Proposed FY24 IPPS rate of +2.8%, better than FY23

Government Regulations

+2.8% net rate proposed, better than FY23

The Centers for Medicare & Medicaid Services (CMS) issued the proposed FY24 payment rule for the Inpatient Hospital Prospective Payment System (IPPS), effective October 1, 2023. This proposed rule will increase IPPS operating payments by +2.8% in FY24, above +2.6% finalized for FY23 and the +2.6% finalized for FY22. Overall, the proposed rate update is better than last year, largely as expected, and likely to be modestly higher in the final rule.

DSH cut -2%, publics see -0.1% EBITDA headwind

This proposed reg includes a reduction in disproportionate share (DSH) payments of -2.4%, worse than the -0.3% for FY23 but better than the -8% for FY22. The uncompensated care pool, meanwhile, is shrinking by -2% y/y. With the smaller industry pool, our analysis indicates that on average, the publicly traded hospitals would see a -2% decrease in DSH payments and a -0.1% headwind to EBITDA on average (slightly better than -0.2% in FY23). This is a slight negative for the acute players, although this impact is included in the +2.8% net rate update. UHS and CYH seem best positioned (roughly 0% impact), followed by HCA (-0.2%), and THC (-0.2%). Overall, the DSH cut is in line with the decreases we have seen in recent years.

Market basket (MB) of 3.0%, below FY23

The proposed rule provides a MB update of +3.0% (below the +4.1% in FY23 but above the +2.7% in FY22), which is reduced by a -0.2% productivity adjustment. This implies a net update of +2.8%.

For-profits get +2.8%, in line with industry

We note that the rate update for for-profits is the better proxy for the rate update that public hospital companies will see. For-profit facilities will see a net update of +2.8%, in line with the average for all facilities, but below the +3.3% in FY23. Meanwhile, non-profits will also see a +2.8% rate, better than the +2.5% in FY23.

Urban rates 50bps below rural hospitals rates

In this proposed rule, CMS estimates urban hospitals will see a rate update of +2.8%, in line with the industry overall. Rural hospitals will see a rate update of +3.3%.

Disclosures

Important Disclosures

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R1}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R1} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.
