

Align Technology

4Q23 results come in ahead, and FY24 guided to +MSD, but visibility still limited

Reiterate Rating: UNDERPERFORM | PO: 215.00 USD | Price: 267.32 USD

4Q sales 2% ahead, adj. EPS 11% ahead of consensus

Align Technology's (ALGN) 4Q results came in ahead, with sales of \$957mn vs. BofAe \$935mn. Shipments of ~593k were slightly ahead of BofAe/Street 591k, as international growth was better than expected. Adj OpM was 17.9% vs BofAe 16.9% (with FX having a favorable impact of 60 bps), leading to Adj EPS of \$2.42 ahead of BofAe \$2.14.

2024 topline guide of MSD roughly in-line with Street

For FY24, Mgmt. initiated a revenue guide of MSD (mid-single digit) growth yoy, relatively in-line with prior BofAe/Street 5.5%/4.2%. The guide assumes both Clear Aligners and Systems & Services revenues each grow MSD. ASPs (average selling price) is expected to be up slightly (price increases and favorable FX, partially offset by a higher mix of lower-ASP non-comprehensive cases), as are volumes. On profitability, Mgmt. expects Adj. OpM to slightly improve yoy. For 1Q24, Mgmt. sees \$960-980mn of sales and Adj. OpM also up slightly yoy, with continued ramp over the course of the year driven by volume leverage. Despite initiating the outlook, and citing increased stability in markets, mgmt. still acknowledged that visibility remains somewhat limited. Our sales move higher by \$5mn in 2024 / EPS moves higher by 35c to reflect the 2024 guide.

Return to stability, and ALGN on 'offense' w. new products

At the end of the day, it's that stability in global macro / consumer sentiment that's underpinning ALGN's more constructive view on '24. At the same time, there are several new products / growth initiatives that are kicking into gear. Concurrent w/ 4Q release, ALGN announced a new iTero scanner (Lumina), which will begin shipping later in 1Q24 and could galvanize a broad upgrade cycle. Cubicure (direct-printing) is progressing, and mgmt. is excited about potential to direct-3D-print clear aligners in a few years. Palatal Expansion and the DPS (doctor subscription program) are also contributing to growth.

Raise PO to \$215 but still see too much uncertainty in '24

While the 4Q result and initial 2024 guide was better than some had expected, our model remains largely un-changed and we continue to see persisting macro overhangs. We don't believe there's enough evidence that ALGN can return to the high level of growth and profitability from prior years, due to both the macro environment and the evolving competitive landscape. Our PO moves to \$215 (was \$180; now based on 23x 2024 P/E vs. 20x prior reflecting improved growth in'24), but we reiterate our Underperform rating given challenging outlook.

Company Sector

Medical Supplies

Company Description

Align is the dominant company in the 'clear aligner' orthodontic market, where its Invisalign brand competes with traditional metal braces (also known as 'wires and brackets'). Align revenues come primarily from a family of clear aligner products (cases) used to treat malocclusion (crooked teeth and other dental cosmetic and medical issues), as well as some digital scanners, services, and noncase products, such as retainers and other ancillary offerings.

Investment Rationale

Align, in our view, has the potential to be one of the best growth stories in Healthcare as the company's Invisalign franchise can continue to take market share from traditional braces (brackets and wires). However, given the current softer environment and subsequent concerns on macroeconomic conditions and overall dental market, as well as apparently less visibility into the business and heightened risk of competition, we have an Underperform rating.

Price objective basis & risk

Align Technology (ALGN)

Our \$215 PO is based on 23x 2024e P/E, below the company's historic valuation multiple (typically 30x-50x). We believe this is appropriate as recent execution and results have thrown the growth trajectory and timing of recovery into question, and we think the company needs to re-rate lower as competition is ramping, the macro is uncertain, and rates are shifting market-wide valuation frameworks.

Downside risks to our price objective are continued slowdown in dental procedures due to the Coronavirus outbreak or the subsequent protracted economic downturn, competition from existing and new clear aligner manufacturers, slower macroeconomic conditions, multiple contraction due to fund flows or a de-risking move, and continued uncertainty around events in China.

Upside risks are meaningful share gains from traditional wire & bracket treatments, improved commercial performance, new product launches, benefits from increased sales & marketing, and stronger macroeconomic/consumer sentiment.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster^{R2}

Buy	≥ 10%	≤ /0%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

R2Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
