

Teekay Tankers Limited

Tough 3Q, yet sees seasonal lift ahead; First positive net cash balance; PO \$56

Reiterate Rating: NEUTRAL | PO: 56.00 USD | Price: 51.92 USD

Soft results given rate pressures yet sees 4Q23 upside

Teekay Tankers posted 3Q adj EPS of \$2.22, below our \$2.59 target, yet above Street's \$2.03. Spot time-charter equivalent (TCE) rates moderated more than anticipated, falling 34% seq, to \$35.8k/day (\$35.0k/day for Suezmaxes; \$36.6k/day for Aframax; we targeted \$44.9k/day overall) from \$53.9k/day in 2Q23. The sequential downtick in rates was driven by OPEC production cuts in July (which led to excess VLCC capacity), muted macro demand, and decreasing Russian exports, which led to declining tanker ton-miles. Net voyage revenues were \$173 mil, up 20% year-year, yet down 32% from 2Q's \$253 mil, and \$16 mil below our target. Alternatively, costs came in lower than expected. Vessel OpEx was \$36 mil, falling from \$38 mil in 2Q23 and \$3 mil below our target as crewing costs declined on less active chartering. Teekay Tankers chartered ~40% of its 4Q23 revenue days at a TCE of \$32.7k/day, yet it expects to increase over the rest of 4Q, as mid-size crude tanker spot rates accelerated to \$70-\$80k/day currently, as refinery maintenance at crude export markets, leading to higher seaborne flows, and seasonally increased ton-miles (we target \$45.7k/day for 4Q23 TCE, +19% from 3Q23).

Balance sheet improves to net cash on strong returns

With rates remaining sustainably above the carrier's free cash breakeven of \$16k/day, its balance sheet improved to a net cash position of +\$83 mil, its first ever net cash quarter since we started following TNK in 2008. It repurchased 4 sale-leasebacks for \$57 mil in 3Q and will buy back another \$137 mil in 1Q24 as it works to reduce costs. Although it sees tanker rates historically high, management remains confident in the spot market with 96% of its fleet trading on spot. We are encouraged by its balance sheet strength and accelerating cash generation, yet highlight that while current rates remain robust, TNK has locked in a significant share of operating days at below market rates.

PO to \$56; an uncertain macro backdrop still a concern

We reiterate our Neutral on TNK's shares, yet raise our PO to \$56 (from \$47) on 7.0x our 2024e EBITDA (from 6.3x) given the improved spot rate outlook. We are impressed by its ability to generate cash, yet see earnings volatility given its elevated spot exposure and macro uncertainties. We increase our 2023 and 2024 EPS estimates 10% and 7%, to \$14.85 and \$4.05, from \$13.55 and \$3.80, respectively.

Company Description

Teekay Tankers is one of the world's largest tanker owners and operators. It owns 44 mid-sized tanker vessels, is a 50% joint-owner of one VLCC, charters-in 9, for an operational fleet of 54 tankers (our 54 includes 2 STS support vessels). The company owns a combination of Suezmax, Aframax, Product Tankers, support ships, and a 50% JV stake in one VLCC tanker.

Investment Rationale

Despite solid medium-term crude fundamentals, Teekay Tankers is highly leveraged to rates, which have remained volatile after a surge in 2Q following Russia's invasion of Ukraine, creating longer hauls. It remains mostly focused on the spot market, having ended most contracts, and on deleveraging its balance sheet, partially offsetting our cautious view. We see benefit in deleveraging and longer hauls and upside in rates outpacing the demand decline, but decelerating macro keeps us at Neutral.

Expects \$20 mil in cost savings on sale-leaseback repurch

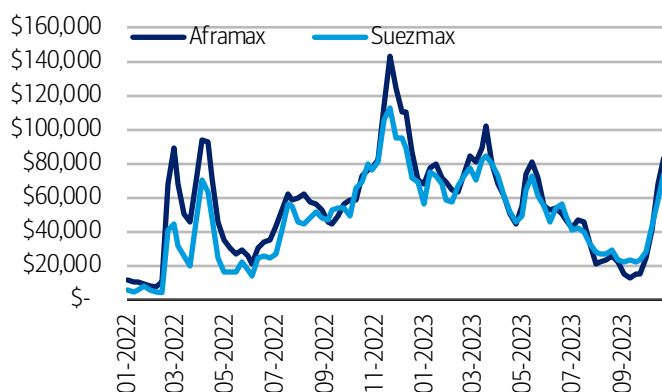

Teekay Tankers repurchased 4 vessel sale-leaseback agreements in 3Q23 for \$57.2 mil financed at SOFR +285 bps. The company has repurchased 19 vessels under sale-leaseback agreements for \$364 mil. It expects to repurchase another 8 sale-leaseback agreements in 1Q24 (the final sale-leasebacks it has outstanding) for \$137 mil, which were being financed at SOFR +275 bps. It expects to refinance the repurchases through a \$350 mil credit facility, which will generate \$20 mil in annual financing cost savings

Mid-size crude tanker charter rates accelerating

Spot Suezmax and Aframax TCE rates have climbed to \$74k/day and \$83k/day, from \$29k/day and \$26k/day on average in 3Q23. The sudden spike in charter rates was driven by rising ton-mile demand from the recovery of Saudi Arabia and Russia export flows. Capacity may have also tightened with crude prices rising to the \$80-\$90 per barrel range as Russian crude-carrying vessels shifted back to the shadow fleet with oil above the Russian crude \$60 price cap.

Orderbook ratio coming off lows yet capacity still tight

Orderbook to fleet ratio remains near lows at 6%, yet has increased from YTD lows of 4% in January. New orders have increased, however management highlighted that year-to-date ordering levels of 24 mil deadweight tons of capacity is in line with 20-year average levels. It also noted that 11% of the active mid-size tanker fleet is aged 20 years and older with another 14% expected to exceed 20 years from 2024 to 2026. Shipyard lead times are covered for ~3.5 years, with limited berths available until 2027.

Tanker orderbook to fleet ratio is 6%, coming off YTD lows of 4%.

BofA GLOBAL RESEARCH

Price objective basis & risk

Teekay Tankers Limited (TNK)

Our \$56 price objective is based on 7x our 2024E EBITDA. Our multiple is above the midpoint of Teekay's trading range (4.3x-8.1x) as crude tanker rate levels pass historic peaks as Russia's invasion of Ukraine drives longer-haul trade flows, inventories are at cycle lows, and orderbook remains at historic lows (yet rising). The crude outlook looks to improve as mobility returns, though declining economic activity may weigh on demand.

Downside risks are: (1) Higher leverage levels, with exposure to cyclical and volatile spot market, (2) Risks to the global economy, (3) Risks of further OPEC production cuts and declining oil prices, (4) re-charter risk for vessels on charter.

Upside risks are: (1) a rapid upturn in spot rates, (2) continued debt paydown, or (3) M&A improving valuation for its assets and therefore NAV.

BoFA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BoFA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BoFA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
