# Expanding commercial air via CIT acquisition; Reit Buy; PO stays at \$115

Reiterate Rating: BUY | PO: 115.00 USD | Price: 102.85 USD

#### \$2bn all cash deal expands APH's commercial air portfolio

Today Amphenol (APH) announced a definitive agreement to acquire Carlisle Interconnect Technologies (CIT), a business of Carlisle Companies Incorporated (ticker: CSL, not covered) for \$2.025bn in cash. The transaction is expected to close by the end of C2Q24. APH noted that CIT's 2024 sales should be ~\$900mn, an adjusted EBITDA margin of ~20%, and should be EPS accretive in the first full year after closing. We estimate (Figure 1) an OM% of 12% in C2H24 then an ascending margin to 15% by the end of CY25 (slower rate vs. FCI but could be conservative). Based on that and a cost of funding the transaction at 5.0% to 5.5%, we see the transaction adding \$0.03 to APH's CY25 EPS with potential room for upside based on execution. The deal would not significantly change overall leverage for APH and we see continued room for incremental M&A as opportunities present themselves. The recent M&A has focused across a variety of segments and end-markets, which should not create meaningful execution risk. We reiterate our Buy rating on APH given strong execution, improving margins, and a period of above trend growth.

#### **Expanding APH's commercial air end-market**

We estimate that APH's annual commercial air revenues will double with the purchase of CIT by APH. More than half of the \$900mn revenue from CIT is in the commercial air end-market translating into ~\$450mn in additional commercial air revenue (Our current CY24 APH commercial air revenue estimate is \$429mn).

#### Industrial end-market expansion

Nearly 40% of the acquired revenues fit into APH's industrial end-market which would be a 11% increase to our already \$3.3bn estimate for CY24 industrial revenue. The Industrial end-market has seen weakness in recent quarters for APH, posting negative organic growth of -9%, -11%, and -8% y/y in C2Q23, C3Q23, and C4Q23. Much of the industrial end-market revenue from CIT is in the medical space.

### Estimates unchanged until deal close, PO stays at \$115

For now, we keep our ests unchanged. PO stays at \$115 on 32x our C25E EPS of \$3.61.

#### **Company Sector**

Connectors, Passive Components & Distribution

#### **Company Description**

Amphenol (APH) is the world's second-largest maker of electronic and electrical connectors. APH is the world's leader in high-performance environmental connectors (mainly for military and commercial aircraft). APH has expanded its communications offering to include interconnect products for handsets and communications infrastructure. APH is the world's second-largest producer of coaxial cable used in the cable television (CATV) industry.

#### **Investment Rationale**

Amphenol is a leader in the connector industry with a track record of consistent execution, high ROIC and operating margins (20%+) that approaches the low end of software companies despite very conservative accounting standards. We expect strong organic growth over the next few years, primarily driven by high-single to low-double-digit growth in Auto and Industrial, augmented by M&A and subsequent operating leverage.

#### Price objective basis & risk

#### Amphenol (APH)

Our \$115 PO for the shares of APH assumes the stock trades to 32x our C2025E EPS. A 32x multiple compares to the historical range of 17x to 29x, with the average being 21x. In our opinion, APH deserves a premium multiple relative to peers given its very conservative accounting. We think the company should continue to generate cash flow from operations (by targeting L/T incremental margins of 25% or more) on a consistent basis that it could use for further acquisitions, debt pay down, or to repurchase stock. Without completing any acquisitions, we believe debt would continue to decline as a percentage of capital.

Downside risks to achieving our PO are a slower recovery of end markets (although APH's diverse customer base and product set provides an offset), slower military spending, and slower recovery in the demand for high-end information technology. Raw materials also remain a risk as APH consumes a significant amount of gold, copper and resin.

#### Equity Investment Rating Distribution: Global Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

# Investment rating Total return expectation (within 12-month period of date of initial rating) Ratings dispersion guidelines for coverage cluster<sup>R2</sup>

Buy	≥ 10%	≤ /0%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

R2Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

#### BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
