# 4Q23 preview: orders, AI, and capacity in focus

Reiterate Rating: BUY | PO: 72.00 USD | Price: 61.32 USD

## 4Q23 preview: raising 4Q23E & 2024E adj. EPS

Management raised 4Q23 guidance in conjunction with the Nov. 2023 Investor Day, and we expect results at the upper end of guidance. We think investors will focus on 1) orders, 2) artificial intelligence (AI) demand, and 3) capacity. We raise our 4Q23E adj. EPS by \$0.04 to \$0.55, at the high-end of \$0.51-0.55 guidance. We raise our 2024E adj. EPS by \$0.09 to \$2.34, +32% y/y. This reflects 11.4% y/y organic revenue growth and 270bp of y/y margin expansion to 17.8% (above guidance of 16.5-16.9%). We raise our price objective by \$12 to \$72, based on a 16x EV/EBITDA of our 2025E estimates (previously 14x). Our target multiple is in line with the 16x peer average on 2024E, which we argue is warranted given faster earnings growth but lower margins versus peers. Reiterate Buy.

## Orders: acceleration to 20+% y/y in 4Q

We forecast 23% y/y orders growth in 4Q23 and 14% y/y growth in 2024. This implies backlog rises from \$5.0bn in 3Q23 to \$5.1bn at 4Q23 and \$5.4bn by 4Q24. Peer Eaton's data center segment saw revenue up 20% y/y in 4Q, full-year 2023 orders up 30% y/y, and the negotiation pipeline rise 160% y/y.

## AI: more signs of the demand wave

At the Nov 2023 Investor Day, AI orders were sized at ~\$100mn (narrow product definition) to ~\$250mn (including related product orders). This represents 2-4% of Vertiv's trailing orders. This compares to "tens of millions" in AI product-specific orders in 3Q. Commentary from hyperscalers and Meta suggest accelerating demand in 2024. While we appreciate Vertiv's difficulty in calculating AI-related orders, we think investors want regular updates to track the AI-specific demand.

## Capacity: adding fast enough to avoid bottlenecks

Vertiv has announced plans to double its production capacity for electrical switchgear and busway over 2023-25. We view Americas electrical investment as particularly critical. Given differences in electrical standards (e.g., Americas 60 Hz / EMEA 50 Hz), capacity is not fungible between regions. The E&I acquisition (closed Nov 2021) came with a South Carolina facility. Vertiv's Monterrey facility (opened 1Q23) added thermal capacity in the Americas and these products can be shipped between regions.

## Company Sector

Industrials/Multi-Industry

## Company Description

Vertiv is an electrical product manufacturer focused on data centers (70% of revenue) and telecom (20%) end markets. In 2022, Vertiv generated \$5.7bn in revenue. Key product offerings include power & thermal management, IT management, and related services.

## Investment Rationale

We view Vertiv as benefitting near-term from a margin recovery, and improving FCF generation. Artificial intelligence adoption within data centers adds incremental demand for Vertiv's thermal management products. Pricing benefits from capacity constraints for data center infrastructure products.

## Raising our 2024E adj. EPS to \$2.34

We have raised our 4Q23E estimates to reflect faster Americas growth. Given the Americas region has above-average margins, this results in a 50bp higher adjusted EBITA margin. Our adjusted EPS is \$0.04 higher at \$0.55.

For 2024E, we forecast 11.4% y/y organic revenue growth versus 8-10% preliminary guidance given at the November analyst day. We forecast 17.8% adjusted EBITA margin, implying ~40% incrementals. This compares to ~50% incremental margin in 2023E. Our adjusted EPS is \$0.09 higher at \$2.34.

## Orders: acceleration to 20+% y/y in 4Q

Vertiv's orders grew 11% y/y on an organic basis in 3Q23. We forecast an acceleration to 23% y/y growth in 4Q. We note that the year ago "comps" get 30pts easier in 1Q24, providing an easier path to continued acceleration in 1H24.

## AI: more signs of the demand wave

- Eaton (ETN) reported data center revenues up 20% y/y in 4Q23. Full-year data center orders rose 30% y/y and its negotiation pipeline was up 160% y/y in 4Q23. CEO Craig Arnold said on the conference call, "We continue to see just an acceleration in the data center market in terms of the rate of growth." Eaton management expects its data center market to grow at a 16% CAGR over the next five years.
- Microsoft (MSFT; covered by Brad Sills) reported that AI-demand drove 6pts of growth in its Azure and other cloud services revenue, which grew 28% y/y in constant currency in total. This compares to 3pts of AI-demand last quarter. Already, Microsoft has signed up ~53,000 Azure AI customers. CFO Amy Hood said on the

call, “Looking forward you’ll tend to see accelerated capital expense to continue to be able to add capacity in the coming quarters given what we see in terms of the pipeline.”

- Super Micro (SMCI; not covered) reported December quarter revenue grew 103% y/y and 73% sequentially. Super Micro builds pre-configured server & storage systems for use in data centers and other applications. SMCI’s offerings are “inside the rack” while Vertiv’s are “outside the rack” – e.g., complementary versus competitive. Management is preparing to double its AI portfolio as other chip makers come out with AI-focused chips.
- Meta Platforms (META; covered by Justin Post) is targeting to have 350,000 NVIDIA H100 chips up and running by year-end 2024. This suggests 245 megawatts of electricity consumption (under peak loads). This compares to total US data center capacity additions in the ~1,000-2,000 megawatt range. This implies that Meta’s AI additions alone would drive 10-20 **percentage points** in market-wide US demand for electrical & thermal equipment (e.g., implied ~20-30% growth relative to ~10% growth). In comparison, we forecast Vertiv to have 19% y/y revenue growth in the Americas region in 2024.

## Valuation

We base our \$72 price objective on a 16x EV/EBITDA of our 2025E estimates. Our target multiple is in line with the 16x peer average on 2024E, which we argue is warranted given faster earnings growth but lower margins versus peers.

## Price objective basis & risk

### Vertiv (VRT)

We base our \$72 price objective on an 16x EV/EBITDA of our 2025 estimates. Our target multiple is in line with the 16x peer average on 2024E. We argue an in line multiple is warranted given above-peers earnings growth offset by below-peer margins.

Downside risks to our price objective are 1) declines in company-owned data centers, 2) inability to execute on cost savings plans, 3) pricing deterioration due to competition, and 4) disruptions due to supply chain or manufacturing execution.

VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster <sup>R2</sup>
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

<sup>R2</sup> Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

#### **BofA ESGMeter Methodology:**

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
