3Q24 beat on SD&A; FY24 financial outlook updated

Maintain Rating: NEUTRAL | PO: 138.00 USD | Price: 125.25 USD

3Q24 adj EPS of \$2.48 above BofAe of \$2.27

This morning, SJM reported 3Q24 adj. EPS of \$2.48, above BofA and Visible Alpha consensus of \$2.27 driven by slightly better organic sales, but more impacted by favorable timing of SD&A/marketing expense push out. SJM also updated its FY24 EPS outlook, raising the low end of its EPS guide to \$9.45-\$9.65 (prior \$9.25-\$9.65). This implies 4Q EPS of ~\$2.27/share at the midpoint which is below our current \$2.44 as ~\$0.10 of marketing related expense shifted from 3Q to 4Q. Investor positioning leaned long into the print and despite the organic sales beat, we think share reaction is muted given lack of flow through to EPS outlook. Maintain Neutral.

Key takeaways: sales & op margin above, GM below

1) Net sales of \$2.23bn were ~\$14mm above our estimate. 2) Organic comparable sales were up +6% YoY driven by +2pts of price and +4pts of vol/mix. Upside to sales was primarily driven by Pet and Coffee sales, offset partially by lower Consumer Foods (Uncrustables retail comps -2%) and International & Foodservice. Hostess sales of \$300 were inline, while EBIT contribution was above expectation. 3) Adjusted gross margins (GM) came in below at 37.2% vs our estimate of 37.6%. 4) Adjusted operating income of \$457.5mm above our estimate by \$31mm on lower SD&A.

FY24 outlook updated: adj EPS range of \$9.45-\$9.65

SJM updated its FY24 outlook which includes: 1) Organic net sales +8.75% (prior +8.5-9%) driven by increased visibility into 4Q. Including a reduction in sales from pet food, Sahale Snacks and Canada condiment divestitures, and a \$650mm contribution to sales from Hostess, reported net sales is expected to decrease (3.6)% YoY (prior (3)-(3.5)%) to \$8.22bn. 4Q comparable net sales expected to grow mid-single digits YoY. By segment: a) Pet co-man revenues to be \$140mm (prior \$145mm) b) Sweet Baked Snacks: ~\$350mm of implied sales in 4Q. 2) 4Q EPS to decline mid-teens YoY on marketing shift. 3) FY24 Gross margin of 37.5% (unchanged). 4) SD&A expenses flat YoY (prior up +1%). 5) Net interest expense of \$270mm (prior \$275mm). 6) Shares outstanding of 104.4mm (unchanged). 7) Tax rate of 24.6% (prior 24.3%). 8) Free cash flow of \$500mm with capex of \$610mm (prior FCF of \$530mm, capex \$610mm).

Maintain Neutral & \$138 PO

We maintain our Neutral rating and \$138 price objective is based on 13x our CY25 EPS estimate. The valuation multiple is at a discount to overall packaged food peer group average but in line with center store packaged food peers which we believe is warranted as SJM executes against its FY24 plans on an underlying basis, offset by execution risk around its Hostess acquisition.

Price objective basis & risk

JM Smucker Company (SJM)

Our \$138 price objective is based on 13x our CY25 EPS estimate. The valuation multiple is at a discount to overall packaged food peer group average but in line with center store packaged food peers which we believe is warranted as SJM executes against its FY24 plans on an underlying basis, offset by execution risk around proposed Hostess acquisition.

Upside risks to our PO: faster than expected sales growth and greater share gains, specifically in Uncrustables, Coffee, and Pet, lower than expected commodity cost inflation, clean balance sheet allowing for capital return (tuck-in M&A or share repurchases).

Downside risks to our PO: weakness in sales growth, slowing pet food category growth, increased elasticity in roast & ground coffee, integration risk from proposed Hostess deal.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
