

McKesson

Good growth and stable model; Reiterate Buy

Reiterate Rating: BUY | PO: 566.00 USD | Price: 516.98 USD

Earnings multiple likely to sustain at current levels

McKesson reported a mixed quarter with an EPS beat and guidance raise, somewhat offset by slightly weaker US Pharma and Prescription Technology Solutions (RxTS) EBIT. Initial FY25 commentary suggests McKesson's strong Pharma performance will likely normalize closer to its 5-7% long-term growth rate while the tailwinds in the RxTS segment will perform above its 11-12% long-term growth range. For several quarters we have argued that today's McKesson operates a stronger technology asset base than anytime over the past 10 years. This stronger core asset base combined with our expectation for double-digit long-term EPS growth supports a multiple that we think can sustain at current levels. We reiterate our Buy rating and raise our PO to \$566 (from \$510), based on a target multiple of ~19x CY24E P/E (17x prior) given various margin expansion drivers warrant a multiple more in-line with a broader market/healthcare multiple.

Increasing our EPS estimates following FY3Q

We increase our FY24E EPS from \$27.25 to \$27.50 and our FY25E EPS from \$30.67 to \$31.05. We increase our RxTS EBIT estimates following improved guidance; our estimates for US Pharma, Medical-Surgical, and International EBIT are slightly increased given guidance. Our model assumes no incremental, unannounced M&A, although bolt-on deals would not be surprising to us.

Key catalysts: Utilization, potential M&A/divestitures

Looking ahead, we think key catalysts to watch will be healthcare utilization, script volumes, and branded & generic pricing. We also look for updated trends on GLP-1 scripts, something we track each month ([see report](#)). We also continue to track any incremental M&A and or strategic partnerships that can help support the overall enterprise growth strategy.

Company Sector

Healthcare Technology & Distribution

Company Description

MCK is the largest drug distributor in the US and has sizable businesses in Canada and Europe, including distribution and retail pharmacy assets. MCK is the largest medical-surgical distributor to the non-acute care market and offers various supply chain services and technology, although it recently divested its clinical health IT platform. The company is based in Dallas, TX

Investment Rationale

Our Buy rating on MCK is driven by a long-term cash flow generation story for a stock that is trading at an overly punitive market discount, in our view. We think that the steady revenue generation should provide for low- to mid-single-digit core EBIT growth for MCK, even with headwinds around pricing/volumes. We also view MCK as having a core competency around M&A and expect it to continue to deploy its strong cash flow generation toward supplemental growth, in addition to share repurchases.

Price objective basis & risk

McKesson (MCK)

Our \$566 price objective is based on roughly 19x our CY24 EPS estimate. This multiple is in-line with/slightly above the long-term year average and is essentially in line with the S&P 500 multiple. This multiple contemplates MCK's attractive long-term growth profile relative to peers in the index.

Downside risks to our PO are incrementally worse drug pricing pressure, increased competition creating gross profit headwinds, the risk of other disruptive force entering the supply chain market, ongoing uncertainties and headlines related to the opioid litigation process, any volatility tied to COVID-related utilization drop-offs, any impact from changes in customer standing, and lack of available attractive capital deployment opportunities.

Upside risks are any potential volume pickup, increases in buy-side/sell-side spreads, increasing contribution from COVID vaccines and other related products, and further opportunities for cost savings or capital deployment contributions post-health IT divestiture.

For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
