

US Physical Therapy

Takes from call: bullish tone on fundamentals

Reiterate Rating: BUY | PO: 115.00 USD | Price: 105.00 USD

Vols, pricing, cost control to help offset Medicare rate cut

USPH delivered a strong Q4 and guided to 2024 EBITDA only slightly lower than consensus despite another year of Medicare rate cuts. Given it expects to close deals near term, the company decided to include those deals in the guide, noting those are not a major contributor and that it expects additional transactions beyond those included in the guide. Volume growth, improving pricing, and cost control are bigger offsets to the rate headwind. We raise our PO to \$115 on a higher multiple (15.8x 2024E EBITDAR vs 14.7x prior) given the strong execution and potential upside to our estimates from additional deals, and reiterate Buy.

Gross margins to be flat, up slightly

Expects to be able to maintain gross margins or grow slightly y/y as volumes at existing clinics expected to grow 3-5% and deals will also aid in the operating leverage. Corporate office costs to stay in the historical 8.5-9% range. Clinical turnover was the lowest, better than 2022 which helps costs. Expects group purchasing benefits.

Most of deals are physical therapy

USPH has \$120m excess cash above working capital needs and \$175m revolver. Expects to announce deal closings soon. The guide includes deals expected to close between now and July; noting there could be more deals later in the year. Expects typical deals (mostly physical therapy) that contribute \$1-3m EBITDA per deal; typical 60-80% ownership.

Volumes came in better, expects +3-5% same store

Every month was better than prior year despite a calendar impact in late Dec (holidays fell on Mon-Tue, limiting visits). Q1 has tough comps: same store vols were up 6% y/y and total visits +15% in 1Q23, and January 2024 was impacted by severe cold weather in some markets (usually those visits are delayed). Expects same store volumes to grow 3-5% for the full year.

Non-Medicare rates accelerated; help offset Medicare

Average rev/ visits improved 1.3% q/q. Pricing is benefiting from the cumulative effect of rate increases in commercial and workers' comp, as well as exits of low-rate Medicare Advantage contracts. Workers' comp mix was up 30bps to 9.5% in 4Q23; continue to get rate increases on Workers comp as well. Non-Medicare rates were up 2.1% y/y in 4Q23, accelerating from +1% y/y in 3Q23, and were +1.5% for the full year. USPH still sees some more work to do on improving commercial rates. Assuming non-Medicare rates growing +1.5-2% and Medicare cut of -3.5%, the avg rate for the year would be flat y/y. Expects to return to normal small rate increases in Medicare in 2025+, after three consecutive years of rate cuts.

Price objective basis & risk

US Physical Therapy (USPH)

Our PO of \$115 is based on 15.8x 2024E Adj EV/EBITDAR, a premium to USPH's historical average multiple of 11x given the much lower leverage and the significant deal upside potential. It is a premium to the 5-year avg of 15x given the strong execution, potential upside from future deals.

Downside risks to our PO are: volumes growing slower than expected, labor disruption, Medicare rate pressure, a recession impacting growth, and execution risk on deals.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).
