

Internet/e-Commerce

Let's Chat AI – Post(ings) at the intersection of Internet and AI

Industry Overview

Double issue: January & February Internet AI Roundup

AI capabilities and sentiment has become an important driver for an Internet company stock performance. In our monthly AI Internet roundup, we review major developments at intersection of Consumer Internet & AI, which include: 1) Google facing Gemini concerns, 2) OpenAI developing a Web search product, 3) Meta's AI product roadmap, & 4) Amazon testing AI tool to improve shopping experience.

Gemini ramp takes a step back w/ image generation pause

Google continued the ramp of Gemini in Feb with the launches of Gemini Ultra & image generation features. However, issues with Gemini's people image generation had wide press coverage (now on pause), and early optimism regarding Gemini's potential has turned into concerns on functionality, reliability, & a biased user experience. *Our Take: Disappointing, as Google should be leading consumer adoption of AI (not following), and Gemini setback has rekindled last year's AI stock overhang. We still see strong AI potential at Google, with image generation relaunch, potential for 1Q search beat (major Online media companies guided to 1Q acceleration) and Google I/O as potential catalysts.*

OpenAI developing a web search product

Per reports, OpenAI is developing a web search product. The search service would be partly powered by Bing and could be a new feature for ChatGPT, or a potentially separate app altogether. The new search product is intended be faster than ChatGPT, without losing its summarizing abilities. *Our Take: Bing is already integrating AI into search results, so we will look for more details on improvements with OpenAI search. We continue to see Google's search distribution advantages as a strong competitive moat.*

Meta provides AI roadmap & adds Broadcom CEO to board

On 4Q'23 call, Meta highlighted plans to build: 1) advanced AI products, 2) custom in house AI chips, 3) new category of personal computing devices that allows frictionless interaction with AIs, & 4) open-source products to drive Meta ecosystem adoption. In Feb, Meta also added Broadcom CEO to its board, which should help with hardware development. *Our Take: We believe Meta's growing AI focus could lead to positive product surprises and advertising revenue upside (ad creative, targeting and measurement). Meta remains the top AI play in large-cap Internet (Amazon #2 for AWS).*

Amazon launches Rufus to improve shopping experience

Amazon is testing an AI tool (Rufus) that answers shopper questions by collecting information from product reviews & metadata. Rufus can help users shop by product category, find the best recommendation, and answer questions about specific products.

What's coming – potential AI catalysts

1) Amazon & Meta are developing new LLMs expected to be more powerful than ChatGPT-4, 2) Pinterest is developing an automated AI/ML driven ad-tech solution (similar to Advantage+ & PMax), 3) OpenAI is building a new web search product, 4) Airbnb is building a new AI interface, and 5) EU developing new LLM regulations.

BofA Securities does and seeks to do business with issuers covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Refer to important disclosures on page 10 to 12. Analyst Certification on page 8. Price Objective Basis/Risk on page 7.

Online Media

Google Gemini rollout continues

Google renamed its AI assistant from Bard to Gemini and introduced a premium LLM version called Gemini Advanced. Gemini Advanced excels in understanding and reasoning across modalities like text, images, audio, video, and code and outperformed human experts on the MMLU benchmark, showcasing impressive knowledge and problem-solving abilities. Gemini Advanced is available through a \$20/month Google One tier, including 2TB storage and access to Gemini (Bard rebranded) in Google Workspace apps.

Google pauses Gemini image generation

Also in early Feb, Alphabet launched a new image generation feature for the Gemini conversational app (formerly known as Bard), which included the ability to create images of people. Image generation led to significant negative press on inaccurate images, and in a blogpost, Google acknowledged that some of the images generated were inaccurate and even offensive. In late Feb, Google decided to pause Gemini's image generation of people to improve the accuracy of its responses. ***Our Take: Disappointing outcome as Google should be leading consumer adoption of AI (not following), and Gemini setback has rekindled last year's AI overhang on the stock. While we expect ongoing concerns on Google's execution and bias with image generation, we still think: 1) AI as very early and all LLMs are facing accuracy and hallucination challenges, 2) Google has best combination of assets and developers to lead consumer adoption of AI, and 3) Google has a strong track record of balancing conservative and liberal views in query results and will be able to navigate AI bias concerns. We see image generation relaunch, potential for 1Q search beat (major Online media companies guided to 1Q acceleration, but no acceleration expected in Street 1Q search estimates) and Google I/O as potential catalysts to reduce the AI overhang. Despite issues with image generation, Google has made significant progress with AI that we outline below.***

Google expands access to Gemini models for Cloud Vertex AI customers

In Feb, Google expanded access to its Gemini models to customers with new updates and expanded availability. The company noted Gemini 1.0 Pro was generally available to all Vertex AI customers and Gemini 1.0 Ultra, a more sophisticated and capable model for complex tasks was generally available on Vertex AI for customers via allowlist. The company also introduced a new generation of Gemini models (Gemini 1.5), which deliver improved performance on a more efficient architecture. Google also highlighted that customers like Samsung and Palo Alto Networks have been building sophisticated AI agents with Gemini models in Vertex AI.

Google launches a new family of open LLMs, Gemma

Google launched a new family of lightweight open LLMs, Gemma, which is built from the technology that powers Gemini models. To help developers to better leverage the new models, Google provides support including a Generative AI Toolkit, and optimization across multiple AI hardware platforms. The pre-trained and instruction tuned Gemma models can run on laptops, workstations, or Google Cloud with deployment on Vertex AI, and Google Kubernetes Engine (GKE).

Gemini powers Google Assistant

Google will give users access to Gemini powered Google Assistant through the new Gemini app for Android devices and Google app on iOS, though Google Assistant devices including Nest and Home speakers won't be updated with Gemini for now. The Gemini powered Google Assistant can accept commands in text, images and videos, and carry out generative tasks like answering questions regarding the articles that users are reading.

Google integrates Gen AI to Google Map

With the new Gen AI integration, users can better discover places on Google Map. The LLMs integrated with Google Map will analyze detailed information about more than 250mn places and insights from 300mn contributors to recommend where the users can go to. For example, users can send the prompt “activities for rainy day”, and Google Map will show relevant places on map.

Google’s Circle to search (AI)

In Jan, Google released the ‘Circle to Search’ feature where users can circle, highlight, scribe, or tap the element they are interested in, and Google will show related search results. The users could ask follow-up questions on the selected elements through the ‘Multisearch’ feature. Circle to Search feature will be available on the Pixel 8, Pixel 8 Pro, and the Samsung Galaxy S24 series soon.

Meta CEO shares more on AI goals for the company

On 4Q’23 earnings call, Meta’s CEO highlighted plans to build: 1) advanced AI products and services for users, creators, and businesses, 2) custom in house developed AI chips, 3) new category of personal computing devices that allows frictionlessly interactions with AIs, and 4) focus on building general intelligence & open-source products to drive Meta ecosystem adoption. *Our Take: We believe Meta’s growing AI focus could lead to positive product surprises in coming quarters & drive multiple expansion if the company can evolve into a content and business services platform (such as for content creation, branding and marketing, customer service via messaging. Meta remains the top AI play in large-cap Internet (Amazon #2 for AWS).*

Meta adds Broadcom CEO to Board

In February, Meta added Broadcom CEO, Hock Tan to its board of directors. Meta CEO said, “As we focus on building AGI (Artificial general intelligence), having directors with deep expertise in silicon and energy infrastructure will help us execute our long-term vision.” Broadcom is one of the Meta’s key partners for both chips and data center designs and per press reports, Meta had spent \$500mn on components and design services from Broadcom in 2023. *Our Take: As race to develop leading Gen-AI capabilities intensifies & given industry-wide AI chips shortage/inflation, we think having Board expertise from a key chipmaker could be a good fit for Meta’s long-term AI goals.*

Meta training Llama 3 & plans to increase investments in hardware

In January, CEO Mark Zuckerberg provided an overview of his AI plans for Meta in a post on Threads. He highlighted that Meta will be increasing its investment in hardware, which will include building a massive tech stack, arguably larger than any other individual company. Meta is also training a more advanced LLM, Llama 3 that will have code-generating capabilities. He said, “With Llama 3 and beyond, our ambition is to build things that are at the state of the art and eventually the leading models in the industry.” He highlighted that the next stage of AI development for Meta would involve increased creative capacity through AI interaction, including, potentially, the ability to create whole new VR environments, by simply speaking to them into existence. He mentioned that he sees a future in which virtual worlds are generated by AI and filled with AI characters that accompany real people. He also suggested a new platform is coming this year to let anyone create their own AI characters and distribute them across Meta’s social apps.

Alphabet restructures to sharpen focus on AI

In January, Alphabet eliminated hundreds of positions from its core engineering division, Google Assistant (voice-operated virtual assistant), and hardware division that makes Pixel phone, Fitbit watches and Nest thermostat. Most of the employees affected in the hardware team included those working on augmented reality projects. In the statement, Alphabet said “We’re responsibly investing in our company’s biggest priorities and the significant opportunities ahead.” Alphabet is also reorganizing its ad sales unit (~30,000 employees) as a result of company’s recent advances in AI and strong advertiser

adoption of automated tools such PMax. Many of the jobs in the ad sales unit could become redundant because of new AI/ML tools that can automatically suggest & create new ads.

Samsung's Galaxy S24 will feature Google Gemini-powered AI features

Google and Samsung announced that a family of Gemini powered AI features will be available on new Galaxy S24 smart phones. Gemini Pro will power the features including Samsung's Notes, Voice Recorder, and Keyboard apps. Meanwhile, Gemini Nano will power the new 'Magic Compose' feature in Google Messages, which could craft messages in different styles without connecting to the internet. Google's Imagen 2 model, which can do text to image tasks, will be integrated to Galaxy S24 as well. The Imagen 2 Model will enable the photo editing feature in Galaxy S24 Gallery App, which includes the Generative Edit feature that automatically fill in parts of images based on surrounding contexts.

Android Auto adds new AI-powered features

Google released several new AI-powered features for Android Auto (the app can mirror features of an Android device on car's dashboard info and entertainment head unit). Android Auto can automatically summarize texts and group chats while the user is driving, and the App will suggest relevant replies and actions.

TikTok testing new AI Song feature

TikTok is testing a new "AI Song" feature, leveraging Gen-AI can create songs based on text prompts. The new feature is currently only available to a select number of users. TikTok's AI model will generate lyrics related to entered prompts and pair it with music.

eCommerce

Amazon's new tool, Rufus, responds to shopper queries

Amazon is testing an AI tool named Rufus that answers shopper questions by collecting information from product reviews and metadata. Rufus can help users shop by product category or occasion, find the best recommendations, and answer questions about specific products. Rufus is currently in beta testing before being rolled out to additional US customers "in the coming weeks". *Our Take: A shopping assistant makes sense for Amazon, and Rufus is a natural extension to Amazon's initiative from June 2023 where the eCommerce platform began showing AI-generated summaries for product reviews.*

Amazon uses AI find customers' right fit for clothing

On Jan 8th, Amazon introduced Fit Insights, an AI tool that aggregates user reviews on fashion listings to help customers understand fit. Coresight Research indicates the average return rate for Online clothes is 24% (8pts more than the overall Online return rate) with TechCrunch indicating fit is the primary reason for return. Fit Insights will also provide feedback to sellers so brands can better understand customer fit issues, improve how they communicate sizing to customers, and incorporate feedback into future designs and manufacturing. *Our take: Reducing returns with Fit Insights could be an incremental driver for continued retail margin expansion, with MWPVL calling out return logistics as a key area for efficiency improvement (see [takeaways from our MWPVL call](#)).*

Amazon joins AI Safety Institute

In February, Amazon joined a consortium under the National Institute of Standards and Technology focused on AI safety that includes members like OpenAI, Anthropic, and Meta. The consortium's goal is to provide a hub for parties to work together in "building and maturing a measurement science for trustworthy and responsible AI".

Etsy helps shoppers find personalized gifts

Etsy launched Gift Mode on Jan 24th, an AI-powered tool that crafts gift guides based on 200+ consumer personas determined by the occasion and recipient's interests. Gift Mode, which leverages a combination of machine learning, human curation, and OpenAI's ChatGPT-4, is designed to eliminate stress around gifting, with an Etsy survey indicating that 71% of respondents feel anxious while shopping for gifts. *Our take: according to a survey by INVIQA, 85% of respondents indicated suitability is the biggest factor that determines gift purchasing. While the launch missed the '23 holiday season, an AI tool may drive improved conversion for smaller gifting events this year (Valentine's Day, Mother/Father's Day, birthdays, etc.) and Gift Mode could drive incremental GMS on the platform in '24, which we project to grow only 1% y/y in 2024 (2pt accel).*

eBay doubling GPU capacity to support AI services.

Management anticipates more buyer and seller services will be powered by internal LLMs given AI's ability to "significantly impact conversion on eBay". Services thus far include Generative AI descriptions (which have rolled out to users in eBay's top-5 markets), AI-enabled recommendations, and image recognition/editor. As part of eBay's 2024 capex outlook, management plans to double the company's GPU capacity by the end of 1Q to support the ramp in AI investments.

Wayfair ports Decorify to Apple's Vision Pro

Wayfair will port Decorify, a virtual room styler that leverages Generative AI to reimagine living spaces, to Apple Vision Pro. Users can provide input variables like styles & price and find Wayfair products to put their spaces, which can then be purchased in-app. *Our take: Decorify is an extension of Wayfair's interactive interior design products including Room Planner and Wayfair Spaces. In our view, continued development of interior design products suggest sufficient usage and, longer-term, increasing use of AR/VR for design planning could reduce return rates.*

Online Travel

Airbnb working on developing personalized AI interface

On the 4Q earnings call (02/13) Airbnb highlighted accelerated efforts to build a personalized AI/Gen-AI based interface on the Airbnb platform. In November, Airbnb acquired GamePlanner.AI, an AI company led by the co-founder and original developer of Siri.

Priceline Debuts New AI-Powered Trip Intelligence Features

Priceline unveiled its Winter 2024 Product Release (02/13) featuring a new generative AI-powered slate of features, including major upgrades to Penny, its AI-powered travel assistant. The latest additions to Priceline's Trip Intelligence suite include more than 30 new features to streamline the travel planning and booking process. New AI features include: GenAI-powered travel assistant that suggest relevant properties and travel packages and GenAI Itineraries that help app users craft in-depth itineraries for their entire trip. Other features include Priceline wallet (one-stop portfolio feature enabling Priceline customers to save coupons, monitor expiration dates, and track airline credits in a single location), Price Watch (users can track desired flight itineraries and receive prompt notifications when prices change), and major design improvements implemented across all platforms, including overhauls for iPad and Android.

Other

OpenAI building its own search engine

According to press reports, OpenAI is developing a web search product that would bring the company into more direct competition with Google. The search service would be partly powered by Bing and could be a new feature for ChatGPT, or a potentially

separate app. The new search product is intended be faster than ChatGPT, without losing its summarizing abilities. *Our Take: Bing is already integrating AI into search results, so we will look for more details on incremental capabilities for OpenAI search. We continue to see Google's search distribution advantages as a strong competitive moat.*

OpenAI introduces text to video model, Sora

OpenAI launched a new text-to-video model Sora, which can generate videos up to a minute long while maintaining visual quality and adherence to users' prompt. According to the company, Sora can generate complex scenes with multiple characters, specific types of motion, and accurate details of subject and background. The model also understands how things in prompts exist in the physical world. However, OpenAI notes that Sora could struggle with accurately simulating the physics of a complex scene. Sora is currently available for red teamers for assessing risks, and Open AI also granted access to Sora to a number of creative professionals.

Microsoft Copilot launched a Pro plan

Microsoft Copilot launched a new Pro plan, priced at \$20 user per month. The paid tier plan includes 1) priority access to GPT-4 and GPT-4 Turbo including peak times for accelerated performance, 2) access to Copilot in select Microsoft 365 apps to draft documents, summarize emails, and create presentations, etc., 3) Create, edit, and resize AI images faster with Designer (former Bing Image Creator). This plan is priced below the \$30/month full Copilot enterprise solution.

Microsoft Copilot App available on Android, IOS, and IpadOS

Microsoft released Copilot App on Android, IOS and IpadOS devices. The Copilot app can answer users' questions by leveraging gen AI models. Meanwhile, users can use the AI tool to draft emails, compose stories, summarize texts, etc. OpenAI's Dall-E-3 AI model will power Copilot's Image Creator feature, where users can implement tasks including developing brand motifs and generating logo designs. There are different versions of the Microsoft Copilot app, each with different features and pricing. The base version of Microsoft Copilot is free to use, but it has some limitations such as a maximum of five queries per day and no access to AI image generation. The more advanced Copilot Pro is \$20 per person, per month on top of an individual or family Microsoft 365 subscription. It offers priority model access, faster image creation, and Copilot in select Microsoft 365 apps. For businesses, there is Copilot for Microsoft 365, which is generally a \$30/month add-on for each user. It includes Copilot in Microsoft Teams and other business-specific features.

Microsoft partnership with Mistral

In late Feb, Microsoft announced a multiyear partnership with French startup, Mistral AI. As part of the deal, Microsoft will take a minority stake in the startup and make Mistral's LLM models available through its Azure cloud computing platform. Mistral AI's flagship commercial model, Mistral Large, will be available on Azure AI platform. Mistral Large is a general-purpose LLM that is proficient in code and mathematics, able to process dozens of documents in a single call, and handles French, German, Spanish, and Italian (in addition to English). Addition of Mistral AI's premium models into Azure's Models as a Service (MaaS) within Azure AI Studio and Azure Machine Learning provides Microsoft customers with a greater selection of open-source LLM models for developing custom AI applications.

EU states formally approve final text of new AI Act

In Feb, representatives from the European Union member states formally approved the final text of the EU Artificial Intelligence Act, which will be subject to final legislative approval in the coming months. The AI Act is the first set of comprehensive laws to regulate the use of artificial intelligence globally. The proposed legislation will apply new rules for AI "foundation models," subjecting providers of such models to new duties, distinct from the obligations applicable to all AI systems. Enforcement of the Act will likely be complex and disaggregated across various authorities in Europe.

FTC launches investigation into AI partnerships

In late Jan, the Federal Trade Commission launched an inquiry on Microsoft, Google and Amazon about their investments in OpenAI and Anthropic, respectively. Per the WSJ, the FTC's inquiry would allow regulators to gain a deeper understanding of the market, business practices, and competitive impacts, which may inform future actions.

BofA GLOBAL RESEARCH

Price objective basis & risk

Alphabet (GOOGL / GOOG)

Our price objective of \$173/\$173 is based on 21x 2025E core Google GAAP EPS plus cash. Alphabet has traded at an average multiple of 22x GAAP P/E over the last ten years and we think our multiple is reasonable vs history given expectations for double-digit revenue growth, Cloud margin expansion, and opportunity to capitalize on strong AI assets.

Risks for the stock are 1) loss of search traffic to AI tools from competitors, 2) LLM integration in search may take longer than expected or negatively impact search revenues, 3) revenue pressure from compliance with the EU Digital Markets Act (DMA), 4) adverse judge ruling on the ongoing Department of Justice (DOJ) search distribution trial, 5) potential for increasing Capex and lower FCF-given AI focus.

Amazon.com (AMZN)

Our PO of \$204 is based on our SOTP analysis that values the 1P retail business at 1.1x 2025E Revenue (including subscription/Prime membership fees), 3P retail business at 2.6x 2025E Revenue, AWS at 8.0x 2025 Sales, and the advertising business at 5.0x 2025 Sales. For 2025E, our 8.0x AWS multiple is relatively below our SaaS comps at 8.9x, our 1.1x GMV multiple is a slight discount to our retail comps at 1.2x, and our 5.0x advertising multiple is a slight discount to our digital advertising comps at 5.2x. We think some conglomerate discount is warranted with elevated regulatory/antitrust risk, but long-term we believe that in-line to discount multiples are warranted given growth rates in-excess of peers.

Our PO of \$204 for Amazon implies 3.0x P/Sales, a multiple toward the high end of Amazon's historical range of 1.0-3.5x. With improving margins long-term, we expect the revenue multiple should trend upward over time.

Downside risks to our price objective are increasing competition from offline and local retailers, AWS client cost optimization impact on revenues and margins, and regulatory pressure on the 3P marketplace. The stock has been subject to heavy volatility in the past, based on margin trends, and this volatility could increase due to economic uncertainty.

Etsy, Inc. (ETSY)

Our \$82 price objective is based on 12x 2025E EV/EBITDA. This is a discount to Etsy's 5-year average of 25x (ranging from 11x to 50x). We believe a discount is warranted

given lower gross merchandise sales and total revenue growth relative to Etsy's historic average and less potential upside for EBITDA margins. We believe that Etsy should trade at a slight discount to overall eCommerce and marketplaces due to lower revenue growth, offset partially by higher margins and competitive barriers.

Upside risks to our PO are higher-than-expected order frequency and average order value due to improvements in search functionality, greater than expected shares gains across underpenetrated customer demographics, regions, and products and increase take rates from new services and higher fees.

Downside risks to our PO are that weakness in discretionary spending or a recession would likely have an outsized impact on the discretionary products sold on Etsy's marketplaces, continued pressure on GMS growth from lapping tough-COVID related comparisons over the next several quarters and softer-than-anticipated performance from non-Etsy marketplaces.

Meta Platforms Inc (META)

Our \$510 price objective is based on 21x 2025E GAAP EPS, plus net cash. On a total company basis, including Metaverse investments, our valuation is largely in line with S&P 500 (over the past five years Meta has had a 2pt average premium to S&P). We think accelerating revenue growth and conservative expense management can lead to 3-year EPS growth above the S&P 500.

Downside risks are decline in user activity from competition, privacy or data issues impact revenue generation, potential for Street to assign a negative value to Metaverse (Reality Labs) given significant investments, and new regulations that impact monetization.

Wayfair (W)

Our PO of \$75 is based on 0.8x 2025E EV/sales, which is below the historical average multiple of approx. 1x. We believe this is warranted given a significant improvement in EBITDA and a return to revenue YoY growth, though below prior periods of expansion. If Wayfair were to achieve its target of mid-single digit EBITDA margins over the next few years, this would likely drive additional multiple expansion in our view.

Upside risks are 1) a larger-than-expected acceleration in sales post tough COVID compares in 2022, 2) better inventory availability as supply chain disruptions eases, 3) higher-than-forecast online growth for the industry as a whole, 4) stronger growth from newer initiatives including Wayfair Professional and, 5) EBITDA margin upside from COGS efficiencies, OPEX reductions and fixed cost leverage.

Downside risks are 1) High industry competition which could drive higher than expected investment in marketing or promotions, 2) brand complexity (five brands), 3) weaker than expected international segment performance, and 4) A softer than anticipated recovery in US furnishings in 2024/25.

For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the [Price Charts website](#), or call 1-800-MERRILL to have them mailed.

BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: Alphabet A, Alphabet C, Amazon.com, Etsy Inc., Meta Platforms, Wayfair.

BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Meta Platforms.

The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Alphabet, Amazon.com, Etsy Inc, Meta Platforms, Wayfair.

BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Alphabet, Amazon.com, Meta Platforms, Wayfair.

The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Alphabet, Amazon.com, Etsy Inc, Meta Platforms, Wayfair.

BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Alphabet, Amazon.com, Meta Platforms.

BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Alphabet, Amazon.com, Etsy Inc, Meta Platforms, Wayfair.

BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: Alphabet, Etsy Inc, Wayfair.

BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Alphabet A, Alphabet C, Amazon.com, Etsy, Inc., Meta Platforms, Wayfair.

The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Alphabet, Amazon.com, Etsy Inc, Meta Platforms, Wayfair.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

Refer to [BofA Global Research policies relating to conflicts of interest](#).

"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS or any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
