4Q23 Earnings Takeaways: Briumvi sales meet but don't exceed expectations

Reiterate Rating: UNDERPERFORM | PO: 7.00 USD | Price: 13.91 USD

2023 sales meet but don't exceed expectations

TG Therapeutics (TGTx) shares trading down in 2024 (YTD: -16%; NBI: +3%) even after beating expectations on 2023 sales (\$39.9M sales in 4Q23e prior cons: \$35.5M, prior BofA: ~\$36M). We also note slowing growth rate in new scripts per quarter while total active centers/providers growing means that scripts per provider is decreasing (4Q: 1100 new scripts from 640 providers (1.72 scripts/provider), 3Q: 900 new scripts from 500 providers (1.8 scripts/provider); 2Q: 800 new scripts from 340 providers (2.35 scripts/provider)). With minimal increase in sales from 4Q23 numbers to 1Q24 company guidance (\$41M-\$46M, consensus: \$45M, BofA: \$41M), we remain cautious to give a definitive verdict with one quarter of strong sales especially with several nuances and caveats to be watched. Reiterate Underperform and \$7 PO.

Ocrevus still market leader by far, subq to extend lead

Our observations from listening in on Roche's FY23 earnings include that the large pharma remains nonchalant towards Briumvi's potential for competition. With Ocrevus continuing to be the market leader in US/EU with 24% market share (300k patients being treated globally), and higher retention rates as compared to other MS medicines as emphasized by Roche's management, not to mention the imminent Ocrevus subq approval this year. TG's commentary remains confident on competing with the large pharma, especially with its own upcoming subq. That said, it is unclear whether the timing of Briumvi subq will be early enough for meaningful market capture.

Briumvi survey: Briumvi may be weaker than expected

We surveyed 40 KOLs in a survey ([see our report here](#)) to gauge clinical sentiment on Briumvi, here are our key findings: **1)** 10% say Briumvi is first-choice, 15% say it's the top CD20 (we note it is nowhere near the popularity of Ocrevus (35% say it's their first choice, 52% say it's the best anti-CD20). **2)** Pro-Briumvi KOLs generally treat smaller patient population (~60 on average per year) versus pro-Ocrevus prescribers tending to treat at much larger centers (~145 new patients on average per year). **3)** If we adjust by weighting for a prescriber's total patients treated, our survey suggests only 4% (drop from 10%) of patients on Briumvi versus 36% of patients being put on Ocrevus.

Company Sector

Biotechnology

Company Description

TG Therapeutics is a biopharmaceutical company specializing in B-cell therapies for targeted oncology and MS. The company's pipeline current consists of a commercial-ready asset for MS (ublituximab), and early-stage treatments for B-cell malignancies.

Investment Rationale

Our Underperform is predicated on the following reasons: 1) ublituximab efficacy data not promising in comparison with control arm, 2) hour-long infusion time not a sufficient differentiator, 3) vaccine tolerance and infection rate still a concern for anti-CD20s, 4) Switch from current anti-CD20 unlikely, 5) discounted pricing feasibility diminishing, 6) lack of early pipeline value leaves uncertainty for 2023-2026, 7) complete oncology pipeline disbandment may induce further concerns.

Price objective basis & risk

TG Therapeutics (TGTX)

Our \$7/share price objective is based on a probability adjusted NPV for ublituximab (\$6/sh), TG1801 (\$0/sh), and cash (\$1/sh). We apply a WACC of 10-13% and -3% (ublituximab) to -5% (TG1801) terminal growth rate.

Downside risks are: 1) ublituximab efficacy data not promising in comparison with control arm, 2) hour-long infusion time not a sufficient convenience differentiator, 3) vaccine tolerance and infection rate still a concern for anti-CD20s, 4) switch from current anti-CD20 unlikely, 5) discounted pricing feasibility diminishing, 6) lack of early pipeline value leaves uncertainty for 2023-2026, 7) complete oncology pipeline disbandment may induce further concerns.

Upside risks are: 1) ublituximab launch could be stronger than expected, 2) ublituximab approval could induce more-than-expected strength in shares, 3) pipeline synergy means possibility for combos, 4) cost reduction/synergies with deleted oncology pipeline might yield positives.

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such

securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
