

Premier, Inc.

Strategic review complete, initial FY24 guidance below the Street

Maintain Rating: UNDERPERFORM | PO: 21.00 USD | Price: 20.95 USD

Streamlining operations as it works through challenges

Premier's FY2Q results were mixed with revenue and adjusted EBITDA below expectations, but adjusted EPS ahead of expectations. Importantly, Premier has finished its strategic review and management provided an initial FY24 guide, both of which serve to improve visibility. FY24 revenue and EBITDA guidance were significantly below the Street with just two quarters remaining in the fiscal year and we look for incremental color on tomorrow's earnings call on the key drivers. Regarding the strategic review, Premier is seeking to divest ownership in Contigo and S2S Global. We think the decision to seek new ownership for Contigo Health makes sense given the direct to employer offering is outside the scope of Premier's core business. Lastly, the board approved a \$1Bn share-repurchase authorization including a \$400MM accelerated repurchase transaction to be executed in FY24 (embedded in guidance). While we like the incremental visibility, we await further details and maintain our Underperform rating and \$21 PO ahead of the call. Conference call scheduled for tomorrow morning (2/6) @ 8am.

FY2Q Rev/Adj. EBITDA miss the Street, EPS ahead

Total revenue of \$334.8MM missed Visible Alpha consensus estimates of \$343.3MM and BofA's estimate of \$355.1MM. Supply Chain Services revenue of \$217.86MM missed BofA's estimate of \$221.7M (BofA's estimate for Products revenue of \$63.3MM and Net Admin Fees of \$158.4MM), while Performance Services revenue of \$116.96MM missed BofA's estimate of \$133.4MM. Adjusted EBITDA of \$114.13MM missed the Street's estimates of \$116.9MM and BofA's estimate of \$119.2MM. Adjusted EPS of \$0.60 beat the Street's estimate of \$0.57 and BofA's estimate of \$0.54.

Initial FY24 guide <ST on rev/EBITDA, EPS brackets ST

The first time FY24 revenue guide of \$1,265MM - \$1,325MM missed the Street's estimate of \$1,330.8MM and BofA's estimate of \$1,342.3MM. FY24 adj. EBITDA guidance of \$405MM - \$425MM is also behind the Street's estimate of \$441.2MM and BofA's estimate of \$446.4MM. Lastly, FY24 adj. EPS guidance of \$2.06 - \$2.18 brackets the Street's estimate of \$2.11 and BofA's estimate of \$2.08.

Key topics for the call

The biggest focus point for the call will be on the puts/takes on the FY24 guide and color on the logic entailed in the resolution of the strategic review, particularly around plans to seek new ownership for the S2S Global and Contigo Health. Additionally, we expect management to address the PPE/supply stocking dynamics and overall product mix. Beyond that, we expect updates around contract renewals and details on the competitive dynamics of net admin fee growth for the GPO business. We also expect PINC to detail growth contributions from Performance Services and how FY2Q performance translates to the FY24 outlook.

Price objective basis & risk

Premier, Inc. (PINC)

Our \$21 price objective is based on about 5x our CY24 EV/EBITDA estimate. This multiple is roughly in line with the five-year average, both on an absolute multiple basis as well as its relative 25% discount to the S&P 500, and incorporates the mix shift toward lower-margin non-GPO revenue as well as not fully normalizing for the tax changes.

Downside risks to our PO are enhanced pricing pressure in the GPO market, shifts in profitability tied to the change in admin fee share due to the ownership restructuring, competition from new e-commerce entrants, ongoing pressures on Performance Services revenue growth, any volume fluctuations related to the COVID-19 outbreak, and a slowdown in specialty market growth. Upside risks are accelerated demand for new IT systems, share gains within the GPO market, and incremental contributions from deployed cash flow.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at [BofA ESGMeter methodology](#). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating.

ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
