NBS: 2M24 national sales value declined by 33% YoY on revised-down comps

Industry Overview

NBS: 2M24 national sales value declined by 33% YoY

According to NBS, national new home sales volume/value decreased by 24.8%/32.7% YoY in 2M24. This beat the performance of 33 major cities/top 100 developers, which recorded YoY decline of 44% (volume)/51% (value), respectively. Again, NBS restated 2M23 sales volume/value downward by 5%/3%, respectively.

Performance by tiers: According to CRIC, tier 1/2/3 cities saw -34%/-47%/-17% sales value drop YoY, respectively in 2M24. The large ASP drop was mainly driven by both city mix and apples-to-apples home price drop among tier 1&2 cities. In our view, project mix's boost to blended ASP would be much less in 2024, as projects in prime locations already took higher market share during 2023.

Completion & new starts began year with large drops

Residential completion area decreased by 20.2% YoY in 2M24 vs. 17% increase in 2023. The weak completion was in line with our cautious view of 5-10% completion decline in 2024 based on shrinking pipeline of completion despite potential 10% boost from completion aid to stalled projects. The weak beginning to the year for completions also suggested property projects' "white-list" may take some time to aid completions.

Residential new starts was down by 30.6% YoY in 2M24 vs. 20.9% decline in 2023. In our view, weak new starts should be conducive to property market's destocking.

Total Real Estate Investment was down by 9% YoY – slightly narrowed from 2023's 9.6%.

Home price correction continued

According to NBS, only 8 of 70 cities saw new home prices growth MoM in Feb, vs. 11 in Jan. **MoM split (vs. Jan):** 1) tier 1: primary -0.3% (vs. -0.3%), secondary -0.8% (vs. -1.0%); 2) tier 2: primary -0.3% (vs. -0.4%), secondary -0.6% (vs. -0.6%); 3) tier 3: primary -0.4% (vs. -0.4%), secondary -0.6% (vs. -0.7%). **YoY split (vs. Jan):** 1) tier 1: primary -1.0% (vs. -0.5%), secondary -6.3% (vs. -4.9%); 2) tier 2: primary -1.1% (vs. -0.4%), secondary -5.1% (vs. -4.4%); 3) tier 3: primary -2.7% (vs. -2.1%), secondary -5.1% (vs. -4.5%).

According to Centline's secondary home price index released earlier: tier 1 cities' secondary home price correction continued in Beijing, Guangzhou and Shenzhen at 1-2% MoM on average. The silver-lining is Shanghai's secondary home price index saw stabilization in Feb.

Disclosures

Important Disclosures

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R1}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R1} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.
