## Removing PRG & FSLY; Adding PBF, FBP & CAMT to the Endeavor List

Portfolio Strategy

### Removing PRG & FSLY; Adding PBF, FBP & CAMT

We are removing one Financials stock: PROG Holdings (PRG, No Rating, \$32.03) and one Information Technology stock: Fastly (FSLY, C-1-9, \$14.06) after scores deteriorated and no longer meet the criteria for inclusion on the Endeavor List. We are also adding one Energy stock: PBF Inc. (PBF, C-2-7, \$50.62), one Financials stock: First BanCorp Puerto Rico (FBP, B-1-7, \$16.73) and one Information Technology stock: Camtek Ltd. (CAMT, C-1-9, \$75.00) to Endeavor List.

PBF Energy (PBF) is an independent refiner that produces various refined products including gasoline and diesel. PBF owns and operates six refineries across the US. We believe the stock should benefit from favorable margin dynamics.

First BanCorp Puerto Rico (FBP) is a regional bank with operations in Puerto Rico, Virgin Islands and Florida. We believe the stock benefit from revenue growth in an improving macroeconomic backdrop for Puerto Rico.

Camtek Ltd. (CAMT) is a semicap equipment vendor focused on developing high-end inspection and metrology equipment for the semiconductor industry. We like the stock's strong product portfolio and exposure to key growth markets across various segments within semis.

### Small caps edged out Large caps in Feb, but still lag YTD

Small-cap stocks beat out Large-cap stocks by a small margin in February. The Russell 2000 Price-Only index was up 5.52% versus the S&P 500 Price-Only Index up 5.17%. The Endeavor List was higher than both indexes, returning 7.39% in Feb. For the first 2 months of the year, the Endeavor list is outperforming the Russell 2000 Price-Only benchmark by 406 bps (5.43% versus 1.37%).

### Description of Endeavor, the small cap buy list

The Endeavor List is a concentrated list of approximately 15-35 small cap stocks that are most compelling using a multi-disciplinary process. Candidates for the Endeavor buy list carry a favorable view by BofA Global Research fundamental equity research analysts and are attractively ranked by our Aurora (growth) or Enhanced Contrarian (value) quantitative models. See page 3 for more details on Endeavor's buy and sell discipline and descriptions of the Aurora and Enhanced Contrarian mode

## Quantitative model methodology

Our quantitative models are an integral part of the Endeavor selection process. Our two proprietary models (Aurora – growth and Enhanced Contrarian – value) are made up of the same three factors but with different weightings to reflect the style characteristics. The goal of the three factors is to capture the sentiment, momentum, and fundamental characteristics of the stocks in the universe and therefore we selected the most effective factors out of these three categories to quantitatively rank stocks. The three factors are estimate revision (sentiment) as defined by a three-month change in the consensus estimates based on I/B/E/S polling. The price momentum factor is based on a 12-month price change and the valuation rank is a sector-adjusted price-to-cash flow (fundamental) analysis. The scores of both models range from 100 (the best possible score) down to 1 (the weakest score), which is calculated based on the contribution of three factors and ranking the companies against the universe based on their raw score. The quantitative scores are calculated on a monthly basis using the Russell indices to determine universe inclusion.

### Aurora

The Aurora screen is a combined discipline that takes advantage of successful emerging growth traits, but controls for excess variability. The model ranks companies with better future growth opportunities higher than those that do not, thus having a 70% weight in the sentiment and momentum factors. The construction of the model consists of a 40% weighting in estimate revision, 30% emphasis on relative strength, and 30% weight in sector relative price-to-cash flow.

### Enhanced Contrarian

The Enhanced Contrarian screen is a combined discipline that is designed to find stocks with compelling value but removes some of the tendencies of “value traps.” The model looks for companies that are undervalued but are strong fundamentally, which is why it places an emphasis on the fundamental factor. The model places a 70% weighting on Price to Cash Flow, a 15% emphasis on estimate revisions, and the remaining 15% on momentum.

## Buy & sell discipline

**At the time of addition to Endeavor, stocks should satisfy all these conditions:**

- Rank favorably in either Aurora or Enhanced Contrarian models, our quantitative models for emerging growth and value investing, respectively. Model ranks range from 1 to 100, with 100 being most favorable.
- Have a favorable fundamental rating of Buy (1) or Neutral (2).
- Are U.S. listed stocks, excluding ADRs, which are smaller companies in the BofA Global Research coverage universe.

**Stocks are considered for removal under any one of the following conditions:**

- Fundamental, strategic, or tactical reasons at the discretion of the BofA Global Research Portfolios team.
- Comparable stocks become more attractive.
- Ranks in our Aurora or Enhanced Contrarian models deteriorate sharply.
- Fundamental coverage by BofA Global Research is interrupted.
- A stock is downgraded to Neutral from Buy rated.
- The market capitalization of a stock becomes too large for an extended period.

**Stocks are removed under either one of the following conditions:**

- A stock is downgraded to Underperform.
- Fundamental coverage by BofA Global Research is terminated.
- A stock is delisted.

**Performance calculation methodology**

The Endeavor price performance is calculated by S&P Compustat. The price performance of an individual security is its percentage change in price, excluding dividends  $[(\text{End Price} - \text{Begin Price}) / \text{Begin Price}]$ . The price performance of Endeavor is the weighted performance of all holdings where securities are reset to an equal weighting on the last day of every month. Holdings are also reset to an equal weighting on the date of any announced changes in the recommended list. Therefore, if a change in the recommended list is announced during the month, performance is calculated for the periods before and after the change using an equal weighting of individual security price returns for each respective period. The two periods are then combined to arrive at the monthly returns in the following manner:

$$[(1 + \text{PR1}) * (1 + \text{PR2})] - 1$$

Where PR1 is the equal weighted price return of the recommended securities during the period before the announced change and PR2 is the equal weighted price return of the recommended securities during the period after the announced change. Monthly returns are compounded in a similar manner to arrive at the annual returns.

The annualized price return of the Endeavor holdings since inception is calculated using the following formula:

$$[(1 + \text{Price Return Since Inception})^{(12/\# \text{ Months})}] - 1$$

Annualized standard deviation, which is presented as a measure of risk, is equal to the standard deviation of monthly price returns since inception times the square root of 12.

Additions and deletions to each of the portfolios (including those resulting from rebalancing changes) were priced as of the market close on the trading day *following* the date that the change was published in a BofA Global Research report. Transactions costs are not included in the performance results.

The performance results of individuals following Endeavor will differ from the performance contained in this report for a variety of reasons, including differences related to recurring transaction costs and/or investment advisory fees as well as the time and price that the stocks were acquired and disposed of, treatment of dividends, and differences in the weighting of such stocks. Investors should also be aware that in constructing and rebalancing their portfolios, we have assumed the ability to purchase fractional shares, though, in fact, fractional shares of these stocks are not available for purchase. In addition, no assurance can be given about future performance results.

The Russell 2000 Index is used as the small cap benchmark for the Endeavor. The Benchmark is comprised of the 2000 stocks having the smallest market capitalization in the Russell 3000 Index. The Russell 2000 is comprised entirely of U.S. stocks.

The Endeavor differs from the Russell 2000 Index in the following ways: (1) The Endeavor considers smaller companies (micro, small and mid-cap shares) in the BofA Global Research coverage universe. As such, stocks in the Endeavor could be larger or smaller than the benchmark at the time of addition. (2) The Endeavor is more exposed to stock-specific risks than the benchmark. As a result of these differences, the Endeavor may experience higher volatility than the benchmark.

# Disclosures

## Important Disclosures

**FUNDAMENTAL EQUITY OPINION KEY:** Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster <sup>R1</sup>
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

<sup>R1</sup> Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

**INCOME RATINGS**, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities. This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection

therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

#### **BofA ESGMeter Methodology:**

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
