The company's niraparib/ripretinib/omadacycline/efgartigimod alfa recorded sales of RMB70.8mn/3.8mn/15.9mn/3.0mn in Jan 2024, implying YoY change of 23.7%/77.2%/243.4%/na and MoM change of 22.6%/-2.8%/45.7%/61.0%.

We have cut our long-term revenue estimates for the company owing to the concern about the potential fierce competition in the PARP inhibitor market and further penetration of Optune. We lower our PO from US\$31.0/HKD24.02 to US\$25.7/HKD19.92 and reiterate our Buy rating given the company's on-track development and solid sales performance.

#### Price objective basis & risk

#### Zai Lab (ZLAB / XCDZF)

Our price objective is US\$25.7/HK\$19.92 for ADR/H-share. We use discounted cash flow (DCF) methodology to assess the equity value given the company just started to generate sales and the majority of its value comes from future drug sales. We assume 15.9% WACC, a terminal growth rate of 3.5%, 5% debt and 95% equity financing (we assume equity issuance would be the major financing approach), 4% risk free rate, 7% equity risk premium, 3.4% cost of debt, 15% long-term effective tax rate, and a derived cost of equity 16.6%. We assume a beta of 1.8.

Downside risks are (1) Zejula or Optune sales below expectation, (2) Late-stage pipeline product approval delay, (3) COVID-19 impact longer than thought.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).
