# 4Q23 Conf Call: Market rationality and focus on profitability

Reiterate Rating: BUY | PO: 22.00 BRL | Price: 18.14 BRL

# More price hikes coming in 1H for postpaid and hybrid

Regarding pricing on mobile, TIM announced it expects to hike prices above inflation for hybrid and postpaid in 2Q24, in line with what happened in 2023. This is broadly in line with the guidance released yesterday (6<sup>th</sup> February), which supports our view of a more rational market on mobile that should lead to real MSR growth in the coming years (see: 4Q23 Review: Positive trends continue in mobile market, but higher capex). We also take this opportunity to update our numbers with 4Q results and new guidance (higher capex). We reiterate our Buy rating and R\$22 PO as we see positive dynamics on mobile and a solid FCF yield of 9% for 2024.

# TIM also plans to reduce its "Zero rating" policy

TIM stated it has plans to reduce its "zero rating" policy in 2024. "Zero rating" refers to unlimited access to specific apps that do not consume the customer's data packages. We highlight that earlier this week, Claro (AMX) stated it had reduced its "zero rating" policy for postpaid and hybrid plans (see: <a href="IMT Morning radar: Claro reduces "zero rating" in postpaid plans in Brazil</a>). In our view, this trend should be positive for cost reduction leading to even further margin expansion, or even leading customers to upgrade plans to get more data.

# Still room for upsell, especially for former Oi customers

For the last few years, TIM increased its average ARPU not only due to price hikes, but also due to its upsell strategy (prepaid customers going to hybrid plans). According to the company there is still much room for this trend to continue, especially considering the user base acquired from Oi in 2022, which has even more room for upgrades.

# Profitability will likely be the focus for broadband

On broadband TIM shared a more cautious view for the market, as competition remains fierce. Moreover, a potential acceleration in the segment's growth should be somewhat limited, as TIM will likely focus on higher profitability. TIM also stated it is open for inorganic growth opportunities in the segment.

### **Company Sector**

Telecom Services-Wireless/Cellular

### **Company Description**

TIM Brasil is the second-largest wireless company in Brazil with 63 million subscribers (of which 21% are contract or post-paid) and a 27% market share. The company is controlled by Telecom Italia (TI), which owns 67% of the total shares.

#### **Investment Rationale**

Our positive view reflects that TIM does not have the heavy burden of legacy products, which has enabled it to report above avg. top-line growth over the last three years, leading to EBITDA expansion. TIM should be leaner than its competitors in terms of systems due its focus in the mobile business, which should be an advantage as the company improves its service through customer services. We also believe the company has the most to gain from the acquisition of Oi's mobile assets

# Price objective basis & risk

#### TIM Brasil (XZUAF / TIMB)

Our price objective of R\$22/US\$22 per share is based on a ten-year DCF-to-Firm, discounted at a weighted average cost of capital (WACC) of 12.3%, assuming a capital structure of 90% equity / 10% debt in the long term. Our cost of equity (Ke) is composed of a Beta of 0,90, a risk-free rate of 3%, a market risk premium of 5.7% and country risk in Brazil of 280bps. We use cost of debt of 5% and terminal growth rate of 3%.

Upside risks: (i) leaner than its peers in terms of systems since Pay TV and fixed telephony are irrelevant, (ii) major beneficiary from potential synergies with Oi, (iii) establishment of new fronts of revenue growth, such as the partnership with C6 Bank or advertising, (iv) potential to benefit the most in a scenario of macro recovery, (v) run sharing agreement with Vivo, which should lead to opex and capex savings.

Downside risks: (i) limited growth for the sector puts pressure on prices, (ii) net adds, which have been weak over the last two years, leading to market share losses, (iii) inefficient capital structure, as its controlling shareholder is highly leveraged, (iv) reduced focus on FTTH, which is a high-growth business but still too small for the company.

For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.
