Chart book series #39: January rebound

Activity improved in Jan, reversing Dec disappointment

High frequency indicators in <u>December mostly disappointed (see our report)</u>. In welcome news, activity data in Jan showed reasonable recovery. 7/9 high frequency indicators saw actual m-o-m in Jan outperform median m-o-m typical of January (Exhibit 1). Activity indicators such as- port cargo traffic, railway freight traffic, automobile sales, PMI manufacturing, PMI services, tractor sales, petrol demand and GST collection improved in Jan vs Dec. Diesel demand, power generation, civil aviation passenger traffic were flattish or lower.

Moving on to agriculture, as of 2^{nd} Feb, rabi sowing is fully complete. Although its flat in yoy terms, vs normal area sown, acreage in FY24 is up 9.4% yoy. Area sown under wheat is up 0.7% yoy. One can therefore expect flattish rabi harvest in 2024. Water reservoir storage levels at 52% vs last year do not show an encouraging picture of any potential improvement in yields right away.

Overachievement of fiscal target, credit growth slowed

As the revised estimates show, FY24's fiscal deficit is set to beat the target by 10bp at 5.8% of GDP. FY25's budgeted estimate of 5.1% of GDP as fiscal deficit target (see our report) looks fairly achievable, benefiting from credible underlying assumptions and improved formalization of the economy.

Non-food bank credit growth slowed to 15.8% yoy in Dec from 16.3% yoy in Nov. While agriculture credit and industry credit growth improved in Dec vs Nov. Credit to services sector and personal loan growth slowed. Nominal lending rates were up 5bp.

Trade deficit fell further in January

Trade deficit in Jan narrowed further to US\$17.5bn from US\$19.8bn in Dec. While exports softened by US\$2bn sequentially, the decline in imports was higher. Non-oil export growth softened to 2.2% yoy in Jan from 6.2% yoy in Dec. Non-oil, non-gold imports were down US\$5bn m-o-m. Accordingly, NONG imports de-grew by 1.9% yoy in Jan vs -0.9% yoy in Dec. Trade deficit between Apr-Jan in FY24 has turned out to be much lower than during same period last year. Services net exports continued to showcase robust growth, with highest ever US\$16bn of net exports seen in Dec.

Exhibit 1: Economic activity indicators, actual m-o-m in Jan'24 vs median m-o-m in January 7/9 high frequency indicators saw sequential momentum in Jan'24 outpacing the median trend

Economic Activity: Festival season begins

As favorable base effects started to distort yoy reading for most activity indicators since March 2021, we have moved to an index-based assessment. We use CY2019 (2019=100) as the baseline to offer a more representative picture, across activity indicators (barring PMIs, bank credit, and trade data).

Most high frequency indicators improved in Jan vs Dec and also fared better than the seasonal factor. This reverses the concern underwhelming Dec data had brought in.
