Strategic shifts take time; Reiterate Neutral

Reiterate Rating: NEUTRAL | PO: 16.00 USD | Price: 15.59 USD

Risk/reward remains balanced to start the year

We reiterate our Neutral rating as margin tailwinds in F24 seem fairly priced into the stock. With shares +22% from trough levels in Sept. and ests relatively unchanged since, we think the next leg higher will need to be driven by improved visibility that the wholesale business is improving (57% of sales). We are encouraged by preliminary discussions to accelerate the DTC strategy and diversify the business but think this and the cost savings initiatives will take time to execute. We are increasing our PO to \$16 (prev. \$14), or 8x EV/EBITDA (prev. 7x) to reflect the rerating in peer multiples.

CEO reins officially moving to Michelle Gass

We expect the company will report 4Q EPS on 1/25, right before Michelle Gass officially takes the keys from Chip Bergh to become CEO (effective 1/29). We expect mgmt will outline a detailed cost savings program with most of the savings reinvested back into the business. We think the fundamental headwinds facing LEVI are known (US wholesale, Europe uncertainty) and acknowledge margin compares improve starting in 1H24; but think the bar is appropriately set at roughly 20% EPS growth in F24.

Bull case: if 15% margins are still in the MT playbook....

The simple bull case involves an inflection in either denim (roughly 60% of total sales) or global wholesale. We forecast LEVI EBIT margins at 9% in F23E, below the 12% run rate exiting 4Q23E. The company should see margins tailwinds in F24 from cotton (100bp benefit net of pricing cuts) and lower promos. The material unlock revolves around improvements in SG&A efficiency, with SG&A currently in the high 40% range as a % of sales compared to low 40%s in 2019. A return to 12% full year margins on \$6.4bn in sales would represent \$1.53 in potential earnings power (cons. EPS \$1.30 in F24E).

Bear case: can't hide from wholesale exposure

The bear case revolves around the lack of near-term signs that wholesale is improving and that the bar for margin expansion/EPS growth is too high entering 2024. Downside risks to margin estimates could be driven by more pricing cuts, freight cost pressure from Suez Canal disruption, ongoing promotions if denim demand remains bleak, and the challenge of improving SG&A efficiency while growing DTC/doors.

Company Description

Levi's designs, markets and distributes products that include jeans, casual and dress pants, tops, shorts, skirts, jackets, footwear and related accessories for men, women and children globally. The company owns and operates the Levi's, Dockers, Signature by Levi Strauss & Co, Denizen, and Beyond Yoga brands.

Investment Rationale

Our Neutral rating reflects our belief that LEVI is well positioned to benefit from structural margin improvements over the longer term but near term challenges such as a slowdown in denim demand keep the risk/reward balanced.

BofA GLOBAL RESEARCH

Price objective basis & risk

Levi Strauss & Co. (LEVI)

Our \$16 PO is based on a 8x EV/EBITDA multiple on our F2024 estimates. This is inline with peers given similar headwind and long term margin potential as peers.

Upside risks: better-than-expected margin expansion, higher consumer demand drives significantly higher sales and earnings growth, and a faster than expected recovery in denim.

Downside risks: fashion trends shift away from denim and the Levi's brand, the consumer environment materially weakens, promotions weighs on margins, and the company needs to ramp spending to drive brand momentum.

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

RI Issuers that were investment banking dients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
D	> 100/	4 700/

Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
