More evidence the turnaround is taking hold

Quality over quantity remains the mantra

We recently <u>initiated on Knife River</u> (see report) with a Buy, on our thesis of improved practices/ops, consolidation, and favorable valuation. We believe Q4 results/2024 guide are further confirmation of this transformation taking place. High demand, EDGE initiatives, and mild weather (extended construction season ~\$50mn benefit) drive Q4 growth. EBITDA of \$72.4mn (+45% vs consensus), was above the high end of guide, as gross margin of 17.4% expanded 400bps YoY led by significant margin expansion across: Aggregates (+910bps YoY), Contracting (+480bps YoY) and Liquid Asphalt (+540bps YoY). Pricing was a bright spot across materials, as were volumes which were up in Q4 after declining through the year. Knife River expects to see a repeat of higher price/lower volumes in 2024 as the firm continue to pursue higher quality projects over quantity, guiding to MSD-HSD pricing, flat to down LSD volumes, and ~5% cost inflation.

Outlook above the street, M&A a likely source of upside

Knife River guided to flattish YoY revenue for 2024 (\$2.75-\$2.95bn, +1% at the midpoint), and \$425-\$475mn in EBITDA (15.8% margin, +50bps at the midpoint). EBITDA outlook is 3% ahead of consensus at \$438mn. Energy Services was broken out as a segment and is expected to generate \$50-\$60mn in EBITDA (vs \$78.1mn 2023). Dynamic pricing is still in early innings and should provide a long tail benefit to margins. Work on internal EDGE initiatives is ongoing, however KNF expects to pivot focus more towards M&A in 2024. Low leverage (1.1x YE, vs 2.5x L-term annual target) provides the firm with significant balance sheet optionality to pursue a myriad of opportunity in the pipeline. Any M&A taking place will remain aggregate centric given the firm's committed to increase aggregate exposure.

Buy: raising PO following results

While we lower our 2024/25E revenue estimates 3%, we maintain our EBITDA estimates of \$450/\$495mn for 2024/25 respectively. Our 2024 estimate leaves us in line with the midpoint of outlook. We raise our PO to \$83 (\$81) on the same 11.0x 2024E EBITDA on lower net debt. Our valuation remains at a substantial discount to peers in the space. While the trajectory of non-resi (warehouses, data centers) stays a front of mind risk for the broader sector, KNF's internal initiatives and high exposure to public infrastructure provide it with idiosyncratic levers for growth. We reiterate our Buy rating as we see upside as the firm executes on EDGE initiatives, progresses to I-term targets (20% EBITDA), and begins to pursue inorganic growth.

Company Sector

Building Materials

Company Description

Knife River is a leading provider of aggregate based construction materials and contracting services. The firm is vertically integrated, with aggregates used in downstream products such as ready-mix concrete and asphalt. Knife River operates primarily in the Pacific, North West and Mountain regions, targeting high-growth mid size markets.

Investment Rationale

We rate Knife River shares at a Buy. With the split from MDU, there is room for greater focus on operational improvements, driving margin and earnings. The operational improvements come at a time when non-residential construction is underpinned by stimulus and other factors driving a sustained period of growth. We believe investors are likely to appreciate KNF's ability to drive operational improvement, favorable territories and favorable relative valuation vs other public aggregate names.

Price objective basis & risk

Knife River Corp (KNF)

Our \$83 price objective is based on 11.0x 2024E EV/EBITDA, which is largely in line with the broad peer group, at a significant discount to aggregate heavy names, and a slight discount to material and construction firms such as ROAD given KNF's limited history of independent operation and still expanding aggregate footprint. In our view, several factors are likely to underpin Knife River's multiple: i) Infrastructure stimulus provides funding visibility over the coming years ii) Improving operating driving margin and earnings and, iii) minimal exposure to the more uncertain themes facing Industrials (China, equipment supply chains, capacity constraints). Downside risks are: 1) aggregates prices and volumes fail to rise as we forecast, 2) bottlenecks (labor, etc.) slow down or push out volume growth , 3) dislocation in rates results in a more broad slow down in construction recovery, 4) price-cost dynamics or operating leverage see limited improvement.
