Global Asset Manager BULL: Bond & ETFs driving net flows; AB/BLK well-positioned

Industry Overview

Forecast sizable reallocations into bonds in 2024-25

In this monthly series, we gather and analyze data from multiple market data sources (Simfund, Morningstar, Lipper, and ICI) to monitor intra-quarter trends across the asset management industry. Last month, we saw net redemptions in active equities continue versus continued net inflows into active bond and positive passive flows (both equities and bonds). Money market inflows continued but decelerated while net inflows into ETFs improved. Money market, private credit and ETFs generated strong flows in 2023 and we expect to see an acceleration into traditional fixed income (including active) in 2024 following the first Fed rate cut and steepening yield curve. In Europe, net inflows continued driven by inflows into bonds versus outflows in equities.

On a manager basis, we monitored positive/improving net flow results at AB, BLK, CNS, FHI, Fidelity, JPM, MS, PFG, PIMCO, PRU, SCHW, Vanguard, VOYA and WETF due to their bond, ETF, and money market fund businesses (most other names had negative / weak flows). Given our view that both fixed income and ETF flows will be strong in 2024, we continue to recommend AB and BLK as we believe they are best-positioned for the expected reallocations into fixed income.

Update on key secular / cyclical themes:

Active to Passive (secular) - mixed: This trend continued in equities last month with outflows in active compared to continued and accelerated inflows into passive. Within bonds, however, both active and passive flows remained positive with active bond flows exceeding passive.

Domestic to Global/International (secular) - mixed: Within equities, this trend was mixed last month as US, European and Japan equities all inflowed while global and non-Japan Asian equities saw outflows. Fixed income followed the trend with US treasuries and corporates outflowing compared to inflows into global bond.

Equities to Fixed Income (secular) - mixed: This trend was mixed last month as bond inflows continued while total equity flows rebounded and inflected positive. However, bond inflows still significantly surpassed equities. Within fixed income, core, global, mortgage, bank loans and high yield all inflowed. We look for retirees, pension plans and higher interest rates to support this theme in 2024.

Money market funds – positive: Net inflows continued last month but decelerated with QTD net flows tracking much lower q/q. We expect retail MMF flows to continue decelerating and potentially inflect negative in 2024 (tax season in March/April) and for client cash sorting at brokerage firms to continue decelerating as well.

AllianceBernstein (AB, Buy): Net flows inflected positive in Feb led by retail fixed income strength

- Earlier this week, AB reported a positive net flow inflection in February led by strength in fixed income (particularly in its retail channel) coupled with modest improvement in equity outflows. AB's US retail business generated net inflows last month (+\$0.5B vs. +\$1.0B in Jan.) as fixed income inflows continued but were partially offset by outflows in equity. In AB's international retail business, fixed income generated its 4th consecutive month of net inflows with +\$1.0B in Feb (vs. +\$1.8B in Jan) while equity net flows also inflected slightly positive last month. On a fund level, AB's key fixed income strategies: American Income (international) and Municipal Income both generated net inflows.
- Bullish on 2024 fixed income flows: We look for AB's net flows to return to positive territory in 1H24 driven by strength in its taxable bond, muni, and Alts businesses. Near-term performance in AB's flagship funds has improved as well with 4/5 funds outperforming over 1Y. 3Y performance is also strong with 4/5 outperforming (only American Income lagging). We remain bullish on AB's fixed income flows in 2024 after the first Fed rate cut given its very strong fixed income performance (73% AuM outperforming over 3Ys + outperforming the Oligopoly: BLK, PIMCO, Western/BEN, DoubleLine) in addition to its broad product/vehicle offering and wide distribution platform.

T. Rowe Price (TROW, UP): Net outflows again in Feb but further improvement m/m

• Earlier this week, TROW reported preliminary net outflows of \$2.0B in February which marks a second consecutive month of improvement (vs. -\$4.8B in Jan and -\$9.4B in Dec.). Last month, TROW's total US mutual fund & ETF business net flows were -\$1.9B and international flows were flat. LT net outflows of \$1.5B in US retail funds were driven primarily by redemptions in equities (-\$2.0B) which improved m/m (vs. -\$4.3B in Jan) slightly offset by inflows into fixed income (+\$0.1B) and hybrid (+\$0.3B) while total net outflows of \$1.9B were due to negative money market flows (-\$0.3B). Outflows were driven by a broad set of active equity funds but more concentrated in Blue Chip, and Price Growth. Both Blue Chip and Price Growth have weaker LT investment performance (-1/-3% relative over 3Y and -1/-2% over 5Y ann.). We note, however, that Blue Chip and Price Growth have outperformed NT (+15/+8% relative over 1Y) which we believe has contributed to the improvement in TROW's net outflows and should also support an improved overall flow trajectory in 2024.

Europe (Hubert Lam): LT net flows positive led by bonds

Long-term net flows were positive in Europe in January at EUR13bn, a significant increase versus the EUR1.9bn of inflows in December. Inflows were driven by fixed income at EUR35bn compared to EUR14.9bn in December. Mutual fund bonds contributed EUR28.8bn whilst bond ETF inflows were EUR6.1bn. Outside of fixed income, all asset classes were negative on the month. Equity outflows of EUR(11.6)bn were broad based with EUR(5.8)bn a piece in mutual funds and in equity ETF. Hybrids, commodities, and alternatives saw outflows of EUR(7.4)bn, EUR(0.9)bn, and EUR(2.1)bn, respectively. In February, Amundi saw inflows into its higher margin businesses with EUR0.5bn in equities and EUR1.8bn in fixed income. This was partially offset by outflows of EUR(1.3)bn in hybrid.

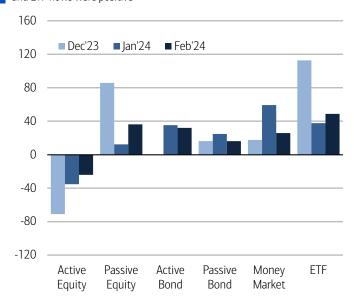

Australia: Net outflows persist while ETF strengthens

Australian Asset Managers have continued to see net outflows across our coverage, with MFG and PTM reporting -0.6% and -1.9% of opening FUM at Feb-24. Net outflows have persisted despite positive investment performance across both stocks. MFG reported the "majority" of outflows during 2HCY24 to be within Global Equities, vs mild net outflows within Infrastructure and net inflows into the Australian fund. Net outflows are consistent with industry outflows within International equities during 3QCY23, vs industry inflows into Australian equities. Net flows were positive across Australian and International FI. Active to passive shift continues with ETF FUM +33.3% Y/Y at Dec-23.

Price objective basis & risk

AllianceBernstein (AB)

Our price objective (PO) is derived from a price to earnings method. We apply a 12.5x multiple on our 2026E EPS to obtain our \$50 PO. 12.5x is in line with the company's five-year average but represents a premium to its traditional/active peer group excluding BlackRock. We think that AB's improving business mix/organic growth trajectory could support a higher valuation in the future if AB's total net flows rebound in 2024.

Downside risks to AB: (1) active to passive rotation + industry fee pressure, (2) AB's business model is procyclical and is impacted from market prices, (3) Bernstein's research business faces secular pressures relating to industry consolidation, (4) AB has soft investment performance in its active equity business, (5) its large APAC franchise faces risks related to a potential US-China decoupling and a China-Taiwan conflict.

Upside risks: (1) improving net flows, (2) investment performance (improving since June 16), and (3) favorable markets.

BlackRock, Inc. (BLK)

Our PO of \$1025 is based on a 20x 2026E EPS multiple. This is slightly lower than the mid-point of where the stock has traded over the last 12-18 months (17 to 24x range on next 12 month EPS). The asset manager stocks are currently trading at a wide range (5-42x) with an average of 15x EPS and our PO assumes BLK maintains its historical premium (especially relative to the traditional asset managers given BLK's higher growth prospects).

Risks to our PO are (1) capacity and regulatory issues created by size, (2) negative markets or market-driven mix shift (divergent beta), (3) fee pressure (pricing cuts).

T. Rowe Price (TROW)

Our price objective (PO) for TROW is \$101 and is derived from a price to earnings method. We apply a 10.0x multiple on our 2026 EPS estimate plus \$11 for TROW's excess capital (and zero debt) to obtain our PO. 10.0x is lower than TROW's 5Y average multiple of 15.0x, which is due to our reduced forward growth estimate for EPS/AuM.

Upside risks to our PO are (1) strong fundraising activity at Oak Hill which would improve TROW's future organic growth, (2) acceleration in international expansion which would help net flows, (3) improving margins following the new partnership with FIS, (4) reversal in the negative net flow trend following the formation of TRPIM.

Downside risks to our PO are (1) pricing pressure, (2) elevated net redemptions in its 401k business, (3) deterioration in investment performance, or (4) disruption to the company's investment culture.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.
