# Very strong finish to 2023, Côté on track for first gold production in March 2024

Reiterate Rating: BUY | PO: 3.20 USD | Price: 2.30 USD

### Re-rating potential as Côté approaches first production

IAMGOLD (IAG) reported Q4'23 production results and provided an update on its flagship Côté gold project. Q4'23 was exceptionally strong with both the Essakane and Westwood mines exceeding BofA and consensus estimates, driving full-year 2023 gold production to the higher end of the guidance range. We see encouraging signs of a turnaround at the historically challenged Westwood mine. Côté is progressing well with first production on track for March 2024. We continue to see the potential for IAG shares to re-rate to a higher valuation as Côté, a large-scale, long-life, and transformational Canadian gold mine nears first production. Reiterate Buy rating.

## Q4 production well-ahead of BofAe and consensus

IAG reported Q4'23 attributable gold production of 136 thousand ounces (koz), 20% above BofAe at 113koz, 14% above Bloomberg consensus at 119koz and 22% above Visible Alpha (VA) consensus at 111koz. Versus our estimates, both Essakane and Westwood were better than expected. At Essakane, attributable gold production of 108koz topped our estimate of 93koz by 16% driven by both higher throughput and grades. At Westwood, gold production of 28koz beat BofAe by 40% at 20koz, driven by higher grades. For the month of December, Westwood recorded gold production of 12.4koz, an encouraging sign that a potential turnaround is emerging. IAG reported attributable full-year 2023 gold production of 465koz, near the high-end of guidance at 410-470koz. We increase our 2023E EPS to \$0.07 (from \$0.04).

# Côté on track for first gold production in March 2024

IAG noted that pre-commissioning and commissioning activities at Côté are progressing well. Pre-commissioning of the primary crushing circuit is ongoing with full commissioning planned to start later this week. First gold production from the project is on track for March 2024, unchanged from prior messaging, and ramp-up through 2024.

# Price objective basis & risk

#### IAMGOLD Corp. (IAG / YIMG)

Our price objective for IAMGOLD is US\$3.20/C\$4.40 per share, and is based on the stock trading at 0.65x times our estimated net asset value (NAV) and a 1.37 CADUSD exchange rate. Historically, North American precious metal stocks have traded between 0.50 and 3 times NAV, with a median of 2.00 times over the long-term, and with unhedged, growth-oriented producers with solid financial positions and low relative costs and located in stable mining jurisdiction occupying the upper end of the range. We ascribe a low P/NAV multiple to IAMGOLD to reflect our forecast for higher than average political risk in Burkina Faso, execution risks at the Cote Gold project, and higher cash costs and debt vs. peers. As the Cote Gold project in Canada ramp-ups through 2024 and 2025, this should drive strong volume growth, lower costs and political risk, and ultimately drive deleveraging.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions in any securities referred to herein.

#### BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
