

Hayward Holdings, Inc.

2024 outlook in-line with consensus; Destocking is over, but end market still

Reiterate Rating: UNDERPERFORM | PO: 14.00 USD | Price: 14.79 USD

4Q23 beats Street, 2024 adj. EBITDA guidance in-line

Hayward Holdings (HAYW) reported 4Q23 adjusted EPS in-line with our estimates and above consensus. 2024 adj. EBITDA guidance of \$255M to \$275M was in line with consensus at the mid-point. We lower our 2024/2025 adj. EBITDA estimates by 3%/5% to reflect the weak revenue environment. We raise our PO to \$14 (from \$12), now based on 13x our 2025E EV/EBITDA (vs. previous 11x) due to higher industry multiples and better incremental margin outlook. Following a challenging 2023, earnings return to growth in 2024 driven by gross margin expansion and end of channel destocking. HAYW shares increased 13% today (short interest was ~20 days to cover). We reiterate our Underperform rating given weak end market trends due to a challenging macro backdrop for pools. Valuation also looks un compelling at 14x 2025 EV/EBITDA and 22x 2025 P/E.

Revenue outlook looks prudent, but headwinds remain

Management initiated 2024 top line guidance of \$1.010B to \$1.060B (up 2% to 7% YoY), which looks reasonable despite industry headwinds. Guidance assumes 2% price, a 6-7% decrease in global sell-out volumes, 1% FX headwind, and a \$100mm YoY benefit from lapping the 2023 channel destock. Channel inventory levels have returned to historical levels, but management expects channel partners to remain cautious and continue to operate with lower levels of inventory. We model sales at the low end of guidance, given the continued macro headwinds impacting end market demand, particularly for discretionary products.

EBITDA margin to improve in 2024 driven by GM

Gross margin (GM) reached an all-time high of 49.2% in 4Q24 (+690 bps YoY) driven by cost control and productivity improvements. Management expects GM to continue to expand in 2024 (+150 bps YoY), as volume recovers and price-cost remains neutral. We expect SG&A to increase slightly as a % of revenue YoY (including R&D costs) in 2024. Overall, we are forecasting 2024 adj. EBITDA margin of 25.5% (+60 bps YoY) compared to 25.6% at the midpoint of guidance. Beyond 2024, we expect incremental margin in the high 30-% range.

4Q EPS in line, EBITDA miss; Reiterate Underperform

HAYW reported 4Q23 adjusted EPS of \$0.20 (up from \$0.11 last year), in line with our forecast, while adj. EBITDA missed on higher SG&A. Revenue increased 8% YoY to \$278M with North America revenue up 10%, but Europe and Rest of World down (4%).

Company Description

Hayward Holdings, Inc. is a leading global manufacturer of residential and commercial pool equipment, automation and accessories. Approximately 79% of HAYW's revenue is attributable to the aftermarket and 21% to new pool construction. The company is headquartered in Berkeley Heights, NJ and became publicly listed on the New York Stock Exchange under the ticker HAYW in March 2021.

Investment Rationale

We rate HAYW shares at Underperform. Hayward is well positioned to benefit from growing new pool construction, share gains and higher pricing. However, we expect volume growth to moderate through 2022/2023 due to: 2020 and 2021 likely benefited from pent-up demand and pull-forward in some pool supplies sales, de-stocking from distributors, and weaker demand from Europe and RoW due to the war in Ukraine (exiting some businesses in this area) and higher energy prices.

Price objective basis & risk

Hayward Holdings, Inc. (HAYW)

Our \$14 PO for HAYW shares is based on a 2025e adjusted EV/EBITDA multiple of roughly 13x. In determining the adjusted EV/EBITDA multiple underlying our PO on HAYW shares, we considered current valuation multiples for pool equipment manufacturing competitors and other pool and outdoor living related companies. We believe Hayward should trade at a slight premium to pool peers given its share gain trends in the pool segment.

Upside risks are: 1) a faster than anticipated rebound in pool demand, 2) market share gains, 3) favorable demographics, 4) a more favorable economic backdrop with lower interest rates, and 5) continued elevated price increases.

Downside risks are: 1) higher financial leverage than many building product peers, 2) real/perceived COVID-beneficiaries could lag as economy re-opens, 3) international expansion could negatively impact margins and valuation multiple, 4) effectiveness of Omni app to drive sales remains unclear, 5) rising interest rates could make financing pools more expensive.

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BoFA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BoFA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BoFA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BoFA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
