Flat 2024 earnings despite 2H pick up

Reiterate Rating: UNDERPERFORM | PO: 69.00 USD | Price: 65.74 USD

Signs of improvement but flattish earnings in 2024

DuPont posted 4Q results in line with the pre-announced guide, with the strongest headwinds from a softer China macro and industrial market inventory destocking. While 1Q guidance implies y/y decline, a +13% increase in January orders for Water products vs Q4 and +10% for Safety likely indicates that 4Q was the destocking trough for those businesses, supporting a 2H recovery. We expect FY24 EBITDA to be flat y/y, with further industrial destocking and some price erosion in Shelter, being offset by recoveries in Water and Safety, as well as a broad-based electronics recovery. DuPont has been aggressively repurchasing shares (see Exhibit 2), which we expect to continue, post the Board's recent \$1bn repo authorization and a \$500mn ASR to be launched in 1Q. DuPont's share count dropped by 10% in 2023, which was only exceeded by Olin (13%) and Huntsman (15%) in our US Chemical coverage.

Electronics and Water are key growth businesses

We see more longer-term growth for DuPont's Semiconductor, Interconnect, and Water businesses, owing to robust demand and DuPont's differentiated products. We view these businesses as top-tier specialty chemicals that are priced based on performance and have proprietary differentiation (see page 3). We view DuPont's Safety and Shelter businesses as less differentiated from competing products, and thus could have more pricing pressure longer term. DuPont recorded a non-cash \$804mn goodwill impairment charge to reduce the carrying value of these businesses.

2024 EPS estimate increased

Our 2024 EPS estimate increased to \$3.55 from \$3.46, reflecting a robust 2H recovery from the aforementioned factors and elevated share buybacks. Our PO rises to \$69 (\$68 prior), based on a 20x P/E multiple of our 2024 EPS estimate, adjusted to include \$1bn in PFAS liabilities. We switched our valuation method to a P/E multiple (see Exhibit 3) rather than an EV/EBITDA multiple to be more consistent with our specialty coverage and to account for DD's aggressive share repo program. Our 20x multiple represents a comp-based sum-of-the-parts multiple, discounted for additional PFAS liability and flattish earnings growth in 2024. We see potential for multiple expansion if earnings accelerate or if PFAS liabilities are well-managed. Remain U/P.

Company Sector

Chemicals-Major

Company Description

DuPont, the former Specialty Products segment of DowDuPont, is a diversified specialty chemical company. The company operates through two primary reporting segments: Electronics & Industrial and Water & Protection. These businesses are allocated based on process technology, product application, and end market exposures

Investment Rationale

We rate shares of DuPont U/P as we see modest earnings recovery in the near-term, lower than other specialty chems comps. Further, we see additional PFAS liabilities underappreciated by the market, outside of the \$1bn liability established in June 2023.

Business outlook favors Electronics and Water

With semiconductor fab utilization rates expected to recover throughout 2024, a stabilization for end market consumption in smartphone, PC, and tablet markets may occur, driven by replacement demand and improved data center demand bolstered by Aldriven growth (positive for Semiconductor and Interconnect volume growth). Further, we expect demand for water treatment will continue to intensify as fresh water becomes increasingly scarce and water quality is increasingly scrutinized.

Price objective basis & risk

DuPont (DD)

Our price objective of \$69 per share is based on an P/E valuation of 20.0x our 2024 EPS estimate. This multiple is derived from a comp-based sum-of-the-parts multiple, discounted for the risk additional PFAS liability in excess of our forecast as well as minimal earnings growth in 2024. We then subtract off an estimated \$1bn in PFAS liabilities divided by our year-end 2024E Diluted Shares Outstanding.

Downside risks to our price objective are a further slowdown in the global economy, particularly in China, autos, and electronics, greater than expected litigation issues, failure of the Mobility & Materials divestiture to Celanese to complete on the terms announced, and failure of the Rogers acquisition to complete on the terms announced.

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster^{R2}

Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Inderperform	N/A	> 20%

R2Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
