# Outlook has upside potential; Remain constructive

Reiterate Rating: BUY | PO: 73.00 USD | Price: 53.23 USD

#### Most businesses recovering, some more than others

Nutrien's 4Q EBITDA of \$1.075bn fell short of our \$1.125bn estimate owing to much weaker than expected offshore potash realizations, slightly lower nitrogen prices, and some deferred customer purchases in Retail. We trim our 2024E EBITDA to \$5,663mn from \$5,962mn (see our new price deck, Exh 2-3), representing a mid-single digit % decline, largely due to the year-ago higher fertilizer pricing. But the trajectory from here looks generally favorable, especially post Q1. While the US fall application season was strong, we look for US growers to continue replenishing depleted P and K soil levels, along with seasonally strong nitrogen demand, and tight channel inventories will require significant shipments in coming months. This same trend could occur in other regions but likely at different rates, as LatAm fertilizer demand near-term could be soft, and India has uncertain subsidies. We trim our PO to \$73 from \$79 on lower 2024 earnings.

#### Increased potash demand could offset FSU's price drag

Offshore pricing for potash is only marginally above pre-2020 levels in spite of sanctions against nearly half of global supply from Russia and Belarus. Shipments from these latter countries are nearly back to pre-war levels, enabling countries willing to buy potash from the FSU to drive down pricing. We estimate a 10-15mnt shortage of global potash applications in 2022-23, and thus we see upside to NTR's expectation of 2024 potash shipments returning just to 2021 levels. Robust demand could offset weak FSU pricing.

#### Retail is an under-appreciated asset for Nutrien

Nutrien's Retail segment generated ~25% of company EBITDA in 2023, despite high-cost inventory carryover of fertilizer and crop chemicals. These latter drags are now in the past and we view this business as not just defensive but able to drive steady profit gains. Bolt-on acquisitions are extremely accretive, as it provides NTR's 20+% retail market share in the US more density, and importantly the benefit from NTR's lower cost position and the ability to push high-margin proprietary nutrition and crop protection products. We see significant upside from NTR's \$1bn proprietary products business as there is substantial innovation underway, and NTR has the trusted loyalty of its farmer customers. We note NTR's crop chemical sales are greater than FMC's global revenue.

We are hosting a fireside with NTR at our Global Ag & Materials Conference next week (along with Mosaic and CF).

#### **Company Sector**

Chemicals-Major

#### **Company Description**

Nutrien was formed from a merger of equals between Agrium and Potash Corp and is the world's largest provider of crop nutrients, inputs, and services with 2023 sales of \$29bn. The company sells more than 25 million tonnes annually of potash, nitrogen and phosphate products for agricultural, industrial, and feed customers worldwide. Nutrien's Retail business has 1,500 locations across North America, Australia, and South America with annual sales of around \$12bn.

#### **Investment Rationale**

We rate Nutrien Buy. We believe US agriculture will improve due to lower corn acres and increased demand, which would particularly impact NTR. Prices for all three nutrients have likely troughed given that strong demand is expected through 2024. Nutrien's Retail segment should remain strong amid improved organic volumes and continued M&A.

#### Price objective basis & risk

#### Nutrien (NTR)

Our \$73 price objective is based on SoTP analysis using a 9x 2024E EBITDA multiple for Retail, 7.5x for Potash, 7.5x for Phosphates, and 8x for Nitrogen. The 7.5x multiple for potash and phosphates is at the midpoint of the company's historical trading range of 6-9x. We use slightly higher multiples of 8x for nitrogen due to the clean energy growth potential, and 9x for Retail for its defensiveness and pricing power.

Upside risks are stronger than expected demand and pricing in key fertilizer markets, supported by potential for lower grains stocks-to-use ratios, rising demand for protein in developing markets, and increases in farm income.

Downside risks are price deflation in Retail from new entrants, lower than expected demand and pricing in key fertilizer markets, higher production costs, reduced farm income, a near-term resolution to the Russia/Ukraine conflict, significantly lower than expected demand, and increased use of bacteria-sourced ammonia.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Inderperform	N/A	≥ 20%

R2Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

#### BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
