

Rates Technical Advantage

Bullish UST bias put to the test

Key takeaways

- US10y yield is testing 4.10% for the third time this year. Theoretically this is top of range, but what if it breaks higher?
- Above 4.1% can lead to 4.34% (Oct 2022 high) and possibly 4.50-4.60%. No breakout and decline below 3.8% reasserts bull case.
- US 2s10s may form a double bottom. Above -82bps targets -54bps. US 5s30s may be in wave c steeper to +14bps.

View: US 10Y tests a pressure point for a third time

Our year ahead view called for yields to build tops in the 1H23 by retesting 2022 highs and then in 2H23 yields could begin to drop. The July 5^{th} channel breakout higher in US 10y yield and the flip of the 50d SMA back above the 200d SMA have become relevant risks to our view. The 10Y yield is testing the highs of the YTD range of 4.10% for the third time this year. A move about this means yield can retest the 2022 highs of about 4.34%. If it did this and turned down then a double top may form. However, a risk is the July 5, 2023 channel breakout measures higher to 4.5-4.6%. No breakout above 4.10% and a decline below 3.80% will reassert a bull case and yield topping process.

Daily: Channel breakout and 50d > 200d supporting yield

The July 5th channel breakout higher in 10Y yield and the 50d SMA of yield crossing back above the 200d SMA on July 14^{th} favor a yield uptrend. If yield breaks above 4.10% exiting the YTD range then technical traders are likely to target a retest of the Oct 2022 yield highs of 4.30-4.34%. In this upside scenario, 4.5-4.6% is also a risk. No breakout above 4.1% and decline below 3.72% can form a small double top in yield (Chart 1).

Weekly: Is Oct 22-Aug 23 a wave 4 preceding wave 5 up?

One possibility is the consolidation in 10y yield from October 2022 to now is a wave 4 consolidation preceding a 5^{th} wave higher in yield. The breakout during the week of July 5 favors this and another breakout above 4.10% would support it. A decline below 3.8% will break a trend line and would support a bullish bias (lower yield) (Chart 2).

Monthly: In this cycle or the next, 10y yield exceeds 5%

The 10Y yield was in a declining channel from 1990-2022. It broke out of it at 2.6% in 2022. The average swing in the channel was 240bp. Adding that to the breakout point (a common technical method) estimates 5% for the 10Y yield. The height of the channel added to the breakout point is about 5.50%. We still can see the 10Y yield reaching into the 5% area in this cycle or the next (Chart 3).

US curve trying to bear steepen, again

US 2s10s above -82 confirms a double bottom and targets -54 (Chart 4). US 5s30s is entering wave c steeper that targets +14bps (Chart 5).

Trading ideas and investment strategies discussed herein may give rise to significant risk and are not suitable for all investors. Investors should have experience in relevant markets and the financial resources to absorb any losses arising from applying these ideas or strategies.

US 10 Year Yield Daily Chart

All eyes on top of YTD range of 4.10%

We've been of the view that the US 10y yield was in a range from 4.10-3.60%. This view weakened when the 10y yield rose above the (red) channel line on July 5 and then the 50d SMA crossed back above the 200d SMA on July 14.

The first week of August is seeing the 10y yield test the 4.10% level for a third time this year. This is the top of its YTD range. Given the channel breakout on July 5, the moving average cross higher on July 14 and the MACD turning up, yield is just one breakout away from signaling upside to 4.30-4.34% (Oct 2022 highs) and possibly the 4.5-4.6% measured move target (calculated by the red channel breakout).

In the event 10y yield turns down from 4.10%, again, then the range has narrowed to 4.1-3.72%. A small double top in yield would be a scenario to watch for. A break below the last yield low of 3.72% would confirm a double top and suggests a decline toward 3.30%. Should 10y yield break higher above 4.10%, test 4.34% and then turn down from the Oct 2022 high, then a large double top in yield may be forming and would echo the choppy year markets have had.

10Y yield support: 3.80%, 3.72%, 3.60%, 3.35% **10Y yield resistance:** 4.10%, 4.25%, 4.34%, 4.5-4.6%

Chart 1: US 10Y yield – Daily Chart (G691)

Narrow range from 4.1-3.72%. Risk of an upside breakout above 4.1% due to July 5th trend line breakout, 50d SMA above the 200d SMA and MACD turning up.

BofA GLOBAL RESEARCH

US 10Y yield weekly chart

Testing top of range at 4.10%, was the last nine months a wave 4?

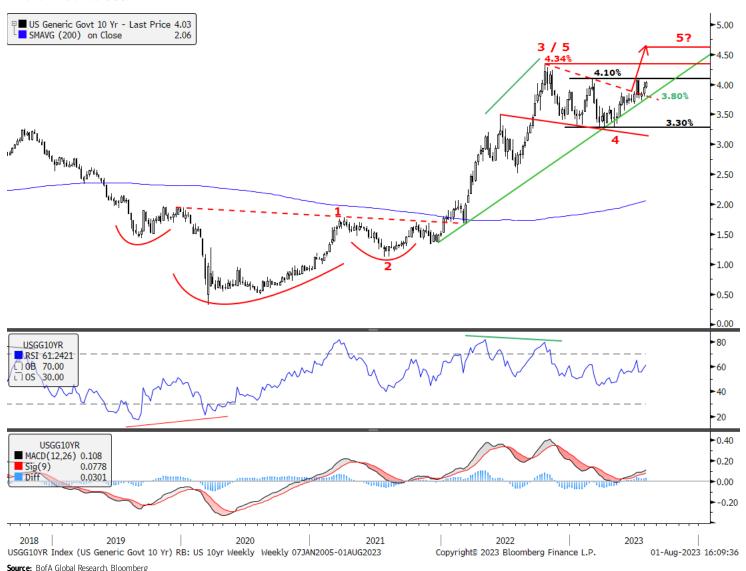

Below we update the weekly chart of 10Y yield to show the ongoing YTD range from 3.30-4.10% (black lines), the wedge pattern with yield breaking out higher in July (red lines) and the green trend line the UST bulls need to see broken to strengthen a long conviction.

The July breakout from the wedge (red) suggested some upside potential to retest the 2022 highs at 4.34% and a measured move target area of 4.5-4.6%. However yield stopped at 4.10% keeping the range. Now the 10y yield is testing the top of range for the third time. A breakout higher would reiterate upside potential from the wedge breakout. For what it's worth, the measured move target based on a range breakout (black lines) is almost 5%.

If the bond market holds the 10y yield below 4.10%, starts to rally and yield falls below the green trend line at about 3.8%, then the range remains with downside to 3.3% again possible.

Chart 2: US 10Y Yield - Weekly Chart (G692) - Flashbacks to 2006-2007

Ongoing range from 3.7-4.1% however an upside breakout is a risk. Above 4.1% starts to signal 4.34% and possibly 4.5-4.6% can happen. Below 3.80% and yield may fall toward the lows of 3.3%

BofA GLOBAL RESEARCH

US 10Y yield monthly chart

Long-term channel breakout still says above 5% in this cycle or the next

When a trend channel is broken, it is common technical process to take the height of the channel and add it to the breakout point to derive a target. In the chart below we measure four swings from the bottom to the top of the channel as 286, 267, 225 and 183 basis points. The average is 240 basis points. The breakout point was approximately 2.6%. Therefore an average channel target is about 5% for the 10Y yield. The last time it was near this was in 2006-2007. We discuss an average channel target first because the actual height of the channel added to the breakout point targets the mid-5% area (Red vertical arrow). This being a more typical technical measuring process.

Chart 3: US 10Y Yield - Monthly chart (G1203)

Channel breakout measures on average to 5% however a full measured move is closer to 5.5%

No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities. This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

Futures and options are not appropriate for all investors. Such financial instruments may expire worthless. Before investing in futures or options, clients must receive the appropriate risk disclosure documents. Investment strategies explained in this report may not be appropriate at all times. Costs of such strategies do not include commission or margin expenses. BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

This report may contain a trading idea or recommendation which highlights a specific identified near-term catalyst or event impacting a security, issuer, industry sector or the market generally that presents a transaction opportunity, but does not have any impact on the analyst's particular "Overweight" or "Underweight" rating (which is based on a three month trade horizon). Trading ideas and recommendations may differ directionally from the analyst's rating on a security or issuer because they reflect the impact of a near-term catalyst or event.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned in this report. Investors in such securities and instruments effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA Global Research information is distributed simultaneously to internal and client websites and other portals by BofA Securities and is not publicly-available material. Any unauthorized use or disclosure is prohibited. Receipt and review of this information constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion, or information contained herein (including any investment recommendations, estimates or price targets) without first obtaining express permission from an authorized officer of BofA Securities. Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public inform

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial

instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies. Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
