

## Knife River Corp

## **Sharpening the Knife: Initiate at Buy**

Initiating Coverage: BUY | PO: 81.00 USD | Price: 62.45 USD

### Turnaround bearing fruit ahead of schedule

We initiate coverage of Knife River with a Buy rating and \$81 PO, implying 29% upside. KNF is a leading (top 10) national producer of aggregates, ready-mix concrete, asphalt, and contracting services. It operates across Pacific, Northwest, and Mountain regions with little overlap from larger public peers. Its end markets also skew heavily towards public works projects, and we expect KNF to benefit from healthy state budgets and infrastructure spending. Spun off from MDU Resources in June, KNF has executed very well on Ops improvements since then. We expect its turnaround efforts to continue to show through in cost controls, and (importantly) EBITDA margin (+270bps YoY 2023 EBITDA guide) as it scales up its materials business & grows into its (largely public works) contracting exposure. We think KNF has a clear path forward as a consolidator and value compounder utilizing its EDGE initiative (see exhibit 3).

#### Construction material markets are favorable

KNF has delivered record gross profit per ton in its first months as a standalone company, with pricing across some products broadly in line or above that of large public peers despite shipments being ~20% below peak. We think this is a function of compounding price growth as standardized best practices are put in place, high barriers to entry, lack of substitution, & operational efficiency initiatives. This positions KNF well to benefit from a materials/construction upcycle.

## Strong M&A record, ample FCF to drive consolidation

KNF is the leading materials producer in most of its territories, however that translates to just 30-40% share. This gives it a wide runaway for M&A. (the firm has a long history of M&A, itself formed from 80+ smaller regional companies.) unconsolidated markets and stable FCF align well to M&A. Knife River expects to further consolidate and build scale. Historically transactions have averaged  $\sim$ \$30mn or less (\$153mn op cash YTD).

## KNF trades at a discount despite recent share price gains

While KNF's shares are up 70% since the spin-off, it continues to trade at a discount to peers/recent transaction in the space. Our PO is based on 11.0x 2024E EV/EBITDA. By contrast, pure play aggregates such as VMC and MLM trade at 14-16x. ROAD (asphalt/paving/contracting work) trades at 11-12x as its pricing power is more limited vs upstream aggregates. CRH Plc recently purchased \$2.1bn of cement and ready-mix concrete assets in Texas from MLM at 12.4x EBITDA.

#### **Company Sector**

**Building Materials** 

#### **Company Description**

Knife River is a leading provider of aggregate based construction materials and contracting services. The firm is vertically integrated, with aggregates used in downstream products such as ready-mix concrete and asphalt. Knife River operates primarily in the Pacific, North West and Mountain regions, targeting high-growth mid size markets.

#### **Investment Rationale**

We rate Knife River shares at a Buy. With the split from MDU, there is room for greater focus on operational improvements, driving margin and earnings. The operational improvements come at a time when non-residential construction is underpinned by stimulus and other factors driving a sustained period of growth. We believe investors are likely to appreciate KNF's ability to drive operational improvement, favorable territories and favorable relative valuation vs other public aggregate names.

\* For full definitions of *IQ*method <sup>SM</sup> measures, see page 15.

## Sharpening the knife

We initiate coverage of Knife River (KNF) with a Buy rating and \$81 PO. KNF is a leading (top 10) producer of aggregates, ready-mix concrete, asphalt, and a contracting services provider. Aggregates (i.e., crushed stone, sand, gravel) are used across all types of construction, and much of Knife River's aggregate production is used internally. We see structural and cyclical factors underpinning a sustained period of growth and margin expansion. Knife River spun off from MDU Resources on June 1, 2023 and the renewed focus has already driven operational improvements, as KNF addresses its less favorable historical operating methods, and standardizes best practices across regions. Addressing low hanging fruit, should help KNF to capitalize on the structural drivers of aggregate demand in the coming years (infrastructure funding etc.), with valuation set to improve alongside margin, mix, and FCF generation.

### **Investment positives**

#### Making progress quickly; Delivering early against margin targets

KNF is delivering against targets outlined at its May 2023 Investor Day. Updated guidance for 2023 has EBITDA margin (15.1% vs 12.4% 2022) just above 2025 projects at the Investor Day (15%). KNF is well on the way to a long-term target of 20%.

#### End markets remain resilient; Infrastructure should provide a nice tailwind

KNF's end markets skew heavily toward public works projects, backed by infrastructure stimulus and state budgets. We expect momentum across markets to drive low single digit annual shipment growth in the out years given healthy state budgets, Infrastructure funding, and growth in mega-projects. Expected rate cuts by the Fed this year could help drive demand.

#### Plenty of runway for consolidation in territories

While KNF is the leader across the majority ( $\sim$ 70%) of the markets it operates in, there is room for consolidation as that position translates to  $\sim$ 30-40% share. Transactions have averaged \$30mn or less, leaving room for several a year funded from FCF.

#### Discount to peers

Knife River is trading at a discount to peers. The firm trades at a 5x discount to aggregate heavy names MLM and VMC, and a 2x discount to asphalt and paving firm ROAD and recent cement/ready-mix concrete transactions in the space.

#### Investment concerns

#### Portfolio mix

Knife River is an aggregate based business, but most of revenue comes from lower margin downstream products (concrete, contracting, asphalt). Given that, the company is working to increase 'high quality' (pricing, barriers to entry) aggregate exposure (page 5).

#### **Geographic Mix**

KNF's operating states tend to grow faster than the US average. That said, many are prone to more severe winter weather (vs ROAD with SE exposure) introducing more seasonality. Some states (e.g. CA, IA, HI) are growing slower than the national avg. Additionally, recent gains in ready-mix and asphalt pricing have brought KNF largely in line with peers, potentially limiting upside from pricing in these materials going forward.

#### Growth risks: higher rates cool housing and knock-on impact to non-residential

With the significant rise in interest rates, segments of residential (e.g. multi-family) are expected to slow. While non-residential remains resilient, the potential for rates to weigh on growth remains, which could result in a lower growth outlook for Knife River

#### Limited history as an independent entity

Knife River has little track record as an independent firm. While the company has made progress in driving pricing/margins, operational improvements/execution risks remain.

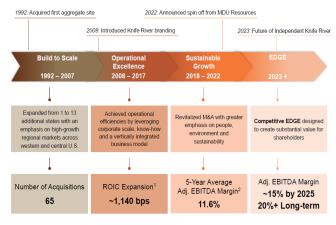

## A brief History of Knife River

Knife River began as a coal mining firm, with its first aggregate purchase coming in 1992 as part of MDU Resources group (acquired in 1985 as part of Montana-Dakota Utilities). The firm stopped supplying coal in the 90's, pivoting to create an aggregate based company. Over the course of 15 years, 65 firms were acquired to become the base of Knife River today. The firm operates in the North central, Mountain and Pacific Northwest of the US, with a focus on mid-size, high-growth markets. Knife River focused on driving return on capital with the reformatted business, driving ROIC up 1,140bps from 2008-2017. Post 2017, KNF pivoted back to being more acquisitive (80 acquisitions in total) to build scale in its core markets and drive sustainable growth.

BofA GLOBAL RESEARCH

## **Exhibit 2: Knife River's Operating geography**Knife River operates in mid-size high-growth markets

Source: Knife River Investor Day

BofA GLOBAL RESEARCH

## Post spin evolution: ability to refocus on performance

As a subsidiary of other firms, the typical priority for Knife River was to feed cash into the parent company given its strong FCF profile. With the spin-off, Knife River is now able to utilize its FCF to re-invest more heavily in operational improvements, drive aggregate revenue (and reserves) continue disciplined M&A, and implement best practices and standards across the footprint.

#### **Exhibit 3: EDGE framework for value creation**

Knife River has already met some 2025 targets this year

Source: Knife River Investor Day

BofA GLOBAL RESEARCH

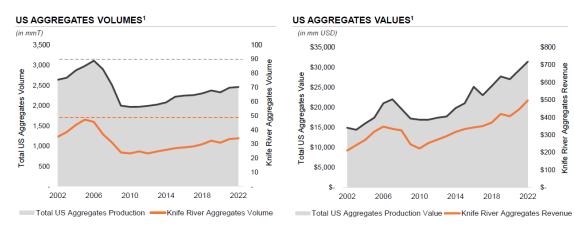

## Aggregates: high quality asset

In our view, industry dynamics for aggregates (19% of 2022 gross profit) are highly favorable with high barriers to entry (zoning, regulations, environmental opposition, 'not in my backyard' complaints, 10-year permitting process), pricing power, and fragmented (~5k firms) markets. A growing mix of materials (focused on aggregates) underlies our positive long-term outlook for Knife River. KNF is the leading supplier of aggregates in ~70% of the markets it serves. Aggregates (primarily crushed stone, sand, and gravel) are used in virtually all types of public and private construction. There is no economical replacement for these aggregates, making for a stable, predictable business.

The US aggregate market totaled \$31bn in 2022 (exhibit 4). Overall aggregate volumes in the US peaked at ~3bn tons before the global financial crisis and current volumes remain about 20% below peak despite a recovery the past decade. Volumes for Knife River have largely mirrored the national average, with capacity remaining across the industry. Coming out of the most recent recession (2009/10), it was a very slow recovery with fits and starts between residential vs non-residential vs public construction. For example, the aggregates shipment CAGR is just 2% over the last decade as the industry was hit hard from the housing-led recession. We believe volume growth can be higher this recovery. When one looks back at prior cycles (ex 2009/10), shipment growth was in the 5-6% CAGR range from the 1990s-2006.

### Exhibit 4: Aggregate market volumes and values

Volume still well below peak

Source: Knife River Investor Day

BofA GLOBAL RESEARCH

Volumes remain below prior peak, however revenues have grown. KNF's Revenue is 43% above prior peak despite lower volumes (pricing discipline), raising profits through cycle. These characteristics underscore the high-quality nature of the aggregate industry. While demand of aggregates can be volatile and cyclical (i.e., residential construction, public infrastructure, weather/project), aggregate pricing typically rises each year, even in recessionary environments. Profit-per-ton continues to rise to new highs despite below peak shipment per ton suggesting the industry is well positioned for an upcycle.

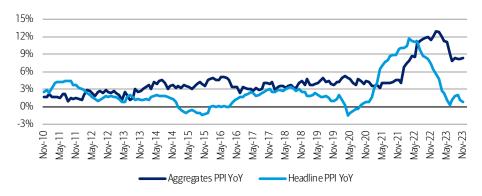

## Pricing power outpaces CPI/Inflation

Aggregates pricing typically outpaces CPI on a YoY basis going back the last few decades (exhibit 5). Early in the pandemic pricing lagged CPI trends somewhat, but the trend has reverted in recent months. Aggregate pricing is likely to accelerate to help close the gap. KNF expects continued price growth. The cyclical demand backdrop for aggregate shipments is likely to improve over the next few years, setting up a better environment to push higher-than-normal price increases.

#### Exhibit 5: PPI Data YoY (sand, gravel) vs CPI YoY

Aggregate pricing generally outperforms CPI

Source: Bloomberg

BofA GLOBAL RESEARCH

### Downstream products and vertical integration

While Knife River is focused on growing aggregate exposure, the firm has notable exposure to downstream products which use aggregates as a primary ingredient, providing an 'internal customer' for produced aggregates and providing stability. Contracting services in turn provide a steady customer for downstream products. In total ~40% of aggregates produced are used in Knife River's downstream products, which also supply the firm's contracting services. While peers have shifted focus somewhat to more 'pureplay' aggregates, Knife River remains committed to vertical integration, with the firm co-mingling aggregate, asphalt, and concrete facilities where possible. By combining facility locations, all three product operations can be serviced by overlapping staff and equipment populations.

#### **Exhibit 6: Value creation through vertical integration**

Vertical integration provides reliable pull-through

Source: Knife River Investor Day

BofA GLOBAL RESEARCH

#### **Concrete and asphalt**

Ready-mix concrete (~24% of 2022 gross profit) and asphalt (~12% of 2022 gross profit) make up a notable portion of Knife River's earnings. On the ready-mix side, Knife River sources cement offshore and acts as a distributor in a small number of cases in the Pacific region. By weight 80% of ready-mix concrete and 95% of asphalt are comprised of aggregates. Overall, we believe the downstream assets are 'lower quality' relative to upstream aggregates (i.e., aggregates are a key input to asphalt, ready-mix). However, we recognize the value of vertical integration benefits provided by these segments (multiple bites at the apple). additionally Knife River has seen notable pricing growth across ready-mix concrete and asphalt. In ready-mix the firm has seen averages prices that are higher than that of its larger public peers. In Asphalt, Knife River remains largely on par with larger public peers.

#### Exhibit 7: Ready-mix and Asphalt pricing

Knife River's pricing has kept up with that of larger peers

BofA GLOBAL RESEARCH

#### Contracting services: A public spending centric downstream materials market

Knife River acts as a general contractor and subcontractor for mostly 'horizontal' construction (streets, highways, airports, bridges). Services generally include aggregate laydown, asphalt paving, site development, concrete construction, and the manufacturing of pre-stressed concrete products. In 2022, 77% of the firms contracting service revenue was driven by public spending, with Knife River typically seeing between 60% and 90% of contracting work from public sources since 2007. The largest customers tend to be DOTs, with the top 15 customers comprising 20% of revenue. While KNF takes on a wide range of projects, the majority is paving (highways/runways) with 70% of produced asphalt sold to contracting services; a capital light business.

#### Other: Energy Services is small but a good contributor to performance

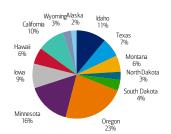

The other segment consists of Knife River's Energy Services business, South Region (Texas) and Corporate Services. The Energy Services business was purchased in 2005 and supplies liquid asphalt (the binding agent used alongside aggregates to produce asphalt mix). Knife River owns 5 (liquid asphalt) terminals where the firm stores and manufactures products. Knife River expects the Energy Services business to continue to contributor to 2024 EBITDA (carry forward contracts into 2024 shipping season), remaining above average, but below the levels seen in 2023. Strength in the business has been driven by favorable market pricing, and an exceptional bidding season.

## Knife River's positioning

Knife River operates across 14 states (exhibit 8), in the Pacific, Northwest, Mountain and North Central regions. the firm targets mid-sized, high-growth markets (exhibits 9-10), and has little overlap with larger public peers in the construction materials space. Mid-sized markets tend to be less volatile than large metropolitan locations, which has helped KNF weather downturns. As shown in exhibit 11, peak to trough declines for revenue and EBITDA margin from 2007-2012 for KNF were more resilient than peers.

BofA GLOBAL RESEARCH

#### Exhibit 11: KNF is more resilient than peers through a downturn

KNF saw milder peak to trough declines vs peers

Source: Knife River Investor Day

BofA GLOBAL RESEARCH

Knife River's revenue mix is currently 62% materials and 38% services, with material sales well distributed across products. Over time KNF should begin to more closely resemble larger public peers, as the firm continues to place an emphasis on aggregates, and higher mix of materials relative to contracting services over time.

#### Exhibit 12: Revenue mix last FY

KNF is looking to increase aggregate exposure, and 'grow into' its contracting services business

## Public spending is supportive

Of the 14 states in which Knife River operates, 11 have passed local state funding packages in the last 12-18 months. The passage of the IIJA (exhibit 13) does help drive projects for KNF, however the most important portion of the IIJA is the matching dollars states can secure from the Surface Transportation Investment Program, which provides local jurisdictions with federal funds. As an example, Caltrans (California Department of Transportation) was allocated \$14.8bn in IIJA funds towards projects which Knife River will be bidding on. The IIJA also backs larger \$200-\$500mn projects, which will benefit KNF as a materials provider, and subcontractor to larger firms. Additionally, Texas announced a record \$142bn investment in transportation infrastructure, including 10-year \$100bn statewide roadway construction plan.

#### November contract awards remain steady; up 2% YoY

According to ARTBA (exhibit 14), the total value of state and local government contract awards in November was \$7.3bn which was up 2% YoY. In our view, this is a proxy of infrastructure construction. On a YTD basis, contract awards are up 9% YoY. More specifically, contract awards are at approximately \$115.7bn YTD, 9% above the record levels seen in 2022, and 38% above 2021. Most modes are tracking higher YTD, with Waterways up 107% and Highways & Pavements up 9%, which remains a positive tailwind as we enter 2024.

#### ARTBA forecasts 2024 contract awards to grow 14% YoY

According to ARTBA's annual market outlook, Highway & Pavement construction is expected to grow at double digits for the second year in a row - reaching \$126bn (+16%)

YoY) in 2024, with growth supported by early IIJA projects getting to major construction phase and increases in state revenue sources to both match federal funds and provide additional investments. ARTBA projects the total value of overall transportation construction work to grow from \$187bn in 2023 to \$214bn in 2024 (up 14% YoY - see: Ex. 1). Other sector increases include: Rail & Transit \$26.9bn (+6% YoY), Bridge & Tunnel \$26.4bn (+17% YoY), Airports \$29bn (+14% YoY), and Waterways \$5.7bn (+9% YoY).

#### Limited residential exposure

Knife River has limited Residential construction exposure. Just 6% of backlog as of the time of the spin-off was tied to residential construction. While Knife River does have more exposure to residential construction in the ready-mix concrete business, the firm tends to target higher specification projects vs regionally family-owned peers in their territories, limiting their residential exposure.

#### Exhibit 13: Approved funding helps drive upside

Federal funding drives local and state budgets

## Post spin focus: clearing low hanging fruit

Knife River's Edge framework (exhibit 3) outlines the vision for near and long term margin improvement and value creation. Much of the process is focusing on optimizing internal processes and implementing best practices into the firm's operations. Historically, under MDU Resources, each of Knife River's regions operated largely autonomously, with each making decisions for their territory. Practices varied between regions. Under EDGE, Knife River is centralizing and implementing standardized best practices across territories, leveraging the learnings each region has made, and aligning incentives along margin expansion. KNF's current scale (80+ acquisitions) also allows it enough density to price quality transportation, and price in additional services in a more rigorous fashion than it had historically. Overall, KNF is focusing on two primary levers to drive margin expansion: 1) pricing and 2) cost controls.

## Organic initiatives

#### **Pricing**

Price has been a point of strength for KNF, with pricing up mid-teens across materials YTD. Historically it was commonplace for price increases to be set once or twice a year via calls to sales/letters/at the scale. This less rigorous process left some price on the table. Knife River is now implementing standardized more dynamic pricing methods. Overall, recent price increases have been more on par with that of peers, with Ready-mix concrete ahead of larger peers. On the contracting side, KNF is bidding on projects with a renews focus on margin profile and forgoing some projects with lower margin profiles.

#### **Exhibit 15: Pricing by product**

KNF has maintained pricing in line with larger public peers

#### Cost controls

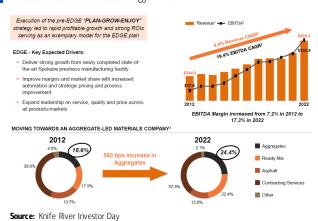

Knife River has formed PIT crews (Process Improvement Teams) across its regions. these teams combine product line experts with regional general managers to form cross sectional working groups. These PIT crews have taken best practice expertise from the various regions and go to each region to standardize and improve processes.

#### Northwest region a foundation for EDGE

Before the EDGE framework, KNF had implemented an improvement strategy in the Northwest region with notable success (exhibit 16), and which serves as a basis for EDGE. Over the course of a decade from 2012-2022, the region saw revenue grow at a 9.4% CAGR, while EBITDA grew at a 19.4% CAGR. The firm also drive a 580bps increase in aggregate revenue mix in this timeframe, helping EBITDA margin expand from 7.2% to 17.3%. Northwest improvement initiatives are continuing under EDGE.

#### **Exhibit 16: Northwest region roadmap**

EDGE evolved from the strategy in the NW

BofA GLOBAL RESEARCH

## Inorganic initiatives: M&A in existing territories

Knife River's markets are highly fragmented. The firm has a long history of M&A, itself formed from a rollup of smaller regional firms. High barriers to entry across aggregates, an unconsolidated market, and KNF's stable cash flow profile align well to further M&A, and Knife River expects to pursue M&A in order to consolidate its position regionally and build scale. KNF has a focus on staff retention and training ('Life at Knife' Program), and maintains strong relationships across the industry, making the firm an acquirer of choice in its operating markets.

#### Exhibit 17: Recent M&A and investments

M&A and investments have focused primarily on aggregates

#### RECENT ACQUISITIONS RECENT INVESTMENTS Expanded into strong Sioux Falls area Added ~55mm tons of aggregate Expanded market areas to Washington Sweetman Const Co reserves: 3 asphalt plants 7 ready-mix Prestress plants, with a fleet of 61 ready-mix trucks Increased scale and efficiencies with Sweetman (2023)(2018) Since acquisition, saw a 28% increase1 existing prestress operations in revenue and 20% increase1 in Best-in-class team delivered improved profitability productivity across the division Significantly expanded presence in key ~\$63mm invested strategic growth locations surrounding the Portland metro area Added ~50mm tons of aggregates reserves Honey Creek Added ~88mm tons of aggregate Replaces aggregates previously (2023)reserves; 4 asphalt plant Baker Rock purchased from third parti Since acquisition, saw a 60% increase in $(2021)^2$ Strategically important to serve Texas revenue and 59% increase in profitability operations for strong market position ints average of first four years of ownership from 2019-2022 2 Figures pertain to primary quarry site

## Management

Knife River's management team has over 26 years of industry experience on average. President and CEO Brian Gray has spent 30 years at Knife River. Mr. Gray graduated from Oregon State and went straight to work for Morse Brothers in 1993 and MDU Resources/ Knife River in 1998 after Morse Brothers was acquired by them. His prior position was as the President of Knife River's Northwest segment from 2012-2022. During his time as President of the Northwest region, the framework which led to EDGE was developed (exhibit 16). Revenue from 2012-22 grew at a 9.4% CAGR, EBITDA grew at a 19.4% CAGR, and aggregate mix increased 580bps from 18.6% to 24.4%.

VP and CFO Nathan Ring has over 20 years at Knife River and MDU Resources and was formerly Vice President of Business Development from 2017-2022.

VP and COO Trevor Hastings has spent over 27 years at Knife River and MDU Resources and was formerly the President and CEO of WBI Energy, an MDU Resources subsidiary, beginning in 2017.

## Financial outlook

#### We expect Knife River to hit its 2023 guidance

We forecast Q4 revenue of \$567mn (+5% YoY) and EBITDA of \$57.4mn (down \$8.4mn YoY). This is broadly in line with consensus (sales \$562mn, EBITDA \$56mn). We forecast EBITDA margin down YoY (10.1% vs 12.2%) in the seasonally volatile fourth quarter given higher expected separation costs in Q4 flowing through corporate support in the 'Other' segment, as well as normalizing in the Energy Service business. The overall impact is expected to be ~\$30mn. On a FY basis, our forecasts are in line with EBITDA guidance of \$400-430mn (BofAe \$420mn).

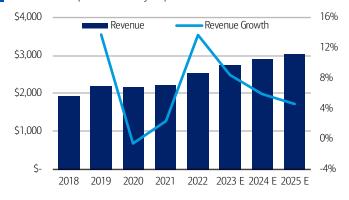

#### Recent performance, 2023 guide ahead of expectations

KNF beat Q3 expectations, with revenue, EBITDA, and EPS all well above consensus. 2023 guidance was raised significantly, with revenue of \$2.7-\$2.8bn raised 2%, and Adj. EBITDA of \$400-\$430mn raised 17% at the midpoint, driven by the significant uptick in margin. Guidance implies 270bps of EBITDA margin expansion at the midpoint on flattish YoY revenues, vs just 70bps in prior guide. While guidance implies Q4 Adj. EBITDA will down YoY, the impact is from separation costs in Corporate Support vs any impact to pricing (remains positive), backlog (high margin), or optimization efforts. Overall, we find guidance to be achievable given the current level of visibility KNF has, as well as performance to date as an independent entity.

BofA GLOBAL RESEARCH

#### **Contracting backlog**

KNF reports backlog for its contracting services (38% of revenue). 90% of work in backlog is completed within 12 months, with the majority of contracts under \$5mn in size (that said, some projects are substantial) limiting risk/exposure. As of now the firm's backlog has significant margin embedded within it. KNF had backlog of \$732.2mn as of 3Q23.

#### At 2025 targets in 2023: we expect ongoing margin expansion

Knife River provided 2025 and long-term EBITDA margin and capex targets at their investor day in May ahead of the spin off. KNF has outperformed expectations the last few quarters as an independent company, with revised 2023 guidance as of Q3 (15.1% EBITDA margin) above that of the 2025E margin target provided (15%). Given the firms execution to date, we have confidence in the long term 20% EBITDA margin targets. A 20% margin on our 2023E estimates would result in around an incremental \$1.70 in EPS (vs \$2.98 BofAe). Aggregate peers (even those not deriving the majority of revs from aggregates) have EBITDA margins in the 21%-35% range (27% average), further giving us confidence in Knife River's long term target.

#### **Balance sheet**

Leverage stood at 1.4x at the end of 3Q23. Knife River's leverage has some seasonality, as the firm ramps capital into the construction season, and then pays down leverage as accounts receivables are collected and inventory rolls off. This means that leverage typically goes above 2.5x into the construction season and then falls below post season, averaging out to around 2.5x annually. Knife River remains committed to remaining at a long-term average leverage ratio of 2.5x and maintains a revolver capacity of \$350mn to support the business through these seasonal needs. The firm's consistent cash generation is expected to fund the firm's M&A growth strategy, while any pause in purchases should drive a 'natural' delivering bias. We model FCF conversion of 89% for 2023 (\$150mn), with net debt/EBITDA falling to 1.3x (without modelling any acquisitions). In 2024 we model 88% FCF conversion (\$165mn). Long term KNF expects capex in the range of 5%-7%, with the majority of spend tied to maintenance capex, with higher usage across the materials side of the business vs contracting services.

## **Valuation**

### We see upside to \$81

Our \$81 PO is based on 11.0x 2024E EV/EBITDA and implies 29% upside to the current share price. Aggregates tend to trade at the high end of the range, with construction contractors at the lower end (exhibit 20). The market places a higher multiple on pure play aggregates such as VMC and MLM trading at 14-16x range. In our coverage, ROAD more asphalt and road paving contracting work, trades at 11-12x range as its pricing power is more limited vs upstream aggregates. In late November 2023, CRH PLC purchased \$2.1bn of cement and ready-mix concrete assets in Texas from MLM at 12.4x EBITDA. Our valuation multiple leaves Knife River at a turn discount to material and construction name ROAD (and the CRH transaction) given limited experience as a public entity and a notable discount (4x) to aggregate pure plays. In our view, several factors underpin KNF's valuation: i) infrastructure stimulus provides funding visibility over the next few years, ii) the business model should see margin improvement on internal initiatives, continuing to have strong cash flow characteristics and inflation protection, and iii) minimal exposure to the more uncertain themes facing Industrials and Materials (China, supply chains, capacity constraints). That said, we do see some risks i) Pricing across concrete and asphalt has moved more in line with peers, ii) internal initiatives are still in the early stages and pose some execution risk, and iii) rates could weigh on housing (and eventually, knock-off impact to non-res) and constrain valuation multiples.

**Exhibit 20: Comp table**Our valuation leaves KNF on a discount

	EV/Sales			EV	EV/EBITDA			P/E

BofA GLOBAL RESEARCH

### Price objective basis & risk

#### Knife River Corp (KNF)

Our \$81 price objective is based on 11.0x 2024E EV/EBITDA, which is largely in line with the broad peer group, at a significant discount to aggregate heavy names, and a slight discount to material and construction firms such as ROAD given KNF's limited history of independent operation and still expanding aggregate footprint. In our view, several factors are likely to underpin Knife River's multiple: i) Infrastructure stimulus provides funding visibility over the coming years ii) Improving operating driving margin and earnings and, iii) minimal exposure to the more uncertain themes facing Industrials (China, equipment supply chains, capacity constraints). Downside risks are: 1) aggregates prices and volumes fail to rise as we forecast, 2) bottlenecks (labor, etc.) slow down or push out volume growth, 3) dislocation in rates results in a more broad slow down in construction recovery, 4) price-cost dynamics or operating leverage see limited improvement.

Method SM is the set of BofA Global Research standard measures that serve to maintain global consistency under three broad headings: Business Performance, Quality of Earnings, and validations. The key features of iQmethod are: A consistently structured, detailed, and transparent methodology. Guidelines to maximize the effectiveness of the comparative valuation process, and to identify some common pitfalls.

\*\*Matabase\*\* is our real-time global research database that is sourced directly from our equity analysts' earnings models and includes forecasted as well as historical data for income statements, balance sheets, and cash flow statements for companies covered by BofA Global Research.

*IQ*profile<sup>5M</sup>, *IQ*method <sup>5M</sup> are service marks of Bank of America Corporation. *IQ*database<sup>®</sup> is a registered service mark of Bank of America Corporation.

## **Important Disclosures**

#### Equity Investment Rating Distribution: Building Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships <sup>R1</sup>	Count	Percent
Buy	39	44.83%	Buy	22	56.41%
Hold	18	20.69%	Hold	11	61.11%
Sell	30	34.48%	Sell	8	26.67%

#### Equity Investment Rating Distribution: Global Group (as of 31 Dec 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships R1	Count	Percent
Buy	1895	53.62%	Buy	1083	57.15%
Hold	832	23.54%	Hold	454	54.57%
Sell	807	22.84%	Sell	383	47.46%

Issuers that were investment banking dients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

# Investment rating Total return expectation (within 12-month period of date of initial rating) Buy Total return expectation (within 12-month period of date of initial rating) ≥ 10% Ratings dispersion guidelines for coverage cluster®2 ≤ 70%

Buy  $\geq 10\%$   $\leq 70\%$  Neutral  $\geq 0\%$   $\leq 30\%$  Underperform N/A  $\geq 20\%$ 

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: Knife River.

BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Knife River Corp.

The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Knife River Corp.

BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Knife River Corp.

The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Knife River Corp.

BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months. Knife River Corp.

BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Knife River.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

## **Other Important Disclosures**

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments. Refer to BofA Global Research policies relating to conflicts of interest.

\*BofA Securities\* includes BofA Securities, Inc. (\*BofAS\*) and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. \*BofA Securities\* is a global brand for BofA Global Research.

#### General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities. This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies. Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
