

Pentair plc

Margin expansion is a positive; Pool returns to growth; upgrade to Neutral

Rating Change: NEUTRAL | PO: 76.00 USD | Price: 70.74 USD

Great visibility on margin expansion; still cycle headwinds

We are upgrading Pentair to Neutral from Underperform. We see earnings upside relative to the Street from margin expansion. Residential pools, a key earnings and sentiment driver, should return to growth in 2024. However, other cyclical concerns and restructuring risks keep us at Neutral. We raise our PO by \$30 to \$76, based on 13x our 2025E EV/EBITDA estimate, at a slight discount to the peer average at 14x 2024E.

Further margin expansion ahead; raising estimates

Pentair EBITA margins have expanded from 17.2% in 2020 to 20.9% in 2023 (midpoint of guide). Pentair has a multi-year transformation program targeting pricing, sourcing, and operations. We see pricing as driving most progress-to-date. We see upside to 1H24 consensus estimates as Pentair realizes benefits from already completed actions. We raise our 2023E adj. EPS to \$3.74, 2024E to \$4.21, and 2025E to \$4.62 to reflect higher productivity. We are 5% above consensus in 1H24.

Restructuring and reinvestment risk keep us at Neutral

Pentair's transformation program involves re-evaluating its supplier base and supply chain. The company plans to reduce costs within ~75% of its material spending. So far, it has addressed ~12% of material spending. It is also optimizing its footprint, which may result in temporarily higher costs. We see execution as a risk as the company continues to reorganize its supply chain. We note some cost actions in 2023 are likely to reverse as volumes return to growth (e.g., rightsizing direct labor; halting reinvestment in Pool). We forecast total PNR and Pool volumes returning to growth in 2Q24.

Pool to grow, but unfavorable exposure in other segments

We are optimistic that the Pool segment (43% of EBITA) will return to revenue growth in 2024 after 7 quarters of y/y declines (3Q23-1Q24) & \$150mn of destocking headwinds. Pentair's other two segments, Water Solutions & Industrial & Flow Technologies (IFT), have lagged on growth and profitability. In 2023, Water Solutions benefitted from the Manitowoc acquisition and IFT was aided by transformation initiatives. Looking into 2024, Water Solutions has ~75% and IFT has 1/3 commercial construction exposure. Commercial construction typically follows residential, and we expect this cycle to be similar. Our recent channel checks were more conservative on the end market.

Company Sector

Industrials/Multi-Industry

Company Description

Pentair is a residential and commercial pure-play water treatment company. Pentair generated \$4.1bn of revenue in 2022 from its three segments, Pool (40% of revenue, residential pool), Water Solutions (24% of revenue, water filtration and ice), and Industrial and Flow Technologies (36% of revenue, industrial filtration, irrigation, and commercial pumps).

Investment Rationale

Pentair's execution outperformed our expectations in 2023 and we see strong visibility on margins in 2024, largely on the back of its Transformation Initiatives. Our Neutral rating balances upside to consensus on margins in 1H24 with our more bearish topline outlook.

Raising 2024E on margin upside

Pentair EBITA margins have expanded from 17.2% in 2020 to 20.9% in 2023 (midpoint of guide). Pentair has a multi-year transformation program targeting pricing, sourcing, and operations. We see pricing as driving most progress-to-date. We see upside to 1H24 consensus estimates as Pentair realizes benefits from already completed actions. In particular, we highlight 3Q23 margin performance as showing a ~240bp y/y benefit from sourcing initiatives.

Our 2024E estimate raise largely reflects the benefit of actions already taken. We see execution risk as the company continues to reorganize its supply chain. It is also optimizing its footprint, which may result in temporarily higher costs. Our sense is management's message for ~100bps of y/y margin expansion in both 2024E and 2025E is conservative for 2024.

BofA GLOBAL RESEARCH

Our 2024E estimate is more 1H24 weighted vs. historical seasonality given better visibility on execution in 1H24 (e.g., carrying forward the same transformation benefits that the company reported in 3Q23). We are 4% above consensus EPS in 1Q24 and 5% above consensus EPS in 2Q24. Our estimates in 2H24 are below consensus but we see upside opportunity if incremental productivity initiatives yield further benefits. We note some cost actions in 2023 were temporary and are likely to reverse as volumes return to growth (e.g., rightsizing direct labor; halting reinvestment in Pool).

Exhibit 2: BofAe quarterly estimates vs. consensus

We raise our 2024 estimates on productivity, but see more upside vs. the Street in 1H24

Breaking down the different margin components

Pentair provides a margin bridge each quarter, which investors track closely. The key components are growth/price/acquisitions, foreign exchange, inflation, and productivity. While the company does not explicitly report price/cost, it does disclose pricing and inflation, which we use to approximate price/cost. We note that the inflation metric reflects all-in cost inflation, not just COGS.

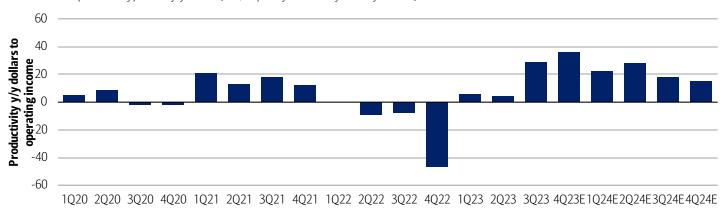

The key driver of 2024 upside: Productivity

Historically, Productivity has been a mid-single digit y/y benefit or even a drag in 2022. We think the strong y/y Productivity reading reflects: 1) recovering inefficiencies around supply chain in 3Q22, and 2) realizing benefits from the transformation initiatives around sourcing and consolidation.

Productivity largely describes actions taken in the company's transformation initiatives around supply chain, sourcing, and operational excellence. In 3Q23, the company reported materially positive benefit of \$29mn y/y. We estimate ~240bp contribution to 140bp of y/y margin expansion in 3Q23, offset by lower volume leverage.

Exhibit 3: Productivity \$s contribution to operating income, y/y

We estimate that productivity peaks in y/y \$s in 4Q23E, helped by inefficiency recovery from 4Q22

Source: BofA Global Research, company filings

BofA GLOBAL RESEARCH

We expect it to continue delivering strong productivity in 1H24E <u>exclusively based</u> <u>around the actions it has already taken</u>. We see productivity y/y taking a step down in 2H24E as we have less visibility into the impact and success of incremental actions. For FY24, we forecast 190bp y/y expansion from transformation benefits.

Exhibit 4: Productivity \$ contribution to operating income y/y, 1Q21A-4Q24E

We estimate productivity contribution materially improves in 1H24 on easier comparisons

_	1Q21	2Q21	3Q21	4Q21	1Q22	2Q22	3Q22	4Q22	1Q23	2Q23	3Q23	4Q23E	1Q24E	2Q24E	3Q24E	4Q24E

BofA GLOBAL RESEARCH

Modeling neutral price vs. inflation in 2024E

Pre-COVID but following the split from nVent (measured as 2Q18-1Q20), price/cost spread (approximated by pricing contribution minus inflation headwind) averaged a 5(4.5)mn y/y headwind to operating profit. We note that the inflation metric includes all inflation to operating costs, not just cost of goods sold.

Price/inflation was largely positive during the supply chain-driven inflationary period, with the majority of the contribution coming from Pentair's pool segment. <u>Our Homebuilders colleagues Rafe Jadrosich and Shaun Calnan have estimated 30-35% inflation since 2019 in the pool industry</u>; we would estimate Pentair had higher pricing given its premium product suite.

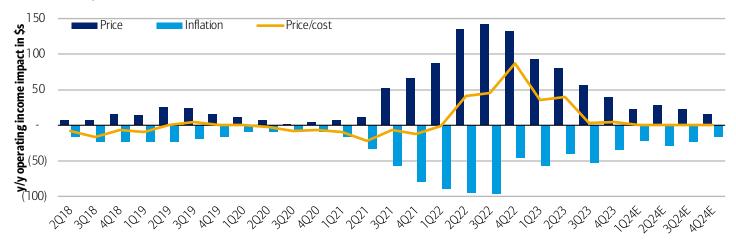

Management has consistently reiterated its dedication to improved pricing in its other two segments, Water Solutions and IFT, through its Transformation Initiatives. 3Q23 results provide an early indication of price/cost as the raw materials environment moderates. Price vs. inflation was negative in both Water Solutions and IFT. IFT price/cost had been positive since 4Q21 but was not able to fully offset the \$(24)mn of incremental inflation with its \$19mn of incremental price.

The company reported overall positive price/cost in 3Q23 on the strength of Pool pricing. Our concern into 2024 is that realized pricing in Pool will take a step down (2% vs. 8% in 2023E) as regular early buy discounts resume. We have received comments from investors that Pentair's commentary around 1-2% of realized price is likely conservative given more bullish indications from its distributor, Pool Corp, and competitor Hayward Holdings.

Exhibit 5: Price vs. inflation vs. price/cost, 2Q18-4Q24E

We forecast neutral price vs. inflation in 2024E on a dollar basis

Source: BofA Global Research, company filings

BofA GLOBAL RESEARCH

As a result, we model PNR price/cost neutral on a dollar basis in 2024E. This reflects our lack of visibility on whether the pricing strategies in Water Solutions and IFT can yield positive price/cost going forward. More visibility on the ability to keep price/cost positive in these two segments or on a lack of discount in Pool would make us more bullish.

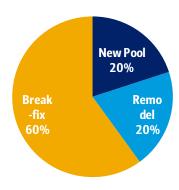

Pool returns to growth in 2024E

After 7 quarters of y/y declines (3Q22-1Q24; with 1Q24 only down 1%) and \$150mn destocking impact (9% headwind to 2023 Pool revenue), the Pool segment has bottomed and we forecast a positive inflection in 2Q24. The company expects that 3Q23 sales were the bottom and we should see sequential improvement from here in 4Q23/1Q24, which is different than typical seasonality to reflect end of destock.

Pentair's pool business is largely comprised of break-fix and maintenance, repair and overhaul (MRO, ~60%). We estimate that this part of the business correlates more strongly with pool retail credit card spending (discussed below). Management has suggested that new pool and remodel could be flat y/y in 2024 based on the current rate environment. We lack conviction on MRO spending recovery next year, and higher rates will continue to pressure the new pool market.

Exhibit 6: Pentair's \$1.39bn Pool business, revenue

The largest portion of the business is break-fix/MRO spending

Source: BofA Global Research estimates, company filings

BofA GLOBAL RESEARCH

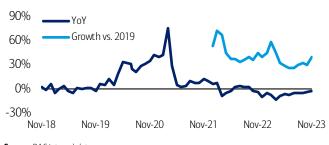

Pool retail spending declines (2.9%) YoY in November

For the month of November 2023, spending at pool supplies merchants was (2.9%) lower YoY, the 14th consecutive month of YoY decline, per BAC aggregated credit and debit card spending data (BAC card data). On a month-over-month basis, spending was down (17.2%) in November, outperforming normal seasonality. Compared to November 2019, retail spending on pool supplies increased 40.1% in November 2023. Pool spending improved on a YoY basis and outperformed historical MoM seasonality in November (vs. the pre-COVID trend). We remain cautious on the outlook for the pool industry given spending continues to decline YoY against easier comparisons and we see risk to discretionary spending in a weaker macroeconomics / high interest rate environment. See the latest BofA on USA note for an explanation of the methodology, disclaimers and limitations related to BAC card data.

BofA GLOBAL RESEARCH

Destocking: still some inventory stuck in the channel

Investors have grown more constructive on Pentair given commentary from distributor POOL Corp on clearing out its excess inventory. We estimate 15% of total PNR sales go through POOL. Management commentary has indicated that while PNR feels its inventory has been cleared out of POOL, there are certain distributors that are still carrying excess inventory, which could have an incremental impact on sell-in rates in 2024.

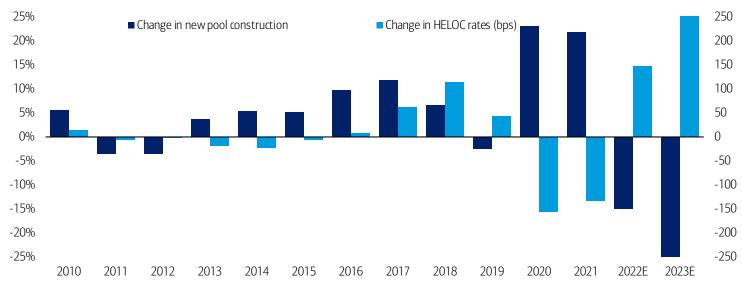

Higher rates still weighing on pool outlook in 1H24

The "bull" case on Pool growth in 2024E is that the company is lapping a \$150mn destocking headwind (\sim 11% to Pool growth) and should be able to realize 3-4% price. We conservatively model 2.5% price given the company anticipates the discounting prebuy behavior to return in 1Q24. High HELOC rates will put pressure on new pool construction (20% of the Pool segment) given a strong negative correlation. We acknowledge that PNR is likely to outperform the market given a mix of higher-income customers and high-performance products.

Exhibit 11: Change in new pool construction vs. HELOC rates

New pool construction has an (85)% negative correlation with HELOC rates

Source: BofA Global Research, company files, Hayward Holdings, P.K. Data

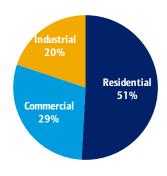

Sizable commercial construction exposure likely facing a downturn

Across its three segments, 29% of Pentair sells into commercial sales. While residential seemingly has bottomed, commercial construction typically follows residential construction. Our channel checks into 4Q-end were more conservative on the commercial construction end market.

Historically, commercial construction tends to lag residential construction by \sim 18 months. Given we have been in a residential downcycle for \sim 6 quarters so far (including 4Q23), we would expect commercial to follow.

Exhibit 12: PNR breakout by end market, 3Q23A

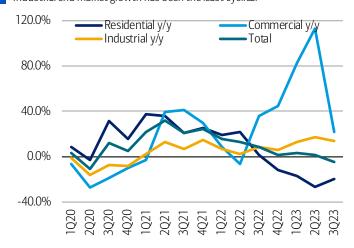

Residential end markets make up 51% of the business

Source: BofA Global Research estimates, company filings

BofA GLOBAL RESEARCH

Exhibit 13: Residential vs. industrial vs. commercial y/y growth Industrial end market growth has been the least cyclical

Source: BofA Global Research, company filings

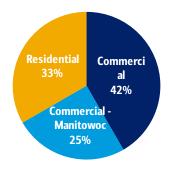

**Note: all-in revenue (not organic)

BofA GLOBAL RESEARCH

We estimate \sim 75% of Water Solutions and \sim 1/3 of IFT sell into commercial end markets. We note that the Manitowoc business within Water Solutions (half of the commercial construction market or 1/3 of the total segment) is likely less cyclical. We estimate 18% of the IFT business is the company's beer filtration business. We consider "beer filtration" to be a subset of the commercial filtration exposure.

Exhibit 14: Water Solutions by end market, 2023E

Commercial end markets make up 75% of the business

Disclaimer and Methodology regarding BAC internal data

Selected Bank of America ("BAC") transaction data are used to inform the macroeconomic views expressed in this report and should be considered in the context of other economic indicators and publicly available information. In certain instances, the data may provide directional and/or predictive value. The data used are not comprehensive; they are based on aggregated and anonymized selections of BAC data and may reflect a degree of selection bias and limitations on the data available.

Methodology explained

Readers should be aware that although the BAC datasets utilized in our analysis represent a significant number of data points, they nevertheless present a degree of selection bias, including but not limited to income levels and geographies. In addition, the data is limited to debit and credit cards and does not include other payment methods such as cash or checks.

Data regarding merchants who receive payments are identified and classified by the Merchant Categorization Code (MCC) defined by financial services companies. The data are mapped using proprietary methods from the MCCs to the North American Industry Classification System (NAICS), which is also used by the Census Bureau, in order to classify spending data by subsector. Spending data may also be classified by other proprietary methods not using MCCs.

BAC data used in this report include spending from active US households only. Spending from corporate cards are excluded.

Additional information about the methodology used to aggregate the data is available upon request.

Price objective basis & risk

Pentair plc (PNR)

We base our \$76 price objective on a 13x EV/EBITDA multiple of our 2025 estimates. This slightly below the peer group trading at 14x on 2024 estimates. We think the below-peer valuation is fair given above average EBITDA margins offset by more cyclical topline.

Upside risks are: 1) better-than-expected revenue growth in pools, 2) success on incremental productivity actions. Downside risks are: 1) Reinvestment in most profitable (Pool) segment, 2) execution risk on sourcing & consolidation activities.

Analyst Certification

I, Andrew Obin, hereby certify that the views expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or view expressed in this research report.

Pentair plc (PNR) Price Chart

B: Buy, N: Neutral, U: Underperform, PO: Price Objective, NA: No longer valid, NR: No Rating

The Investment Opinion System is contained at the end of the report under the heading "Fundamental Equity Opinion Key". Dark grey shading indicates the security is restricted with the opinion suspended. Medium grey shading indicates the security is under review with the opinion withdrawn. Light grey shading indicates the security is not covered. Chart is current as of a date no more than one trading day prior to the date of the report.

Equity Investment Rating Distribution: Industrials/Multi-Industry Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	45	50.56%	Buy	25	55.56%
Hold	26	29.21%	Hold	13	50.00%
Sell	18	20.22%	Sell	7	38.89%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

RI Issuers that were investment banking dients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster, 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Moutral	> 00%	< 300%

Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.

N/A

BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: Pentair plc.

The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Pentair plc.

BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Pentair plc.

The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Pentair plc.

BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Pentair plc.

BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Pentair plc. BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Pentair plc.

The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Pentair plc.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America

Underperform

≥ 20%

Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments. Refer to BofA Global Research policies relating to conflicts of interest.

"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities. This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile

and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
