4Q23 Wrap: Solid quarter & positive guide; Early action on costs paying off in 2024

Reiterate Rating: BUY | PO: 30.00 CAD | Price: 23.40 CAD

4Q23 adj. EBITDA and FCF beat estimates.

TELUS reported solid 4Q23 financial and operating results. Adj. EBITDA and free cash flow were ahead of estimates and subscriber growth remained strong in a highly promotional 4Q. TELUS took action in mid-2023 to address competition and costs which will contribute to growth in 2024 as the benefits are realized. The Lifeworks integration and synergy capture should also contribute to margin growth. Cost savings should help adj. EBITDA grow at twice the rate of revenue in 2024.

2024 guidance in-line with expectations

In a change from prior years, TELUS provided guidance for the Ttech segment where it expects revenue and adj. EBITDA growth of 2-4% and 5.5-7.5%, respectively. Consolidated growth will be similar. TELUS expects to spend \$2.6bn on capex plus an additional \$0.1bn on real-estate development. Over time, TELUS expects to benefit from real-estate rationalization related to its copper decommissioning and central office closures. Further benefits are expected by rationalizing office space as well. TELUS is guiding to free cash flow of \$2.3bn.

Small positive changes to 2024 estimates

We adjusted our estimates to reflect 4Q results and the 2024 guide (see exhibit 1 on page 3). Our consolidated adjusted EBITDA estimate increased 0.8% to C\$7.6bn from C\$7.5bn and our free cash flow estimate increased 1.9% to C\$2.35bn from C\$2.31bn. In 2024, we forecast 390k mobile phone net adds and 136k broadband net additions, which represents ongoing solid underlying subscriber growth.

Reiterate Buy and C\$30 price objective

We reiterate our Buy rating and C\$30 price objective. Ongoing network investments and digital transformation initiatives position TELUS to grow subscribers, control churn, and improve margins. Financial flexibility is improving as FCF will exceed dividends in 2024.

Company Sector

Telecom Services-Wireless/Cellular

Company Description

TELUS is Canada's second-largest incumbent telco, with three principal business segments: 1) a national wireless service provider (one of three) with a market share of about 30% (on a network shared with BCE), 2) the incumbent wireline telecom business in Canada's two western provinces and eastern Quebec (home to a total of 8mn people, or 25% of Canada's population), and 3) non-ILEC businesses (agriculture and health) reported within the telecom segment.

Investment Rationale

TELUS is well positioned to benefit from wireless market growth as wireless penetration (at 90%) rises closer to the developed market average (at 120%). Investments TELUS has made to deploy fiber to the home (over 80% of footprint) and to grow subsidiaries within TELUS wireline should drive superior revenue growth, margin expansion, and free cash flow growth.

BofA GLOBAL RESEARCH

Price objective basis & risk

TELUS Corporation (YT / TU)

Our C\$30 (US\$22) price objective is based on a forward EV/EBITDA of 9.3x, which is a premium to TELUS's historical average of 8.2x but within its range of 6.9x - 9.8x. We believe the premium is justified by its higher growth, more attractive business mix, and solid execution.

Downside risks to our PO are a decline in historically high sector multiples, an acceleration of wireless margin/average revenue per user (ARPU) compression in a maturing and competitive market, ARPU pressure from more aggressive regulation and competition from Freedom Mobile, further economic slowdown in Western Canada, and, in the wireline segment, and failure to show progress in expanding cash flow margins.

Upside risks are better-than-expected revenue growth driven by strong execution, with the key drivers being continuing investments in fibre-to-the-premise (FTTP) and increasing wireless data consumption, and better-than-expected improvement in wireline cash flow margins.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
