Does construction provide more visibility than ag? Strangely, yes (into 2024)

Reiterate Rating: NEUTRAL | PO: 455.00 USD | Price: 397.02 USD

Stock reaction to a solid FQ3 underscores the ag dilemma

DE reported a solid FQ3 driven by price vs cost, tax line & execution (page 2). Shares struggled (DE -5.3% vs SPX -0.1%) on the back of 'peak ag' concerns – lowering production in Brazil, order momentum, rising inventories off the lows – in a backdrop where soft commodities are rolling over (Com -25% since end of Q1) and recent commentary in the used equipment market (old combines, rates) raises some worries.

Is construction a better place to be vs ag into 2024? Yes

Construction cycle fears were rampant just a few months ago (lending, rates, CRE, etc) yet this is one end market that feels more stable heading into 2024. We found DE's tone around C&F rather positive - order books out to 6 months (vs typically 3 months), production rates '24 flat with '23, rental refleeting, mega project tailwinds in '24/'25. In our view, underwriting tech adoption in construction equipment is a bit of a stretch (this is where farm equipment shines long-term) yet the momentum into '24 is more in CE.

Ag equip prices: we are a bit skeptical on the bearish view

There is uncertainty on large ag into $^{\prime}$ 24 (i.e., planters early orders flattish) and we expect mixed signs across regions (EU) & products (sprayers, 4WD tractors, combines). DE still expects pricing in the 2-4% range (inclusive of incentives). While pricing momentum is clearly slowing (+20-30% last two years), we would be careful on pricing expectations shifting too negative – take rates on precision ag continue to go up, industry is fairly consolidated/disciplined, inventories are rising yet not overshooting outside of small ag.

Neutral: solid execution but multiple likely 'stuck' for now

We raise our estimates following FQ3. We lower our PO to \$455 (from \$484) based on 13x 2024e EPS as believe a lower multiple is warranted given the peak ag concerns (vs 14x prior). As EPS nears a peak (BofAe \$34-36 range), we belie the multiple could be stuck in a range (11-13x) based on previous cycles. We reiterate Neutral on balanced risk/reward.

Company Sector

Agricultural Machinery

Company Description

Deere is the largest manufacturer/distributor of agricultural equipment worldwide with leading market shares in large farm-equipment segments. DE's 3 main areas: 1)
Agriculture and Turf (farm equipment, lawn and garden, other outdoor products), 2) Construction and Forestry (construction earth-moving material-handling and timber-harvesting equipment), 3) Credit (financing).

Investment Rationale

Deere is the global market leader and best in class operator in farm equipment. We see the company widening its competitive advantage in precision agriculture in coming years, which should continue to drive pricing power, improving mix, and share gains. That said we are more cautious on the farm economy as the macro economic environment shifts. We expect the C&F segment to benefit from a revival of construction activity, boost in rental capex, and potential infrastructure stimulus.

Q3 Results

3Q23 Results

DE reported a beat & raise in 3Q23. Adj EPS of \$10.20 was above BofAe of \$8.22 by 24% and cons of \$8.14 by 25%. We attribute half the beat to a lower tax rate with the other half of the beat driven by execution. Total sales of \$14.3bn beat BofAe by 2.1% and cons by 1.2%. Total operating margin of 24%, up 540bps YoY, was better than consensus estimates of 21.6%. PPA operating margin of 26.2% beat cons by 80bps, Small Ag and turf of 19.6% beat cons by 400bps, and C&F of 19.1% beat cons by 170bps. This is driven by a combination of positive price vs cost, easing supply chains, and hitting production schedules.

Updating 2023 Guidance

DE updated 2023 guidance in some segments. DE raised net income to \$9.75 - \$10bn (from \$9.25 - \$9.5bn), partly due to a lower tax rate to 21-23% (from 23-25%). Other areas of revisions: Small Ag & Turf, sales remained +5% YoY but operating margin was raised to 17-18% (from 15.5-16.5%). 2023 capex and R&D estimates were increased to \$1,650mn (from \$1,500mn) and 15% (from 14%), respectively. Pricing expectations remain steady across all segments with a bump up in C&F (raised to 11% from 10%).

EOP (Early Order Program) commentary

DE provided updates on their EOP (early order programs). While they do not have a fully formed view at this stage, we extracted some trends across a few product lines. Sprayer's EOP started in May and ended in July – DE sold out all of model year 2024 production slots with unit sales up DD YoY – this was the most constrained product in 2023, thus there is more of a rebound here. The DD increase was driven by improved supply chain conditions. Phase 2 of planters opened in mid-July with orders flat YoY (closes in August). In our view, this could be more of a proxy of underlying large ag demand as planters were less constrained last year. DE is seeing favorable mix towards larger planters and higher take rates on technology (up on a YoY basis). Combine program recently opened in August but remains too early to extrapolate any data for 2024 (closes in November). Tractor order books opened this week for 2Q24 – no data to share but the order book is currently full through the calendar year 2023 – and 4WD tractors was one of the more constrained products. In our view, the EOP trends highlight a more mixed picture heading into 2024.

Price objective basis & risk

Deere & Co (DE)

Our \$455 PO is based on 13x our FY24 EPS forecast. Our target 13x PE multiple is below the long term average range of 15-17x given the rising rate environment, lower ag commodity prices, and macro concerns. Our target multiple is above other Machinery peer multiples. We believe this is justifiable as we see a strong argument for Deere to re-rate permanently higher given improved cycle to cycle profitability underscored by the recent raising of its long-term mid cycle segment margin targets from 15% to 20%.

Risks to our PO: 1) slowdown in the farm economy due to better expected yields later this year, 2) disappointment in construction equipment, 3) peak in the the used equipment market, 4) extended improvement in commodity prices reverses, 5) ongoing supply chain disruption leads to earnings misses.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities. This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
