Fries stay crispy despite ERP/inventory noise; raising PO

Reiterate Rating: BUY | PO: 138.00 USD | Price: 105.26 USD

Raising FY24-26 adj. EPS following solid 2Q

Yesterday, Lamb Weston (LW) reported 2Q24 above street on better sales and below the operating line items despite a one-time charge related to excess potato inventory (\$0.37/share hit). LW also updated its FY24 financial outlook including raising its adj EPS target for the year to \$5.70-\$6.15. Investors largely looked through the inventory reserve charge, while other concerns arouse around LW's North America ERP cutover that began in 3Q. While we expect any shipment disruptions to be contained to 3Q and LW maintained its full year volume assumptions of down MSD, we acknowledge that the shift in volume cadence likely had some impact to intraday trading. We expect to learn more as the ERP rollout continues over the coming weeks. Despite all this we are raising our FY24-26 adj. EPS estimates to \$6.12, \$6.80 and \$7.30, respectively from \$5.90, \$6.40, and \$7.00. The move higher in FY25 reflects the beat vs BofAe in the quarter and an expectation that the inventory charge is a non-recurrence next year.

NA ERP implementation in focus

At the beginning of 3Q, LW transitioned some of its central systems in North America to a new ERP system. So far the company has experienced some road bumps which should not have a material impact on the full year. Given increased production downtime, 3Q gross margin is expected to be pressured by higher manufacturing costs from reduced fixed cost leverage. We expect NA 3Q volumes to look similar to 2Q's -4%, before flipping positive LSD in 4Q.

2H24 modeling considerations

<u>Volumes</u>: We expect LW total company 3Q volumes to look similar to 2Q's -6%. Expect volumes to be positive in both segments in 4Q. <u>Gross margin</u> for the year is expected to be ~29%, implying margins of ~29.5% in the back-half. Though 3Q typically steps up meaningfully vs 2Q, the ERP transition will dampen this expansion—we model gross margin of 29.5% for both 3Q and 4Q.

Reiterate Buy rating & raise PO to \$138

Reiterate Buy rating & raise our PO from \$130 to \$138 to reflect higher estimates, still based on a 19.5x P/E multiple on our CY25 EPS estimate. This is a premium to the packaged food index at 17x. We believe a premium is warranted as LW is poised to approach pre-COVID levels with upside potential to improving demand trends and margin potential in FY24.

Food Processors

Company Description

Lamb Weston (LW) was spun off from ConAgra Foods in November 2016. LW is the leading manufacturer of frozen potato products, with over \$6.8bn in annual revenues. The company is #1 in North America and #2 globally. LW generates approximately 80% of sales in the US and Canada and 20% in international markets.

Investment Rationale

Our Buy rating is based on our view that LW should see strong sales and margin growth into FY24 supported by price increases and a favorable channel mix to offset higher costs. Volume recovery is expected towards the later part of FY24.

BofA GLOBAL RESEARCH

Price objective basis & risk

Lamb Weston Holdings Inc (LW)

Our \$138 PO is based on a 19.5x P/E multiple on our CY25 EPS estimate. This is a premium to the packaged food index at 17x. We believe a premium is warranted as LW is poised to approach pre-COVID levels with upside potential to improving demand trends and margin potential in FY24.

Potential upside risks: demand rebounds faster than expected, overall category growth remains above 2-3% allowing for tight industry supply to continue in the medium to long term. Tight industry supply allows for further price increase across both global and foodservice customers. Potato costs and cooking oils moderate.

Downside risks: 1) higher-than-expected potato costs for CY23, 2) inability to push through additional pricing to cover inflation and restore margins, 3) influx of new industry capacity, 4) slowdown in on-premise activity if the consumer has less spending power.

RI Issuers that were investment banking dients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster^{R2}

Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
nderperform	N/A	≥ 20%

Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
