

## First Solar, Inc.

# The Domestic King: Premium Pricing Persists, Reiterate Buy.

Reiterate Rating: BUY | PO: 187.00 USD | Price: 148.05 USD

## Pricing resilience despite industry challenges

We reiterate our Buy rating on shares of solar module manufacturer First Solar (FSLR) after a constructive 4Q23 report. Under a backdrop of declining solar panel prices, FSLR has secured an additional 2.3GW of net bookings at higher ASPs of 31.8c/W vs Q3′24 at 30c and Investor fears of 29c/w. Reiterate our Buy as we see numerous trade policies ahead helping hold intact the market despite slide in pricing QoQ. Watch for decision on CBP detention of CSIQ modules for key indicator on market enforcement policies around Chinese Poly. 4Q exceeded what appears a low bar to us. Ramp on build intact too.

## Oversold to offset delays; bookings likely flattish for FY

FSLR secured 2.3GW of net bookings since Q3, resulting in a total backlog of 80.1GW. While FSLR's contracted backlog is completely sold out through 2026, the deliberate over-allocation position (just a few % above production) serves as a strategic measure as FSLR have already encountered requests from customers seeking to adjust delivery volume (see this as mgmt's purposeful offset to delay risks we see from ARRY and others). Our conversations suggest interconnection queues continue to be a sore point; developer & regulatory discussions in DC this week affirm delay risks for '24. Mgmt expects to achieve 1:1 book-to-bill implying an acceleration in bookings from 2.3GW YTD: keeping ASP integrity appears priority. Notably, mgmt. does *not* see final clarity on domestic contents guidance in coming quarter as a key catalyst for orders.

## Solid result: Raise PO to \$187 as improving ests a tad

Despite weaker than expected revenues, FSLR delivered 4Q23 EBITDA and EPS ahead of consensus estimates on strong unit economics that flow into 2024 guidance. The company guided for 2024 net sales between \$4.4bn and \$4.6bn. higher than our estimates of \$4.4bn but largely in line with consensus at \$4.5bn. On EBITDA, Increased nameplate capacity contributed to operating margin expansion in 2023, where mgmt. continues to expect further growth in 2024. Mgmt. guided diluted EPS to \$13.00 to \$14.00 (cons is at the lower end, updated BofA est at \$13.67). We raise our PO to \$187 from \$179 prior on higher estimates in 2026, reflecting continued cost management and relatively stronger pricing than previously anticipated, in addition to stronger unit economics. Lack of corporate capital requirements to fund capex a plus through the plan.

#### **Company Sector**

Alternative Energy

#### **Company Description**

First Solar is the largest vertically integrated solar manufacturer in the United States. The company uses a specialized cadmium telluride (thin film) based panel, which is different from most other panels which are silicon based. First Solar engages in manufacturing and has planned 25 gigawatts of annual nameplate capacity by 2026, with revenues coming primarily from module sales

#### **Investment Rationale**

We rate First Solar (FSLR) Buy given the above-average, derisked earnings growth trajectory and significant cash build projected for later in the decade. FSLR's leading US solar manufacturing footprint supports its status as greatest beneficiary of IRA. With billions in cash flow expected to accrue to FSLR through 2030+, we see strong ability for FSLR to diversify and maintain its US competitive advantage.

## Estimates updated for pricing, cost per watt

We have modestly adjusted our FSLR estimates for updated assumption for average selling prices and costs per watt. We have increased our FY24 revenue estimate to \$4.5Bn from \$4.4Bn prior, reflecting an increase in global ASP to 28c/watt, in line with FSLR guidance for the full year. We have also flowed through lower cost/watt reflecting stronger fixed cost absorption and favorable mix relating to production in India, partially offset by cost of rollout of bifacial products and higher freight ramp and period costs at 3c/w. BofA EPS of \$13.67 resides in the top half of FSLR's \$13-14 guidance range. Still see tax credits comprising approximately 2/3 of EPS through 2026.

**Exhibit 1: FSLR Updated Estimates** 

Tax credits still predominant source of EPS through 2026

## PO to \$187 for updated estimates, peer mtm

We continue to value FSLR using an EV/core 2026E EBITDA multiple. We mark to market FSLR's peer group of primarily Chinese module manufacturers to 3.2x from 3.1x prior, and continue to apply a 0.5x premium to the group given derisked access to the North American market. We still believe this premium to peers could be highly conservative given the extent to which peer economics could be affected in a scenario where there is heightened protectionism against Chinese imports. Our valuation flows through higher EBITDA reflecting our estimate changes above. With these changes, we raise our PO to \$187 from \$179 prior.

#### **Exhibit 2: First Solar Valuation**

## Pricing resilience in a challenged industry

Under a backdrop of collapsing panel prices, FSLR managed to secure an additional 2.3GW of bookings at higher average selling prices (ASPs) of \$31.8/W (excluding adjusters) since Q3′24 (\$0.30c/W). In the context of an oversupply-driven, recent policy developments have shifted in their favor, particularly with increased Uyghur Forced Labor Prevention Act (UFPLA) enforcement and the potential removal of the bifacial exemption. In our view, this policy activity aligns with our allows them to exercise pricing discipline in navigating the market especially in context of the backlog (remain sold-out two years forward). A 2-yr fully sold-out order book also suggests FSLR can largely afford to see a slower pace of bookings under these market dynamics, in our view.

#### ...but execution on the technology roadmap is key

While FSLR maintains a commitment to R&D innovation, we continue to emphasize that successful execution on technology upgrades stands as the linchpin for sustained pricing power and to retain their competitive position. Management hinted at the potential for realizing backlog volumes at higher Average Selling Prices (ASPs), amounting to an incremental \$0.01 per watt or \$0.5 billion in additional revenues through the application of technology adjusters. From a capital structure standpoint, FSLR's balance sheet offers the flexibility to capitalize on growth opportunities. Mgmt. have guided the 2024 net cash balance in the range of \$0.9bn to \$1.2bn.

#### Backlog largely intact...

FSLR secured 2.3GW of net bookings since Q3, resulting in a total backlog of 80.1GW (average ASP of \$31.09/w). Additionally, India will start to ramp more meaningfully. Currently 206MW of contracts in India have been added to bookings (and 1.1GW are in the late-stage pipeline). On aggregate, while recent solar policies may work in FSLR's favor, we do not necessarily think the Inflation Reduction Act's (IRA's) 10% investment

tax credit (ITC) adder for domestic contents will be an incremental catalyst here (despite it being just about the only product available that can qualify for the full credit).

#### ...We continue to monitor delays here

While FSLR's contracted backlog (excluding India) is completely sold out through 2026, the deliberate over-allocation position serves as a strategic measure. This intentional stance ensures the resilience of certain delivery timelines, particularly in larger framework contracts, accounting for the inherent tendency for delays in the project development process. This becomes even more important the closer they get to the delivery date. We continue to monitor customer delays, as FSLR have already encountered requests from customers seeking to adjust delivery volume timing in response to project development delays. Our conversations suggest interconnection queues continue to be a sore point. FSLR maintains they will continue to invest in their partnerships so as to prevent customers from seeking out warehousing solutions or working with third parties. We do not anticipate this will impact contracted volumes for 2024.

On a separate note, manufacturers are working to improve efficiency and maintain share. That being said, and consistent with what we've seen, mgmt. highlighted that intellectual property (IP) is driving some uncertainty as the market has transitioned to TOPCon. Jinko and Maxeon have both indicated that they have a strong IP position for TOPCon and they're going to enforce that IP.

#### Investing in nameplate capacity... from Ohio to India

During 2023, FSLR began production of Series 7 modules at their third manufacturing facility in Ohio and in India, bringing total installed nameplate production capacity across all our facilities to  $\sim$ 16.6 GW. In 2024, FSLR expect to ramp and increase production to between 15.6 GW and 16.0 GW and sell between 15.6 GW and 16.3 GW.

FSLR is also in the process of expanding its U.S. manufacturing capacity by  $\sim 8$  GW, including the construction of the fourth manufacturing facility, which is expected to commence operations in H2'24; a fifth facility in the US, due to commence in H2' 25; and the expansion of their existing facilities in Ohio, which is expected to be completed in H1'24.

## Price objective basis & risk

#### First Solar, Inc. (FSLR)

Our price objective is \$187/share, based on an EV/EBITDA method. We apply a 3.2x multiple from a group of Chinese and other international solar comp group/module peers, and add a 0.5x premium for FSLR's lower risk to protectionist trade policies. We value FSLR's core EBITDA at a lower than historical multiple given significant pressure to 2027+ pricing from Chinese oversupply. We also add net cash balance and \$84/share net present value to account for production tax credits stipulated in Inflation Reduction Act.

Downside risks: 1) worse/declining price environment, 2) declining margins or worse-than-expected cost structure, 3) unfavorable trade policy dynamics, 5) worse Chinese/global demand environment, 6) worse execution on systems business, and 7) technology fails to live up to expectations 8) FSLR capture of production tax credits fall short of expectations

Sell	807	22.84%	Sell	383	47.46%

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

# Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster<sup>R2</sup>

Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Inderperform	N/A	≥ 20%

R2Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.

BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: First Solar.

The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: First Solar Inc.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall

profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

## **Other Important Disclosures**

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments. Refer to BofA Global Research policies relating to conflicts of interest.

'BofA Securities' includes BofA Securities, Inc. ('BofAS') and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. 'BofA Securities' is a global brand for BofA Global Research.

#### General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities. This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or

financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

#### BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
