## 4023 EPS beats on stronger spread revenue

State Street (STT) reported 4Q23 core EPS of \$2.04 vs. BofAe/cons \$1.90/\$1.69 ests, with the beat to our est. driven by higher NII. Mgmt. attributed the stronger NII relative to its recent update (in Dec) partially to stronger year-end deposit growth (+3.7% QoQ vs. our -3.3%). Mgmt. considers \$200-\$210bn (vs. \$221bn at YE23) as the steady state range for deposits over the medium term (balances seen as stable 1Q24 QoQ). NIB deposits (-9.1% QoQ) seen as stabilizing in 2H24. CET1 capital ratio ending the year at 11.6% vs. 10-11% mgmt. target (8% regulatory minimum) with outlook for a total capital payout ratio of ~100% for FY24.

## Guides for positive fee operating leverage

FY24 guidance assumes global equity markets up ~10% YoY on average and rates to track the forward curve (five rate cuts with ending rates of 4.25% for Fed Funds, 2.75% for ECB and 4% for BOE). Fees: +3-4% YoY; NII -10%; expenses +2.5% implying +ve fee op. leverage. Expenses to benefit from optimization actions to boost productivity and client service. Revise FY24e EPS +9% to \$7.82 reflecting higher NII outlook and stronger fee revenue growth. FY25e EPS relatively unchanged at \$7.84 (vs. \$7.78). The lack of idiosyncratic catalysts to drive stock outperformance and our preference for credit sensitive peers drives our Underperform rating.

## Strong execution, but rate outlook swing factor

Mgmt. continues to execute well in terms of constantly identifying efficiency opportunities (consolidation of India JVs, firm-wide productivity efforts) while staying laser focused on driving revenue growth (private markets, State Street Alpha, front office software solution). Outside of environmental factors, mgmt. called out flows into fixed income and active ETFs as potential areas that should see continued growth. NII on the back of monetary policy (US/globally) and how customers react (and competitor behavior) to dictate when the bank could see a stabilization in NIB deposits and NII.

# Fee revenue pipeline growing

Servicing fee revenue tied to "wins" rose to \$103mn during 4Q23 vs. \$91mn in the prior quarter. As of YE23 pipeline of servicing fee revenue to be installed stood at \$270mn (+\$57mn YoY) with ~50% of this expected to be installed this year. Mgmt. continues to see private credit as a potential source of growth given the strong underlying trends. We forecast fee revenue growth of 3.6% YoY for FY24.

## **Company Sector**

Trust Banks

## **Company Description**

State Street is one of the largest trust banks in the US with operations organized into two main business lines: Investment Servicing and Investment Management. Investment Servicing activities include products and services for institutional clients to allow daily execution of financial transactions and facilitate clients' global securities settlement needs. Within Investment Management, STT provides a wide range of investment management strategies and products across multiple asset classes.

### **Investment Rationale**

We view State Street as potentially lagging the broader banks space (especially credit sensitive retail banks) in a soft-landing scenario. We expect capital return to moderate while the larger GSIB banks should see a greater boost to their capital return outlooks and stock performance due to potential revisions to the Basel III Endgame proposal, in our opinion.

## **State Street Corporation (STT)**

Our \$81 PO is based on a 50%/50% weighting between our 2024e EPS and 2024e TBV. We assign 13.2x/1.3x multiples, respectively, below the bank's 5 year pre pandemic median of 13.5x/2.6x given heightened uncertainty surrounding EPS/ROTCE outlooks, owing to the macro backdrop. Downside risks to our PO: severe selloff in equity/bond markets that that could put downward pressure on fee growth and M&A that could temper capital return. Upside risks: stronger equity/bond markets.

#### Equity Investment Rating Distribution: Banks Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	100	49.75%	Buy	84	84.00%
Hold	54	26.87%	Hold	41	75.93%
Sell	47	23.38%	Sell	35	74.47%

### Equity Investment Rating Distribution: Global Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

# Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster<sup>R2</sup>

Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

### BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
