

AstraZeneca

FY24 guide good enough. Investor day May for mid-term outlook. Dato 2L focus call

Maintain Rating: BUY | PO: 14,500 GBp | Price: 10,490 GBp

FY23 miss on SG&A; 24 guide implies EPS c1-2% below

Key takes from FY23 results and guide: 1) FY23 EPS \$7.26 marginally below consensus and \$42.8bn product sales in line consensus, although small misses for Tagrisso, Imfinzi and Calquence, and worse margins on SG&A (IR flagging 3 new NME approvals), offset by tax; 2) FY24 guide implies EPS of c\$8.00, 2% below consensus on Fx and lower base, but we think good enough given recent debate; 3) FY25 catalyst path disclosed for the first time, and includes: a) Dato 1L NSCLC (AVANZAR); b) Enhertu DB-11, 09 and 05; c) Camizestrant SERENA-6; d) Eplontersen ATTR-CM; 4) No material pipeline updates; 5) Investor day May 21st, with potential for mid-term outlook/ discussion to clarify prior high-sd sales CAGR commentary vs consensus low-mid sd; 6) Slides mention on track for ambition for mid-30's operating margin in the mid-term, we expect AZN to frame as 25/26E timeframe. Maintain Buy on attractive valuation for premium growth prospect.

FY23 EPS \$7.26 slightly light on higher SG&A

1) FY22 EPS of \$7.26 in line (3% miss in the quarter) on product sales \$43.8bn also in line. Worse margins with operating profit 3% miss (on SG&A 10% larger for the Q on 3 new NME approvals, and R&D 4% larger), but with tax offsets below the line; 2) Sales in line on Pulmicort (10% beat, driven by China) and collab revenue 13% ahead, offset by misses for Tagrisso (1% on year end hospital ordering in China / Australia mechanism vs Zoladex), Imfinzi (1%) and Calquence (1% on some GTN pressure).

FY24 guide implies EPS c\$8.00. Good enough

AstraZeneca guided to 1) Total revenue growth increase by low double digit to low teens percentage with a low-sd Fx -ve, implying total revenue of c\$50.4bn, in line consensus; 2) EPS guide is for low double digit to low teens percentage with a low-sd Fx -ve, implying EPS of c\$8.00, 2% below consensus on 1% lower Fx and slightly lower base. Consensus is close to top end of guide. Pillar 2 impact on tax rate expected to be impaterial

Busy FY25 catalyst path coming into debate - Dato 1L

From mid-year we see a big FY25 path coming into focus: Specifically: 4) Dato 1L NSCLC (AVANZAR) data, we think given rapid trial recruitment; 2) Three Enhertu reads with DB-11 (neoadjuvant HER2+ve, a \$1.2bn opp) DB-09 (1L HER2+ve mBC, a \$2.5bn opp) and DB-05 (post-neoadjuvant HER2+ve, a \$1.5bn opp); 3) Camizestrant SERENA-6 in 1L ESR1m Breast cancer, a \$1.8bn opp; 4) Eplontersen ATTR-cardiomyopathy; 5) Tozorakimab (IL-33) acute respiratory failure.

Key topics for the call. Focus Dato 2L

1) Reiteration of Dato confidence. Next TLO1 milestones include: a) Acceptance of filing 1Q24; b) Clarification of final OS timing 1H24, in our opinion; c) Final approval 2H24; d) Commercial launch to confirm >\$2bn potential; 2) Confidence in mid-term, specifically high-sd sales CAGR to end of the decade, and mid-30's margin; 3) Clarification of IRA impact, expected to be broadly neutral in contrast to recent broker comments.

Best GARP with Best pipe. 24 guide & catalyst path debate

Buy for attractive valuation (14.0x 25E PE) for premium growth prospect (12% FY25-28 EPS CAGR), with best-in-class mid-stage pipeline. We see two near-term clearing events; 1) 24 EPS guide (with guide good enough), and 2) Dato filing and approval. While the catalyst path is quieter than FY23; 1) We believe lack of binary events attractive for investors to re-engage; 2) The catalyst path is still busy relative to EU pharma broadly (with most important Imfinzi and Capivasertib beats, Dato 2L lung launch, Enhertu DB06, Tagrisso LAURA). From mid-year we see a big FY25 path coming into focus: Dato 1L lung, Enhertu DB09/11/05, Camizestrant SERENA-6, and first Eplontersen data.

BofA GLOBAL RESEARCH

Price objective basis & risk

AstraZeneca (AZNCF / AZN)

Our PO of GBP145 (US\$88) is based on c19x FY25E PE, ahead of our target sector multiple of c16x due to potential for premium growth (11% 25-28E EPS CAGR vs sector c7%) and significant pipeline optionality.

Our target sector multiple of c16x 25E PE is based on: 1) A 40% premium to the market average multiple which implies c15x 25E PE, a premium which is in line with the long-term historical trend for periods of growth for the sector during times of broader market uncertainty, 2) Regression analysis of historical sector forward PEs and three-year-forward EPS CAGR implies a target PE of c16x 25E PE based on sector growth of c7%, 3) Our DCF valuations imply c17x 25E PE

Upside risks to our PO are better-than-expected EPS momentum driven by better execution on product launches and pipeline success.

Downside risks to our PO are pipeline failure, risk of litigation, adverse currency moves, greater margin pressure driving EPS miss and a failure to inflect key product launches.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
