AN'other green flag with 4Q beat - first take

Maintain Rating: BUY | PO: 255.00 USD | Price: 153.88 USD

4Q:23 results beat on strong execution

AN reported adj. 4Q:23 EPS from cont. ops of \$5.02, above our estimate of \$4.85 and consensus of \$4.93. The beat was driven by better new vehicle gross profit per unit (GPUs), and higher gross margin, same-store sales growth in Parts & Service (P&S), and strong execution. EPS was also helped by a lower tax rate (22% vs. BofAe 25%). Share count was slightly higher than our forecast. In 4Q:23, AN repurchased 1.15mm shares by deploying \$151mm of capital, bringing total repurchases for FY23 to \$864mm for a share count reduction of 13%. The US auto market also continues to recover with total industry unit sales up 7% YoY in 4Q to 3.8mm or 15.5mm on a SAAR basis. Strong execution and efficient capital allocation (share buybacks) continue to be positives. We maintain our Buy rating.

New and P&S same-store sales strong, Used weaker

Total same-store sales decreased 1.2% YoY in 4Q:23 (BofAe -0.2%), with YoY increases in New vehicle same-store sales and Parts & Service offset by sizable declines in Used vehicle same store sales. New vehicle same-store sales increased 5.2% YoY, above BofAe of +2.4%, driven by a 5.7% YoY increase in New vehicle units, partially offset by a 0.4% YoY decrease in revenue per unit. Used vehicle retail same-store sales declined -14.8% YoY, weaker than BofAe at -7.7% YoY, driven by a -7.8% YoY decline in unit volumes and a -7.6% YoY decline in revenue per unit. Same-store F&I sales were down -1.7% YoY, a bit worse than our forecast (BofAe -0.9%). This was driven by the YoY decrease in vehicle volumes while F&I per vehicle retailed (FIPVR) was relatively unchanged YoY (-\$6 YoY) on a same-store basis at \$2,696 vs. our \$2,650 estimate. Parts & Service same-store sales growth was solid in the quarter with an 8.7% YoY increase, better than our estimate of +7.5%.

New GPUs more resilient than feared, Used GPUs soften

Total gross margin of 18.0% was above our 17.8% estimate with better gross margins on New vehicles and P&S. New gross margin of 7.0% was down -370bps YoY, but still above our 6.8% estimate. Used retail gross margin of 5.3% was below our 5.8% forecast, and down 40bps YoY. P&S gross margin of 47.3% was ahead of our estimate of 47.0%. Grosses on a per unit basis were relatively solid as total New gross profit per unit (GPU) decreased -\$1,980 YoY to \$3,653 (BofAe \$3,448). Total Used vehicle GPU declined \$392 YoY to \$1,455, (BofAe \$1,729), weaker than expected as it appears the market softened and mix eased. We forecast continued "normalization" of New GPUs through the end of 2025, but expect to settle above pre-Covid levels in the mid \$2,000s.

Cost execution still solid with continued investments

Adjusted SG&A as a % of gross profit of 65.1% deteriorated 640bps YoY but was largely in line with our estimate of 65.0%, driven by new business initiatives and investments in technology. The still low SG&A demonstrates that at least some of the cost removed in 2020 at the height of COVID was more structural in nature. AN closed out FY23 with SG&A as a % of gross of 62.7%, ~860bps below the 2010-2019 average of 71.3%.

BofA GLOBAL RESEARCH

Price objective basis & risk

AutoNation, Inc. (AN)

Our price objective of \$255 is based on a P/E multiple of roughly 11x on our 2024 estimates, which is about in-line with an average dealer through-cycle multiple. We believe this is appropriate in light of the ongoing recovery in the US/NA automotive cycle following the COVID-induced trough in 2020, which should translate into revenue and earnings growth across the dealer vertical over our forecast period.

Downside risks: 1) a swift and/or material downturn in US sales, 2) poorer-than-expected cost performance and margin compression, 3) a stoppage in share repurchase activity or material sell-off by key shareholders, 4) higher interest rate environment causes material demand deterioration and/or repossessions 5) consumer dissatisfaction with auto retailing, and 6) the potential for franchise law and/or consumer finance law changes.

Upside risks: 1) US/NA cycle recovers and plateaus at a high level of sales, continues growing, or even declines less than expected, 2) AN is able to gain or even just maintain gross profit per unit in its new and used vehicles businesses, 3) standalone used vehicle stores capture some demand and drives top line and earnings growth beyond the peak in new vehicle sales, and 4) interest rates decline quicker than expected, stimulating demand in 2H23.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster^{R2}

Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

R2Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
