FY23 and Update on Strategic Priorities: what we expect

Reiterate Rating: BUY | PO: 7,800 GBp | Price: 7,659 GBp

Strategy update to focus on growth algorithm components

IHG will report FY23 results on 20 February, along with an 'Update on Strategic Priorities'. The session will include presentations from the new CEO and CFO as well as regional teams. We expect the discussion to focus on the building blocks of IHG's growth algorithm - high single-digit revenue growth, 100-150bps margin expansion and cash returns. For the near term, IHG's US peers have provided a robust outlook for RevPar growth (Marriott sees a 3-6% CAGR for 2024-25, Hilton expects +2-4% y-y in 2024). We expect IHG to echo those views, while longer-term drivers of demand (an expanding middle class and key market GDP growth) should be unchanged. IHG shares trade on 14.9x our 24E EV/EBITDA, a 14% discount to US peers (much wider than history at 4%) - we think this is unjustified, given high returns (>30% ROIC), earnings growth (15% 2023-27E) and cash return potential. Buy.

Investors remain concerned on NUG

Our discussion with investors suggests key focus remains on NUG and we expect management to address market concerns on trajectory of room growth during the update session. We believe that in FY24E macro stabilisation and potential interest rate cuts will relieve pressure on NUG, and we estimate growth of +4.1% y-y for IHG (3.7% in 2023E). We expect FY24E RevPar to benefit from a favourable mix shift to US domestic travel while further travel recovery in China should continue to fuel growth. We forecast FY24E RevPAR to increase +4% y-y (US +3%, EMEAA +2.9%, China +15%).

Commitment to recurring buybacks

We believe IHG will reaffirm its commitment to cash returns in the form of annual share buybacks, in addition to the dividend. IHG targets a leverage ratio of 2.5-3x and we continue to forecast a \$750m share buyback in 2024 (4% of market cap), with potential cash return of 26% in 2023-25E cumulative (dividends and buybacks). Management could use the strategy session to address the investor suggestion of switching the primary listing to the US, which could offer higher valuation and access to a wider investor base.

Company Sector

Hotels

Company Description

IHG is one the largest hotel companies and operates more than 929k rooms. The group has a pure asset light model and generates over 97% of profits from fee business. Americas represent 55%+ of group's system size, EMEAA about 26% with the remaining in Greater China. The group has a pipeline skewed to Americas and China (c73% of total pipeline).

Investment Rationale

We think IHG's geographically diversified asset-light model (99% of the rooms are either franchised or managed) is resilient and drives visible profits and cash flow streams. Fee growth is driven by net system growth, a mix shift to the higher fee luxury segment and margin expansion. Conversions should support continued net system growth. IHG has strong cash return to shareholders with its progressive dividend and potential for recurring share buybacks.

BofA GLOBAL RESEARCH

Price objective basis & risk

Intercontinental Hotels Group plc (ICHGF / IHG)

We apply a 15.5x EV/EBITDA multiple to our 2024E estimates to derive our PO of GBp7,800/(ADR\$99). Our target multiple is a discount to US-listed peers average of 16x and near the top end of IHG's long-term range of 10-16x and reflects IHG's asset-light profile, global footprint and margin opportunities.

Downside risks to our PO are 1) greater-than-expected economic weakness which may reduce lodging demand, 2) slower margin progression, 3) greater-than-expected delays in new hotel openings, 4) lower-than-expected cash return to shareholders.

Menethod 3*is the set of BofA Global Research standard measures that serve to maintain global consistency under three broad headings: Business Performance, Quality of Earnings, and validations. The key features of iQmethod are: A consistently structured, detailed, and transparent methodology. Guidelines to maximize the effectiveness of the comparative valuation process, and to identify some common pitfalls.

Redatabase is our real-time global research database that is sourced directly from our equity analysts' earnings models and includes forecasted as well as historical data for income statements, balance sheets, and cash flow statements for companies covered by BofA Global Research.

IQprofile^{≤M}, **IQ**method^{≤M} are service marks of Bank of America Corporation. **IQ**database® is a registered service mark of Bank of America Corporation.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster^{R2}

 Buy
 ≥ 10%
 ≤ 70%

 Neutral
 ≥ 0%
 ≤ 30%

 Underperform

 ≥ 20%

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs. effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
