.

Upside risks to our PO are faster-than-expected growth from new products like smart wearables and the development of an innovative category making product. Increased demand for wearables could provide upside to our estimates.

Downside risks to our PO are market saturation in the medium term, after some of GRMN's end markets experienced strong tailwinds in the quarters driven by the pandemic. Industry-wide constraints of certain electrical components could also provide some downside to our estimates if disruptions intensify and supply chains deteriorate. FX and freight headwinds could also continue to weigh on margins.

Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
