# Earnings reset lower but long-term earnings power remains strong; reit Buy

Reiterate Rating: BUY | PO: 126.00 USD | Price: 87.95 USD

## Earnings reset lower, but growth seen in 2025+

Despite a reset of earnings lower due to deteriorating ag fundamentals and crush/refining margins, we reiterate Buy as we expect profitability to remain elevated for the next few years. We expect EPS to grow in 2025 and 2026 vs 2024 despite flat/declining margins in Processing/Merchandising/RSO, driven by organic investments and bolt-on M&A. The acquisition of CJ Selecta, expected to close in mid-2024, could add ~\$0.30/share by our estimates; BG is also bringing online veg-oil refineries in the Netherlands and India, expanding its US crushing capacity at its JV with Chevron, and investing \$500mn in an integrated soybean processing facility in Indiana which should also deliver EPS of at least \$0.30 based on the company's hurdle rate.

## 2024 EPS could have upside with 1Q strong

A key investor concern on the guidance is that this time it was framed as "approximately \$9" vs the usual wording of "at least", which raises the specter of potential downside. Indeed, given limited visibility and poor forward curves, it's tough to make the case for upside just yet. However, we are greatly encouraged by the strong outlook for Q1 where mgmt has by far the greatest visibility. Based on comments during the earnings call, 1Q24 EPS could be in the range of \$2.70 (we are modelling \$2.63) despite severe headwinds in Sugar & Bioenergy. This earnings cadence implies BG is expecting a very sharp deterioration in crush/refining margins in Q2-Q4 that we simply view as too conservative (e.g., RSO margins of ~\$90/t in Q1 dropping to \$60-70/t for the rest of the year). As such our '24 estimate is \$9.50 (down from \$11.20 previously).

## Valuation attractive, no credit for Viterra

We are lowering our PO to \$126 from \$140. Our methodology reflects a standalone BG valuation of \$114 based on the avg of P/E (11.75x on 2024E EPS, up from 11.5x previously due to our expected earnings recovery) and DCF, upwardly revised by 10% to account for our expected "normalized" earnings accretion from the Viterra acquisition. We believe that the shares are attractively valued currently at under 10x P/E on BG's 2024 guide vs an 11.75x long-term average multiple, and don't seem to ascribe any value to the Viterra acquisition. We believe once the "quantifiable" synergies are realized the deal can be ~5% accretive to EPS and ~15% accretive to FCF/share.

## Company Sector

Chemicals-Major

## Company Description

Bunge is a food and agribusiness company with integrated operations across the globe with around \$60 billion in sales. The company serves all levels of food production: producing and selling fertilizer to farmers, buying handling and selling oilseeds and grains, crushing oilseeds to make meal and oil for the livestock and food processing industries, and producing edible oils and related products for foodservice customers and consumers.

## Investment Rationale

We believe BG is entering a period of significant earnings potential that should support high operating results over the next few years. Increased demand for renewable fuels and renewable feedstocks for polymer production should benefit Bunge's processing and merchandising businesses.

## Price objective basis & risk

### Bunge Limited (BG)

Our \$126 price objective is based on our standalone BG valuation of \$127, reflecting the average of our DCF (7.7% WACC, 1.5% terminal growth rate) and P/E (11.75 x 2024E EPS) valuation, upwardly revised by 10% to reflect our expected earnings accretion from the Viterra acquisition. This P/E multiple is in line with BG's historical average.

Downside risks are weaker global crush margins or inconsistent operational execution.

Upside risks are further disruptions in global grain and oilseed supply and strong global crush margins.

**FUNDAMENTAL EQUITY OPINION KEY:** Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster <sup>R2</sup>
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

<sup>R2</sup> Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

**INCOME RATINGS**, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

#### **BoFA ESGMeter Methodology:**

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BoFA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BoFA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
