# Overall solid quarter; record core EPS and NAV/share +1.3%

Maintain Rating: BUY | PO: 21.00 USD | Price: 19.94 USD

### Another solid quarter, GAAP ROE 15%

Ares Capital (ARCC) reported Q4 core EPS of \$0.63, above consensus estimates of \$0.60. Relative to the BofA forecast of \$0.58, the beat was due to higher-than-expected recurring interest income plus higher capital structuring fees given stronger origination volume. GAAP Diluted EPS was \$0.70 (impressive 15% ROE) due to portfolio appreciation. Overall, Q4 was a strong quarter despite the complex market environment. ARCC delivered record core EPS (\$0.63, 13% core ROE) and NAV/share (\$19.24) while credit metrics remain healthy. We think ARCC is one of the best positioned Business Development Companies (BDCs) to continue to gain share and generate excess returns in the current economic backdrop. Maintain Buy.

# Credit remains strong; non-accruals relatively stable

Credit remains resilient as non-accruals were fractionally higher at 1.3% of the portfolio at cost, compared to 1.2% the prior quarter (the non-accrual peer average was ~2.6% during Q3, most recent data available). Non-accruals are carried at 46% of cost (51% last quarter), which limits further downside risk to NAV/share, in our view. The portfolio weighted average EBITDA was \$322M (\$313M in Q3, \$275M at 4Q22) and average net leverage was fractionally lower Q/Q at 6.0x (6.1x at Q3). Importantly, weighted average interest coverage remained unchanged q/q at 1.6x, despite higher base rates.

# NAV/share+1.3% QoQ, leverage (net) stable at 1.0x

NAV/share increased to a record \$19.24 (\$18.99 in last quarter) due to strong core earnings, portfolio appreciation, and accretive capital issuance. Reported leverage, net was 1.0x, unchanged QoQ. ARCC's stated target leverage range is 0.9x-1.25x and we expect ARCC will remain at or below the midpoint given macro uncertainty. In Q4 ARCC raised \$236M of common stock through "at-the-market" offerings, which was slightly accretive to NAV/share. In November, ARCC issued \$300M of unsecured notes (priced at 7.0%) and raised an additional \$1B of unsecured notes (priced at 5.875%) in January 2024. The Q4 dividend was \$0.48/share. ARCC declared a 1Q24 dividend of \$0.48 (payable March 29), in line with expectations.

# Portfolio +4% to \$23B; portfolio yield +10bp to 12.5%

ARCC's portfolio (fair value) increased to \$23B (\$22B at Q3). Originations were \$2.4B and exits/sales were \$1.4B, resulting in net portfolio commitments of \$957M. The BofA forecast assumed \$0 net portfolio growth. The portfolio yield (cost basis) was 12.5% vs 12.4% at Q3. The Senior Direct Lending Program (SDLP) yield was 13.6%, unchanged QoQ and the lvy Hill yield was 15.1% (14.6% at Q3). Non-recurring dividends were \$1M in Q4 (\$22M during full year 2023).

# Flexible capital structure

ARCC has a conservative and flexible liability structure (~70% of funding is unsecured, moderate leverage, etc.), which increases financial flexibility, in our view. Near term debt maturities are \$1.3B in 2024 (ARCC issued \$1.3B of debt in Q4 and Jan 2024), and \$1.9B (or 16% of outstanding debt) in 2025. Available liquidity was \$5.4B (including \$535M of unrestricted cash), subject to borrowing base restrictions vs. \$5.3B at Q3.

# Price objective basis & risk

#### **Ares Capital Corporation (ARCC)**

Our \$21 price objective is based on a roughly 1.1x multiple to net asset value (NAV), which in our view is achievable in a stable operating backdrop with intensifying demand for yield bearing investments. BDC peers are currently trading at roughly 0.9x NAV. We believe ARCC's premium valuation to peers is justified due to its superior profitability and strong credit performance.

Downside risks to achieving our price objective are 1) material weakening in credit markets, 2) a significant slowdown in investment activity, 3) a deteriorating macroeconomic environment, 4) disruptions in the capital markets, and 5) weaker-than-expected investment performance.

Upside risks to achieving our price objective are 1) material strengthening in credit markets, 2) a significant pickup in investment activity, 3) an improving macroeconomic environment, 4) disruptions in the capital markets, and 5) stronger-than-expected investment performance.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

# Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster<sup>R2</sup>

Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

#### BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
