

Synopsis

Leading AI/chip complexity beneficiary, growth well on track

Reiterate Rating: BUY | PO: 650.00 USD | Price: 543.57 USD

Core EDA story continues, Reit. Buy and top pick

FQ1/FQ2 sales in-line, with pf-EPS 4%/5% ahead on higher mix of margin accretive IP. Overall, Synopsys (SNPS) remains a key beneficiary of rising semis complexity and increased chip design activities. While Design IP is lumpy and is expected to moderate into F2H (following strong FQ1 up +53% YoY), core EDA business should comfortably grow double-digits YoY in FY24E on continued new wins for leading-edge, analog mixed signal, and multi-die package designs. Hardware should also remain strong on increasing inventories (up +18% QoQ to \$383mn). Backlog declined modestly in the quarter to \$8.2bn (from \$8.6bn in FQ4) but remains at a very healthy level (up +19% YoY), and mgmt is confident in reaching its FY24 sales guide of \$6.6bn (+13% YoY). Importantly, we expect SNPS sales to continue growing double-digit through FY26E even following strong growth in FY21-23, and pf-EPS could reach +19% CAGR in FY23-26E on improving operating leverage. China exposure (15% of sales in FQ1) and slowdown in SIG business are headwinds, but we highlight growth in core EDA business and the potential addition of Ansys (ANSS) in FY25E help offset over the medium-/long-term. We maintain our FY24/25E sales and pf-EPS outlooks generally unchanged. Reiterate Buy and \$650 PO on 40x CY25E P/E, still within 19x-49x historical range. Upcoming catalysts include analyst day (March 20) and planned divestiture of non-core SIG assets.

Likes: AI ramp, backlog levels, strong EPS outlook

1) AI monetization still in early stages, with healthy customer engagements and 20% revenue uplift from AI product additions, key customers such as Intel, AMD, NVDA. 2) Non-cancellable backlog of \$8.2bn remains healthy (+19% YoY) on accelerating chip design starts and AI products; 3) Room for +19% 3-yr EPS CAGR through FY26E to \$18.82/sh on healthy profit margins and low DD annual sales growth persisting n-t; 4) Pending sale and removal of SIG should be accretive to margins.

Risks: Premium valuation vs peers, China, Ansys overhang

1) SNPS 40x CY25E PE valuation at premium to peers and at upper end of historical range (19x-49x), makes exposure to China export controls and enterprise software softness more of a concern; 2) China exposure remains main risk, having increased to 15% of sales in JanQ from 12% in OctQ as EDA sales to China restriction landscape remains uncertain; 3) Announced Ansys M&A could be financial, regulatory overhang.

Company Sector

Technical & Design Software

Company Description

Synopsys is the largest provider of electronic design automation (EDA) software and tools used to design, verify and lay out semiconductor chips and electronics systems. Synopsys is also the 2nd largest supplier of semiconductor intellectual property, and a recognized leader in the nascent market for tools and services which help to improve the security and quality of software code for a wide variety of enterprises.

Investment Rationale

We rate SNPS Buy. We like SNPS predictable and recurring revenue model, and believe the company can sustain growth even in the event of a downturn. Additionally, we see opportunities for SNPS as chip complexity rises, necessitating system/chip companies to give EDA a larger portion of R&D budget.

Price objective basis & risk

Synopsys (SNPS)

Our \$650 PO is based on 40x 2025E P/E, near the upper end of company's historical trading range (19x-49x), justified in our view as EDA investment accelerates as chip complexity rises.

Downside risks are (1) variability in IP/hardware sales creates issues in timing of revenue recognition, (2) competitors develop unique software capabilities displacing SNPS at core customers, (3) heightened geopolitical tensions lead to further restrictions on supplying firms in China with EDA technology.

Upside risks are (1) share gains in existing markets versus primary competitors, (2) increased government investment in semiconductor R&D and development as nations develop internal ecosystems, (3) material M&A that enables consistent margin expansion or further accelerates sales CAGR, (4) faster-than-expected cost improvements driving higher operating margin.

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

| Investment rating | Total return expectation (within 12-month period of date of initial rating) | Ratings dispersion guidelines for coverage cluster ^{R2} |
|-------------------|---|--|
| Buy | ≥ 10% | ≤ 70% |
| Neutral | ≥ 0% | ≤ 30% |
| Underperform | N/A | ≥ 20% |

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
