Many strategies in place to stabilize sales and grow margins

Reiterate Rating: BUY | PO: 54.00 USD | Price: 45.70 USD

Outlook looks conservative, reiterate Buy rating

BBWI reported a strong 4Q beat (see report), driven by better holiday revenues and gross margin expansion. We reiterate our Buy rating based on improving sales, margin recapture opportunity, and free cash flow generation. Mgmt initiated 1Q guidance of sales down (4.5%)-(2%), but reiterated its expectation for a sales inflection in 2H fueled by the broader rollout of new categories and SKUs. We are modeling F24E sales +0.4%. We are lowering our F24/F25 EPS estimates by 1% to \$3.35/\$4.00 but see upside potential to both sales and margins.

AUR beat expectations on strategic pricing and bundling

AUR increased 2%, exceeding expectations, driven by strategic pricing and strong customer reception to newness and holiday assortments. BBWI held promotions vs LY, offering a similar number of key events over a longer period but at shallower discounts. Going forward, mgmt intends to remain agile on pricing and leverage its fast read and react model to adjust prices as needed to attract a price-conscious customer and guided to flat AUR 1Q and modest increases for the year.

Category growth on track and loyalty program robust

New adjacencies are on track to grow nicely as BBWI continues the roll out and expand SKUs of Men's, hair care, laundry, and lip care in 2024 (see exhibit 1 for summary of timing). Home fragrance declined LSD as the category continues to normalize post pandemic outperformance, although wallflowers were up LSD on increased units. Active loyalty members also grew 30% to 37mn, and now account for 80% of sales.

Cost saves to offset reinvestments

GM increased 270bp to 45.9%, benefitting from higher AUR and 210bp of deflation benefits, partly offset by reinvestment in product. We expect continued reinvestments in product through 2024 but at a lower amount vs 2023 as BBWI laps the rollout of paraffin-free hand soaps in July and upgraded body care formulas later in the year. We model GM +30bp to 43.9% in F24E. BBWI has raised its cost savings target, with the remaining \$100m of cost savings to benefit F24 across GM and SG&A through lower transport costs, store labor and selling efficiencies, call center optimization, and lower home office expense and indirect spend.

Company Sector

Retailing-Specialty

Company Description

Bath & Body Works International is a retailer of personal care products. It specializes in candles, soaps, and lotions. The company distributes its products through retail stores, websites and partner locations. Most of its operations are in the US, with growing Canadian and international businesses.

Investment Rationale

We rate Bath & Body Works at Buy. We think inexpensive valuation, a strong and growing business given secular tailwinds (increased sanitizer/home/personal care products usage), and strong brand equity make BBWI a compelling investment.

BofA GLOBAL RESEARCH

Price objective basis & risk

Bath & Body Works Inc (BBWI)

Our PO of \$54 values BBWI at 9x our F25 estimated EV/EBITDA. We expect BBWI to withstand a consumer slowdown better than peers due to its affordably luxury stance and replenishment model. This multiple reflects its history of, and our outlook for, consistent growth. It is below consistent compounder valuations and peer multiples to reflect higher leverage and risks that pandemic-era sales will not hold.

Upside risk to our price objective is if the company is able to continue to drive strong sales growth. Downside risk to our PO is if BBWI comps decelerate further than our estimates call for.

Equity Investment Rating Distribution: Retailing Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	96	57.83%	Buy	39	40.63%
Hold	32	19.28%	Hold	12	37.50%
Sell	38	22.89%	Sell	18	47.37%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster^{R2}

Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Jnderperform	N/A	≥ 20%

R2Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
